Usage Notice

Do not look into the lens. The bright light may hurt your eyes. To reduce the risk of fire or electric shock, do not expose this Warningproduct to rain or moisture. Please do not open or disassemble the product as this may cause electric shock. When changing the lamp, please allow unit to cool down, and follow Warningall changing instructions. This product will detect the life of the lamp itself. Please be sure to Warningchange the lamp when it shows warning messages. After changing a new lamp, please reset the lamp life from OSD menu. Before switching off the product, please keep the cooling fan Warningrunning for a few minutes. When connecting the projector to computer, please turn on the projector first. To reduce the risk of injury to the eyes, do not look directly into the laser light on the remote control and do not point the laser light into Warninganyone's eyes. This remote control is equipped with a Class II laser that emits radiation. When the lamp reaches the end of its life, it will burn out and may Warningmake a loud popping sound. If this happens, the projector will not turn back on until the lamp module has been replaced. To replace the lamp, follow the procedures listed under "Changing the Lamp".

Precautions

Follow all warnings, precautions and maintenance as recommended in this user's manual to maximize the life of your unit.

Do:

- □ Turn off the product before cleaning.
- Use a soft cloth moistened with mild detergent to clean the display housing.
- Disconnect the power plug from AC outlet if the product is not being used for a
 FixYourDLP dong period of time.

Spansared by DM

Don't:

□ Block the slots and openings on the unit provided for ventilation.

THE TRUS Use abrasive cleaners, waxes or solvents for your cleaning SAND ACCESSORIES

- Use under the following conditions:
 - Extremely hot, cold or humid environment.
 - In areas susceptible to excessive dust and dirt.
 - Near any appliance generating a strong magnetic field.
 - Place in direct sunlight.

Introduction

Product Features

This product is an XGA single chip 0.7" DLP^{TM} Projector. The outstanding features of it are listed as follows:

□ True XGA, 1024 x 768 addressable pixels
 □ 3.3 lbs (1.5 kgs) lightweight compact design
 □ Single chip DLP™ technology
 □ SXGA compression and VGA, SVGA re-sizing
 □ 130 Watts user replaceable P-VIP lamp
 □ Mac/NEC PC-98/FM Towns compatible
 □ NTSC/NTSC4.43/PAL/PAL-M/PAL-N/SECAM and HDTV (1080i,720P,480i/P) compatible
 □ Full function remote with mouse control and laser pointer
 □ High-tech DVI Connection for digital and analog video connectivity
 □ High definition TV compatibility
 □ User friendly Multilingual on-screen display menu
 □ Advanced electronic keystone correction

User friendly control panel with backlight

Luxurious carrying case included

Installation

Connecting the Projector

ixYourDLP.com

*DVI signal cable for DVI is the optional accessory.

To ensure the projector works well with your computer, please configure the display mode of your graphic card to make it less than or equal to 1024 X 768.

THE TRU resolution. Make sure timing of the display mode is compatible with the projects. ORIES Refer to the "Compatibility Modes" section on page 27.

Power On/Off the Projector

♦ Powering On the Projector

- 1. Remove the lens cap. •
- 2. Ensure that the power cord and signal cable are securely connected.
- 3. The "Power/Standby" indicator will flash. 2 And press the "Power/Standby" button again to start on your projector.
 - The startup screen will display and count down for 20 seconds and the Power/Standby indicator will light solid amber.
- 4. Turn on your source (computer, notebook, or video player ,etc.). The projector will detect your source automatically.
- * If the screen displays "No Signal", please make sure the signal cables are securely connected.
- * If you connect multiple sources at the same time, use the "Source" button on the Remote Control or Panel Control to switch.
- * Turn on the projector first and then the computer.

Powering Off the Projector

- 1. Press the "Power/Standby" button to turn off the projector lamp.
- 2. After pressing the "Power/Standby" button, you will see a message "Power off the lamp?" on the on-screen display. Press the "Power/Standby" button again to confirm. Otherwise the message will disappear after 5 seconds.
- 3. "Power/Standby" LED indicator will flash amber for about 30 seconds.
- 4. Disconnect the power cord from the electrical outlet and the projector.
- * When the "LAMP" indicator lights solid orange; please change the lamp module immediately.
- * When the "TEMP" indicator lights solid orange, it indicates the projector has been overheated. The display will automatically shut itself down.

 Under normal conditions, the display can be switched on again for your presentation. If the problem persists, you should contact your local dealer or our service center.
- * No matter the video source is input or not, if you press "Power/Standby" by accident, a "Power off the lamp?" sign will display in screen. You can clear the turn-off message by pressing any function key. Or you can just ignore this message without pressing any function key; the message will disappear after 5 seconds and restore to previous status.

Adjusting the Projected Image

♦ Adjusting the Projector Height

The projector is equipped with an elevator foot for adjusting the projector height.

To raise the projector:

- 1. Press the elevator button **①**.
- 2. Raise the projector to the desired display angle **2**, then release the button to lock the elevator foot into position.
- 3. Use **3** to fine-tune height adjustment.

