EIKI MULTIMEDIA PROJECTOR

MODEL LC-XB29N

Network Supported

- Wireless LAN (optionally available) IEEE802.11b/g
- Wired LAN
- 100-Base-TX/10-Base-T

<u>Memory Viewer</u>

USB Memory Viewer (optionally available) Compatible with a dedicated USB memory

*Refer to the owner's manuals below for details about network and memory viewer function.

- Network Set-up and Operation
- Owner's Manual USB Memory This manual is provided with optionally supplied USB memory (Model: WL-10).

OWNER'S MANUAL

PJLink[™]

SCOUNT-Merchant.com (800) 281-8860 THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

Compact Design

This projector is designed compact in size and weight. It is easy to carry and installed anywhere you wish to use.

Compatibility

The projector widely accepts various video and computer input signals including; Computers, 6 Color systems (PAL, SECAM, NTSC, NTSC4.43, PAL-M, PAL-N), Component video, S-video and RGB scart.

• Simple Computer System Setting

The projector has the Multi-scan system to conform to almost all computer output signals quickly (p.30). Up to UXGA resolution can be accepted.

• Useful Functions for Presentations

- The digital zoom function allows you to focus on the crucial information during a presentation (p.37).
- Blackboards* can be used as a projection screen. *The board color is limited to Green (pp.34, 41).

Power Management

The Power management function reduces power consumption and maintains the lamp life (p.50).

Lamp Control

Brightness of the projection lamp can be selected (p.51).

Logo Function

Multilanguage Menu Display

Operation menu is available in 16 languages; English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Chinese, Korean, and Japanese (p.45).

Security Function

The Security function helps you to ensure security of the projector. With the Key lock function, you can lock the operation on the top control or remote control (p.52). PIN code lock functions prevents unauthorized use of the projector (pp.21, 52–53).

Helpful Maintenance Functions

Lamp and filter maintenance functions provide for better and proper maintenance of the projector.

LAN Network Function

This projector is loaded with Wired and Wireless LAN* network function. You can project an image on a computer via the network. You can also operate and manage the projector via the network. For details, refer to the owner's manual "Network Set-up and Operation" supplied with this projector.

* Dedicated USB Wireless LAN adapter for Wireless operation is optionally available (Model : WL-30)

Memory Viewer Function (Optional Function)

Insert the dedicated USB memory (optionally supplied: Model WL-10) into the projector to project images or presentation data stored within. You do not have to carry computers or other equipment for a presentation

*For details, refer to the owner's manual provided with optionally supplied USB memory.

The Logo Dub-Cionaliows you to customize the screen logo (pp.47-48). You can capture an image for the screen logo and use it for the starting-up display or between presentations.

Trademarks

Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation.

Before installing and operating this projector, read this manual thoroughly.

This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in good condition for many years to come.

Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section in the back of this booklet. If the problem still persists, contact the dealer where you purchased the projector or the service center.

SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT. THIS SYMBOL INDICATES THAT THERE ARE

IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT.

NOTE: This symbol and recycle system are applied only to EU countries and not applied to the countries in the other area of the world.

Your EIKI product is designed and manufactured with high quality materials and components which can be recycled and reused.

This symbol means that electrical and electronic equipment, at their end-oflife, should be disposed of separately from your household waste.

Please dispose of this equipment at your local community waste collection/recycling centre. In the European Union there are separate collection systems for used electrical and electronic products. Please help us to conserve the environment we live in!

READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE.

	Ν	Safety	Precautio	n
--	---	--------	-----------	---

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

- This projector produces intense light from the projection lens. Do not stare directly into the lens, otherwise eye damage could result. Be especially careful that children do not stare directly into the beam.
- Install the projector in a proper position. Otherwise it may result in fire hazard.
- Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is critical for proper air circulation and cooling of the unit. The dimension shown here indicate the minimum space required. If the projector is to be built into a compartment or similarly enclosed, these minimum distances must be maintained.

- Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.
- If the projector is unused for an extended time, unplug the projector from the power outlet.

E

CAUTION ON HANGING FROM THE CEILING

When hanging the projector from the ceiling, clean air intake vents, filters, or top of the projector periodically with a vacuum cleaner. If you leave the projector unclean for a long time, the cooling fans can be clogged with dust, and it may cause a breakdown or a disaster.

DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER. IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED.

CAUTION

Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment, ANSI/NFPA 75. SO RUES Ne peut être utilisé dans une salle d'ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment

Safety Instructions

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other milar surface. This projector should never be placed near over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector. Do not install the projector near the ventilation duct of airconditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

- a. When the power cord or plug is damaged or frayed.
- b. If liquid has been spilled into the projector.
- c. If the projector has been exposed to rain or water.
- d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
- e. If the projector has been dropped or the cabinet has been damaged.
- f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Air Circulation

Openings in the cabinet are provided for ventilation. To ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered.

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.

- Do not put any flammable object or spray can near the projector, hot air is exhausted from the air vents.
- Keep the exhaust vent at least 3' (1 m) away from any objects.
- Do not touch a peripheral part of the exhaust vent, especially screws and metallic parts. These areas will become hot while the projector is being used.
- Do not put anything on the cabinet. Objects put on the cabinet will not only get damaged but also may cause fire hazard by heat.

Cooling fans are provided to cool down the projector. The fans' running speed is changed according to the temperature inside the projector.

Moving the Projector

When moving the projector, replace the lens cover and retract adjustable feet to prevent damage to the lens and cabinet.

When the projector is not in use for an extended period, put it into the supplied carrying case with the lens side up.

The carrying case (supplied) is intended for protection against dust and scratches on surface of the cabinet, and it is not designed to protect an appliance from external forces. Do not transport the projector by courier or any other transport service with this case, otherwise the projector can be damaged. When handling the projector, do not drop, bump, subject it to strong forces, or put other things on the cabinet.

CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR

- Do not drop or bump the projector, otherwise damages or malfunctions may result.
- -When carrying the projector, use a suitable carrying case.
- -Do not transport the projector by courier or any other transport service in an unsuitable transport case. This may cause damage to the projector. For information about transporting the projector by courier or any other transport service, consult your dealer.
- -Do not put the projector in a case before the projector is cooled enough.

Installing the Projector in Proper Directions

Use the projector properly in specified positions. Improper positioning may reduce the lamp life and result in severe accident or fire hazard.

Positioning Precautions

Avoid positioning the projector as described below when installing.

Federal Communications Commission Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

AC Power Cord Requirement

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).

AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

24 NETWORK button

Select the Network input or Memory viewer input. See owner's manual "Network Set-up and Operation" and owner's manual of Memory viewer (optionally available).

Laser Pointer Function

This remote control emits a laser beam from the laser light window. Press the LASER button to activate the laser pointer. The signal emission indicator lights red and the red laser beam is emitted. If the LASER button is pressed for more than one minute or if it is released, the laser light goes off.

The laser emitted is a Class II laser. Do not look into the laser light window or point the laser beam at yourself or other people. The following is the caution label for the laser beam.

CAUTION: Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure. Never look directly into the laser light window while a laser is emitted, otherwise eye damage may result.

Pointer Function

You can move the Spotlight or Pointer of the projector with the remote control to emphasize a part of the projected image.

- Press and hold the MENU and NO SHOW buttons for more than 10 seconds to activate the Pointer function. (The Laser pointer has switched to the Pointer function.)
- 2 Press the LASER button on the remote control pointing toward the projector. The Spotlight or Pointer is displayed on the screen with the LASER button lighting green. Then move the Spotlight or Pointer with the PRESENTATION POINTER button. If the LASER button does not light green and continues to emit a laser beam, try the abovementioned procedure until the LASER button lights green.
- **3** To clear the Spotlight or Pointer out the screen, press the LASER button pointing toward the projector and see if the LASER button lighting is turned off. To switch to the Laser pointer again, press and hold the NO SHOW and MENU buttons for more than 10 seconds or slide the RESET/ON/ALL-OFF switch to "RESET" and then to "ON".

When you reset the Pointer function, the remote control code will be reset, as well.

Pointer

PRESENTATION POINTER button

-MENU button -NO SHOW button

Press and hold the MENU and NO SHOW buttons for more than 10 seconds.

PRESENTATION POINTER

-LASER button

After the Laser pointer has switched to the Pointer, use the LASER button as the Pointer function ON-OFF switch. Press the LASER button pointing toward the projector and see if it lights oreen

✔Note:

FixYourDLPlight

• You can choose the size of Spotlight (Large/Middle/Small) and the pattern of Pointer (Arrow/Finger/Dot) in the Setting Menu. See "Pointer" on page 51.

Wireless Mouse Operation

The remote control can be used as a wireless mouse for your computer. Before operating the wireless mouse, connect your computer and the projector with the supplied USB cable. See "Connecting to a Computer" on page 17. When the Pointer function is used, the wireless mouse is not available.

PRESENTATION POINTER button

Move the pointer on the screen with this button.

R-CLICK button

Acts as right (click) mouse button while the projector and a computer are connected with a USB cable.

Remote Control Code

The eight different remote control codes (Code 1–Code 8) are assigned to this projector. Switching the remote control codes prevents interference from other remote controls when several projectors or video equipment next to each other are operated at the same time. Change the remote control code for the projector first before changing that for the remote control. See "Remote control" in the Setting Menu on page 51.

- Press and hold the MENU and IMAGE buttons for more than five seconds to switch between the codes. The code switches sequentially for one pressing the IMAGE button. See the list below.
- 2 To initialize the remote control code, slide the RESET/ ON/ALL-OFF switch to "RESET," and then to "ON." The initial code is set to Code 1.

While pressing the MENU button, press the IMAGE button number of times corresponding to the remote control code.

Remote Control Battery Installation

- *1* Open the battery compartment lid.
- Install new batteries into the compartment.
- *3* Replace the compartment lid.

Two AAA size batteries For correct polarity (+ and –), be sure battery terminals are in contact

with pins in compartment.

3

To insure safe operation, please observe the following precautions :

2

- Use two (2) AAA or LR03 type alkaline batteries.
- Always replace batteries in sets.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the remote control to moisture or heat.
- Do not drop the remote control.
- If the battery has leaked on the remote control, carefully wipe the case clean and install new batteries.
- Risk of an explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.

Remote Control Operating Range

Point the remote control toward the projector (Infrared Remote Receiver) when pressing the buttons. Maximum operating range for the remote control is about 16.4' (5 m) and 60 degrees in front of the projector.

Adjustable Feet

Projection angle can be adjusted up to 10.0 degrees with the adjustable feet.

Lift the front of the projector and pull the feet lock latches on both side of the projector upward.

Release the feet lock latches to lock the adjustable feet and **Former the adjustable f**eet to a proper height, and tilt.

Keystone distortion can be adjusted automatically with the Auto setup function or manually by using the remote control or the menu operation (see pages 26, 45, 46). THE TRUSTED SOURCE FOR PROJECTOR I

Positioning the Projector

For projector positioning, see the figures below. The projector should be set perpendicularly to the plane of the screen.

✓ Notes:

- The brightness in the room has a great influence on picture quality. It is recommended to limit ambient lighting in order to obtain the best image.
- All measurements are approximate and may vary from the actual sizes.

Screen Size (W x H) mm	40″	100″	150″	200″	300″
4 : 3 aspect ratio	813 x 610	2032 x 1524	3048 x 2286	4064 x 3048	6096 x 4572
Zoom (min)	5.6' (1.7m)	14.4' (4.4m)	21.6' (6.6m)	28.9' (8.8m)	43.0' (13.1m)
Zoom (max)	3.6' (1.1m)	9.2' (2.8m)	13.8' (4.2m)	18.4' (5.6m)	27.5' (8.4m)

Connecting to Component Video Equipment

Cables used for connection

- Audio Cables *
- Scart-VGA Cable *
- Component Cable *
- Component-VGA Cable *
- (* = Not supplied with this projector.)

- When connecting the AUDIO OUT to external audio equipment, the projector's built-in speaker is disconnected.
- See page 69 for ordering optional cables.

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.

Connecting the AC Power Cord

This projector uses nominal input voltages of 100–120 V or 200–240 V AC and it automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system.

If you are not sure of the type of power being supplied, consult your authorized dealer or service station. Connect the projector with all peripheral equipment before turning the projector on.

For safety, unplug the AC power cord when the projector is not in use. When the projector is connected to an outlet with the AC power cord, it is in stand-by mode and consumes a little electric power.

Connect the AC power cord (supplied) to the projector.

The AC outlet must be near this equipment and must be easily accessible.