To lower the projector:

- 1. Press the elevator button.
- 2. Lower down the projector, then release the button to lock the elevator foot into position.
- 3. Use **3** to fine-tune height adjustment.

English

♦ Adjusting the Projector Zoom / Focus

You may adjust zoom ring to zoom in / out. Rotate the zoom ring counter-clockwise to zoom in and clockwise to zoom out. To focus the image, rotate the focus ring until the image is clear. The projector will focus at distances from 3.3 feet to 39.4 feet (1m to 12m).

Troubleshooting

If you are experiencing trouble with the projector, refer to the following. If the problem persists, please contact your local dealer or our service center.

Problem: No image appears on screen.

- ▶ Ensure all the cables and power connections are correctly and securely connected as described in the "Installation" section.
- ▶ Ensure the pins of connectors are not crooked or broken.
- ▶ Check if the projection lamp has been securely installed. Please refer to the "Changing the lamp" section.
- Make sure you have removed the lens cap and the projector is switched on.

Problem: Partial, scrolling or incorrectly displayed image.

- Press the "Resync" button on the Remote Control.
- ▶ If you are using a PC:

If the resolution of your computer is higher than 1024 x 768. Follow the steps outlined below to reset the resolution.

For Windows 3.x:

- 1. In the Windows Program Manager, click the "Windows Setup" icon in the Main group.
- 2. Verify that your display resolution setting is less than or equal to 1024 x 768.

For Windows 95:

- 1. Open "My Computer" icon, the "Control Panel" folder, and then double click the "Display" icon.
- 2. Select the "Setting" tab.
- 3. In the "Desktop Area" you will find the resolution setting. Verify that the resolution setting is less than or equal to 1024 x 768 resolution.

If the projector is still not projecting the whole image, you will need to also change the monitor display you are using. Refer to the following steps.

- 4. Follow above steps 1~2. Click on the "Advanced Properties" button.
- 5. Select the "Change" button under the "Monitor" tab.
- 6. Click on "Show all devices". Then select "Standard monitor types" under the "Manufactures" box; choose the resolution mode you need under the "Models" box.
- 7. Verify that the resolution setting of the monitor display is less than or equal to 1024×768 .
- ▶ If you are using a Notebook PC:
 - 1. You are required to implement above steps of resolution setting of computer first.
 - 2. Switch the Notebook PC display to the "external display only" or "CRT only" mode.
- ▶ If you are experiencing difficulty in changing resolutions or your monitor freezes, restart all the equipment and the projector.

Problem: The screen of the Notebook or PowerBook computer is not displaying your presentation.

- ▶ If you are using Notebook PC:
 - Some Notebook PCs may deactivate their own computers' screens when a second display device is in use. Each of them has different way to be reactivated. Refer to your computer's documentation for detailed information.
- ▶ If you are using an Apple PowerBook: In Control Panels, open the PowerBook Display to select Video Mirroring "On".

Problem: Image is unstable or flickering

- Use "Tracking" to correct it.
- ▶ Change the monitor color setting from your computer.

Problem: Image has vertical flickering bar

- ▶ Use "Frequency" to make an adjustment.
- ▶ Check and reconfigure the display mode of your graphic card to make it compatible with the product.

Problem: Image is out of focus

ixYourDL Adjust the Focus Ring on the projector lens.

Make sure the projection screen is between the required distance 3.3ft.(1m)~ 39.4ft.

SCOU^(12m) from the projector. hant. Com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

English

Problem: The screen is outstretched when displaying 16:9 DVD.

The projector itself will automatically detect 16:9 DVD and adjust the aspect ratio by digitization to full screen with 4:3 default setting.

If the projector is still outstretched, you will also need to adjust the aspect ratio by referring to the following:

- ▶ Please select 4:3 aspect ratio type on your DVD player if you are playing a 16:9 DVD.
- ▶ If you can not select 4:3 aspect ratio type on your DVD player, please select 4:3 On Screen-Display(OSD) function of the projector for your display.

Problem: Image is reverse.

▶ To open "Menu" then selects "Management" to adjust the projection.

Problem: Lamp burns out or makes a popping sound

When the lamp reaches its end of life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn back on until the lamp module has been replaced. To replace the lamp, follow the procedures in the "Changing the Lamp".

Changing the lamp

The projector will detect the lamp life itself. It will show you a warning message "Lamp is running out of standard lifetime. Be sure to replace the lamp as soon as possible." When you see this message, change the lamp as soon as possible.

Make sure the projector has been cooled down for at least 30 minutes before changing the lamp.

▶ Lamp Changing Procedure:

- 1. Turn off the power to the projector by pressing the Power/Standby button.
- 2. Allow the projector to cool down at least 30 minutes.
- 3. Disconnect the power cord.
- 4. Use screwdriver to remove the screw from the cover. •
- 5. Remove the cover. 2
- 6. Remove the 5 screws from the lamp module. •
- 7. Pull out the lamp module.

To replace the lamp module, reverse the previous steps.

Discount-Merchant.com (800) 281-8860

Warning: To reduce the risk of personal injury, do not drop the lamp module or touch the lamp bulb. The bulb may shatter and cause injury if it is dropped.