Turning On the Projector

- 1 Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.
- 2 Connect the projector's AC power cord into an AC outlet. The POWER indicator lights red.
- **3** Press the POWER ON-OFF button on the top control or on the remote control. The POWER indicator lights green and the cooling fans start to operate. The preparation display appears on the screen and the count down starts.
- 4 After the countdown, the input source that was selected the last time and the lamp control status icon (see page 51) appear on the screen.

If the projector is locked with a PIN code, PIN code input dialog box will appear. Enter the PIN code as instructed below.

Enter a PIN code

Use the Point ▲▼ buttons to enter a number. Press the Point ▶ button to fix the number and move the red frame pointer to the next box. The number changes to "*." If you fixed an incorrect number, use the Point ◀ button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to "Set." Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect PIN code, "PIN code" and the number (****) will turn red for a moment. Enter the correct PIN code all over again.

What is PIN code?

PIN (Personal Identification Number) code is a security code that allows the person who knows it to operate the projector. Setting a PIN code prevents unauthorized use of the projector.

A PIN code consists of a four-digit number. Refer to the PIN **code took function in** the Setting Menu on pages 52–53 for locking operation of the projector with your PIN code.

CAUTION ON HANDLING PIN CODE

If you forget your PIN code, the projector can no longer be started. Take a special care in setting a new PIN code; write down the number in a column on page 72 of this manual and keep it at hand. Should the PIN code be missing or forgotten, consult your dealer or service center.

The preparation display will disappear after 30 seconds.

Selected Input Source and Lamp Control

(See page 51 for Lamp control status.)

✓Note:

• The Filter warning and Lamp replacement icons may appear on the screen depending on the usage state of the projector.

PIN Code Input Dialog Box

✓Notes:

- When the Logo select function is set to "Off," the logo will not be shown on the screen (p.47).
- When the "Countdown off" or "Off" is selected in the Display function, the countdown will not be shown on the screen (p.46).
- During the countdown period, all operations are invalid.
- If the correct PIN code number is not entered
- within three minutes after the PIN code dialog box appeared, the projector will be turned off
- The "1234" is set as the initial PIN code at the factory.
- When the Input Search function is set to "On2", the input signal will be searched automatically (p.49)

Turning Off the Projector

- Press the POWER ON-OFF button on the top control or on the remote control, and "Power off?" appears on the screen.
- Press the POWER ON-OFF button again to turn off the projector. The POWER indicator starts to blink red, and the cooling fans keep running. (You can select the level of fans' quietness and speed. See "Fan" on page 54.) At this time, you can unplug the AC power cord even if the fans are still running.
- **3** When the projector has cooled down enough, the POWER indicator stops blinking and you can turn on the projector. After it is cooled down completely, unplug the AC power cord.

"Power off?" disappears after 4 seconds.

TO MAINTAIN THE LIFE OF THE LAMP, ONCE YOU TURN THE PROJECTOR ON, WAIT AT LEAST FIVE MINUTES BEFORE TURNING IT OFF.

✓Notes:

- When the On start function is set to "On," the projector will be turned on automatically by connecting the AC power cord to an AC outlet (p.51).
- Do not operate the projector continuously without rest. Continuous use may result in shortening the lamp life. Turn off the projector and let stand for about an hour in every 24 hours.
- The running speed of cooling fans is changed according to the temperature inside the projector.
- Do not put the projector in a case before the projector is cooled enough.
- If the WARNING indicator blinks or lights red, see "Warning Indicators" on page 56.
- While the POWER indicator is blinking, the lamp is being cooled down and the projector cannot be turned on. Wait until the POWER indicator stops blinking to turn on the projector again.

Exit the Sound Menu.

Auto Setup Function

Auto setup function is provided to automatically correct Keystone distortion according to the projector's tilt and adjust the computer display parameters (Fine sync, Total dots, and Picture position) by just pressing the AUTO SET UP button on the top control or the AUTO SET button on the remote control. The operational setup for the Auto setup can be changed in the Setting menu. Refer to page 45 for the setting of the Auto setup function.

✓Notes:

- Auto Keystone corrects vertical distortion only; it does not correct horizontal distortion.
- Auto Keystone cannot work when Ceiling feature is set to "On" in the Setting menu (p.49).
- Perfect correction of the image distortion cannot be ensured with the Auto setup function. If the distortion cannot be corrected properly by pressing the AUTO SETUP/AUTO SET button, adjust manually by pressing the KEYSTONE button on the remote control or selecting Keystone in the Setting menu (p.46).
- Fine sync, Total dots, Horizontal and Vertical position of some computers cannot be fully adjusted with the Auto PC Adjustment function. When the image is not provided properly with this operation, manual adjustments are required (pp.32–33).

Keystone Correction

If a projected picture still has keystone distortion after pressing the AUTO SET UP button on the top control or the AUTO SET button on the remote control, correct the image manually as follows:

Press the KEYSTONE button on the remote control. The Keystone dialog box appears. Use the Point ▲▼ buttons to correct keystone distortion. The keystone adjustment can be stored (see page 46).

Reduce the upper width with the Point ▲ button.

Reduce the lower width with the Point ▼ button.

Remote Control Operation

Using the remote control for some frequently used operations is advisable. Just pressing one of the buttons enables you to make the desired operation quickly without calling up the On-Screen Menu.

COMPUTER/VIDEO/NETWORK button

Press the COMPUTER, VIDEO, or NETWORK button on the remote control to select the input source. See pages 28-29, 38-39 for details. Refer to the owner's manual "Network Set-up and

Operation" for details about the network input.

Computer System Selection

This projector automatically tunes to various types of computers based on VGA, SVGA, XGA, SXGA, WXGA, or UXGA with its Multi-scan system and Auto PC Adjustment. If a computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional settings. (Signal formats provided in this projector are shown on pages 66-67.)

One of the following messages may appear when:

- Auto The projector cannot recognize the connected signal conforming to the provided PC Systems. The "Auto" is displayed on the System Menu box and the Auto PC Adjustment function works to display proper images. If the image is not projected properly, a manual adjustment is required (pp.32-33).
 - There is no signal input from the computer. Check the connection between your computer and the projector. (See "Troubleshooting" on page 62.)
- Mode 1The preset system is manually adjusted in the
PC Adjust Menu. The adjusted data can be
stored in Mode 1–5 (pp.32-33).
- **SVGA 1** PC Systems provided in this projector is chosen. The projector chooses a proper system provided in the projector and displays it.

PC System Menu

*Mode 1 and SVGA 1 are examples.

Selecting Computer System Manually

PC system can also be selected manually.

🟹 Auto setup

This function enables Auto Keystone correction and Auto PC adjustment by pressing the AUTO SETUP button on the top control or the AUTO SET button on the remote control. Settings for those functions can be altered as follows:

Auto PC Adj.

- On Enables Auto PC Adjustment when pressing the AUTO SET button on the remote control or the AUTO SETUP button on the top control.
- OffDisables Auto PC Adjustment.

Auto Keystone

- Auto Always works and corrects keystone distortion according to the projector's tilt.
- Manual . . .Works only when pressing the AUTO SET button on the remote control or the AUTO SETUP button on the top control.
- OffDisables Auto Keystone.

✓ Notes:

- Auto PC Adj. and Auto Keystone cannot be set "Off" at the same time.
- Auto Keystone corrects vertical distortion only, not correct horizontal distortion.
- •The Auto Keystone cannot work when Ceiling feature is On in the Setting menu (p.49).
 - Perfect correction of the image distortion cannot be ensured with
 - the Auto setup function. If the distortion is not corrected properly
- by pressing the AUTO SETUPIAUTO SET button, adjust manually
- by pressing the KEYSTONE button on the remote control of ECTOR LAMPS AND ACCESSORIES selecting Keystone in the Setting menu (pp.26, 46).
- Fine sync, Total dots, Horizontal and Vertical position of some computers cannot be fully adjusted with the Auto PC Adjustment function. When the image is not provided properly with this operation, manual adjustments are required (pp.32–33).

Keystone

This function is used to store or reset the keystone correction when the AC power cord is unplugged. Use the Point ◀▶ buttons to switch between each option.

- Store Keep the keystone correction even when the AC power cord is unplugged.
- Reset Release the keystone correction when the AC power cord is unplugged.

To correct keystone distortion, press the SELECT button. The "Keystone" appears on the screen. Use the Point $\blacktriangle V$ buttons to correct keystone distortion (p.26).

Blue back

When this function is "On," a blue image is displayed while the input signal is not detected.

🛛 Display

This function decides whether to display On-Screen Displays.

On	Show all the On-Screen displays. Use this function when you want to
	project images after the lamp
	becomes bright enough. The factory
	default setting is in this option.
Countdown Off	Show the input image instead of the
	countdown when turning on the
	projector. Use this function when you
	want to project the image as early as
	possible even when the lamp is not
	bright enough.
Off	Hide the On-Screen Displays except;
	●On-Screen Menu
	• "Power off?" (p.22)
	• "No signal" for Power management
	(p.50)
	• "Please wait"
	•White arrows for the True function

Logo PIN code lock

This function prevents an unauthorized person from changing the screen logo.

- Off..... The screen logo can be changed freely from the Logo Menu (p.47).
- On The screen logo cannot be changed without a Logo PIN code.

If you want to change the Logo PIN code lock setting, press the SELECT button and the Logo PIN code dialog box appears. Enter a Logo PIN code by following the steps below. The initial Logo PIN code is set to "4321" at the factory.

Enter a Logo PIN code

Use the Point \blacktriangle buttons to enter a number. Press the Point \triangleright button to fix the number and move the red frame pointer to the next box. The number changes to "*." If you fixed an incorrect number, use the Point \blacktriangleleft button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to "Set." Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect Logo PIN code, "Logo PIN code" and the number (***) will turn red for a moment. Enter the correct Logo PIN code all over again.

Change the Logo PIN code lock setting

Use the Point ◀► buttons to switch On/Off, and then press the Point ▼ button to move the pointer to "Quit." Press the SELECT button to close the dialog box.

Change the Logo PIN code

Logo PIN code can be changed to your desired four-digit number. Press the Point ▼ button to select "Logo PIN code change" and then press the SELECT button. The New Logo PIN code input dialog box appears. Set a new Logo PIN code.

Be sure to note the new Logo PIN code and keep it at hand. If you lost the number, you could no longer change of the the Logo PIN code setting. For details on PIN code setting, refer to "PIN code lock" on pages 52–53.

Warning Indicator

The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance.

Top Control

0

WARNING LAMP REPLACE

The projector is shut down and the WARNING indicator is blinking red.

When the temperature inside the projector reaches a certain level, the projector will be automatically shut down to protect the inside of the projector. The POWER indicator is blinking while the projector is being cooled down. When the projector has cooled down enough (to its normal operating temperature), it can be turned on again by pressing the POWER ON-OFF button.

✓ Note:

• The WARNING indicator continues to blink even after the temperature inside the projector returns to normal. When the projector is turned on again, the WARNING indicator stops blinking.

Then check the matters below:

FixYourDLP.com

- Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if the air vents of the projector are not blocked.
- Has the projector been installed near an Air-Conditioning/ Heating Duct or Vent? Move the installation of the projector away from the duct or vent.
- Is the filter clean? Clean the filter periodically.

The projector is shut down and the WARNING indicator lights red.

When the projector detects an abnormal condition, it is automatically shut down to protect the inside of the projector and the WARNING indicator lights red. In this case, unplug the AC power cord and reconnect it, and then turn the projector on once again to verify operation. If the projector cannot be turned on and the WARNING indicator still lights red, unplug the AC power cord and contact the service station.

emit a red light

WARNING

blinking red

CAUTION DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER AN (800) 281-8860 ABNORMAL CONDITION. IT MAY RESULT IN AMPS AND ACCESSORIES FIRE OR ELECTRIC SHOCK.

Cleaning the Filter

Filters prevent dust from accumulating on the optical elements inside the projector. Should the filters become clogged with dust particles, it will reduce cooling fans' effectiveness and may result in internal heat buildup and adversely affect the life of the projector. If a "Filter warning" icon appears on the screen, clean the filters immediately. Clean the filters by following the steps below.

- Turn off the projector, and unplug the AC power cord 1 from the AC outlet.
- Turn the projector over and remove the filters by 2 pulling the latches upward.
- Gently clean the filters by using a brush or rinse them 3 softly.
- When rinsing the filters, dry them well. Replace the 1 filters properly. Make sure that the filters are fully inserted to the projector.

CAUTION

Do not operate the projector with the filters removed. Dust may accumulate on the optical elements degrading picture quality. Do not put anything into the air vents. Doing so may result in malfunction of the projector.

RECOMMENDATION

We recommend avoiding dusty/smoky environments when you operate the projector. Usage in these environments may cause poor image quality. When using the projector under dusty or smoky conditions, dust may accumulate on a lens, LCD panels, or optical elements inside the projector degrading the quality of a projected image. When the symptoms above are noticed, contact your authorized dealer or service station for proper cleaning.

Resetting the Filter Counter

Be sure to reset the Filter counter after cleaning or replacing the filters.

- Press the MENU button to display the On-Screen 1 Menu. Use the Point **I** buttons to move the red frame pointer to the Setting Menu icon.
- Use the Point ▲▼ buttons to move the red frame pointer to Filter counter and then press the SELECT Fix Youtton A dialog box appears showing the total accumulated time of the filter use, a timer setting option, and the reset option. Select Reset and the "Filter counter Reset?" appears. Select [Yes] to continue. ED SOURCE Another confirmation dialog box appears, select [Yes

to reset the Filter counter.

✓ Note:

• When reinserting these filters, be sure that the slit part is facing the outer side.

Lamp Replacement

When the projection lamp of the projector reaches its end of life, the Lamp replacement icon appears on the screen and LAMP REPLACE indicator lights yellow. Replace the lamp with a new one promptly. The timing when the LAMP REPLACE indicator should light is depending on the lamp mode.

WARNING: TURN OFF THE UV LAMP BEFORE OPENING THE LAMP COVER

Lamp replacement icon

Allow a projector to cool for at least 45 minutes before you open the Lamp cover. The inside of the projector can become very hot. For continued safety, replace with a lamp of the same type. Do not drop a lamp or touch a glass bulb! The glass can shatter and may cause injury.

Follow these steps to replace the lamp.

FixYourDLP.com

- Turn off the projector and unplug the AC power cord. Let the projector cool for at least 45 minutes.
- 2 Remove the screw with a screwdriver, and remove the lamp cover.
- **3** Remove the two (2) screws that secure the lamp. Lift the lamp out of the projector by using the handle.
- 4 Replace the lamp with a new one and secure the two(2) screws. Make sure that the lamp is set properly.Close the lamp cover.
- 5 Connect the AC power cord to the projector and turn on the projector.
- 6 Reset the lamp counter. See "Resetting the Lamp Counter" on the next page.

 ORDER REPLACEMENT LAMP

 Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

 HE TABLE SOURCE FOR MODEL SOURCE FOR PROJECTION LAMPS AND ACCESSORIES : LC-XB29N

 • Replacement Lamp Type No.

 • POA-LMP106 (Service Parts No. 610 332 3855)

Resetting the Lamp Counter

Be sure to reset the Lamp counter after the lamp is replaced. When the Lamp counter is reset, the LAMP REPLACE indicator stops lighting and the Lamp replacement icon disappears.

- Press the MENU button to display the On-Screen Menu. Use the Point ◀▶ buttons to move the red frame pointer to the Setting Menu icon.
- 2 Use the Point ▲▼ buttons to move the red frame pointer to Lamp counter and then press the SELECT button. A dialog box appears showing the total accumulated time of the lamp usage and the reset option. Select Reset and the "Lamp replacement counter Reset?" appears. Select [Yes] to continue.
- **3** Another confirmation dialog box appears, select [Yes] to reset the Lamp counter.

✔Note:

• Do not reset the Lamp counter without implementing lamp replacement. Be sure to reset the Lamp counter only after replacing the lamp.

LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard.

- Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.
- If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down.
 (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the LAMP REPLACE indicator lighted may increase the risk of lamp explosion.
- A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.

If a lamp explodes, disconnect the projector's AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.

Attaching the Lens Cover

When moving this projector or while not using it over an extended period of time, replace the lens cover.

Attach the lens cover according to the following procedures.

- **1** Pass the string through a hole of the lens cover.
- 2 Turn over the projector and remove the screw with a screwdriver.
- **3** Attach the string with lens cover to a hole at the bottom of the projector and secure it with a screw.

Cleaning the Projection Lens

Unplug the AC power cord before cleaning.

Gently wipe the projection lens with a cleaning cloth that contains a small amount of non-abrasive camera lens cleaner, or use a lens cleaning paper or commercially available air blower to clean the lens.

Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface of the lens.

Cleaning the Projector Cabinet

Unplug the AC power cord before cleaning.

Gently wipe the projector body with a soft dry cleaning cloth. When the cabinet is heavily soiled, use a small amount of mild detergent and finish with a soft dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface of the cabinet.

When the projector is not in use, put the projector in an ECTOR LAMPS appropriate carrying case to protect it from dust and scratches.

Indicators and Projector Condition

Check the indicators for projector condition.

Projector Condition a projector is off. (The AC power cord is unplugged.) b projector is in stand-by mode. Press the POWER ON-OFF ton to turn on the projector. b projector is operating normally. c temperature inside the projector is abnormally high. The jector cannot be turned on. When the projector is cooled down bugh and the temperature returns to normal, the POWER icator stops blinking and the projector can be turned on. (The ARNING indicator keeps blinking.) Check and clean the filter. b projector has been cooled down enough and the temperature uns to normal. When turning on the projector, the WARNING instance of the projector is projector is projector. b projector has been cooled down enough and the temperature uns to normal. When turning on the projector, the WARNING instance of the projector is projector.
e projector is in stand-by mode. Press the POWER ON-OFF ton to turn on the projector. e projector is operating normally. e temperature inside the projector is abnormally high. The jector cannot be turned on. When the projector is cooled down bugh and the temperature returns to normal, the POWER icator stops blinking and the projector can be turned on. (The ARNING indicator keeps blinking.) Check and clean the filter. e projector has been cooled down enough and the temperature urns to normal. When turning on the projector, the WARNING

urns to normal. When turning on the projector, the WARNING
icator stops blinking. Check and clean the air filter.
e projector is preparing for stand-by or the projection lamp is ng cooled down. The projector cannot be turned on until cooling completed and the POWER indicator stops blinking.
e projector detects an abnormal condition and cannot be turned Unplug the AC power cord and plug it again to turn on the jector. If the projector is turned off again, unplug the AC power d and contact the dealer or the service center for service and eckup. Do not leave the projector on. It may cause an electric ock or a fire hazard.
e projector is in the Power management mode.
e projector's Network or Memory viewer function is in an normal condition.

When the projection lamp reaches its end of life, the LAMP REPLACE indicator lights yellow. When this indicator lights yellow, replace the projection lamp with a new one promptly. Reset the lamp replacement counter after replacing the lamp. See pages 58-59.

Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.

-Make sure you have properly connected the projector to peripheral equipment as described on pages 17–19. -Make sure all equipment is connected to AC outlet and the power is turned on.

-When the projector does not project an image from the connected computer, restart the computer.

Problem:	– Solutions
No power	 Plug the power cord of the projector into the AC outlet. See if the POWER indicator lights red. Wait until the POWER indicator stops blinking to turn on the projector again. The projector can be turned on after the POWER indicator turns red. See page 21. Check the WARNING indicator. If the WARNING indicator lights red, projector cannot be turned on. See page 56. Check the projection lamp. See page 58. Unlock the Key lock function for the projector. See page 52.
Image is out of focus.	 Adjust focus of the projector. See page 25. Provide proper distance between the projector and the projection screen. See page 16. Check the projection lens to see if it needs cleaning. See page 60. Moving the projector from a cool to warm place may result in moisture condensation on the projection lens. In such cases, leave the projector off and wait until condensation evaporates.
No image	 Check the connection between your computer or video equipment and the projector. See pages 17-19. See if the input signal is correctly output from your computer. Some laptop computers may need to change the setting for monitor output when connecting to a projector. See your computer's instruction manual for the setting. It takes about 30 seconds to display an image after turning on the projector. See page 21. See if the selected system is corresponding with your computer or video equipment. See pages 30, 40. Select correct input source once again through menu operation. See pages 28-29, 38-39. Make sure the temperature is not out of the specified Operating Temperature (41°F–95°F [5°C–35°C]).
FixYourDLP.com Image is Left/Right reverse Image is Top/Bottom rever	

Some displays are not seen during the operation.	– Check the Display function. See page 46.
PIN code dialog box appears at start-up.	 – PIN code lock is being set. Enter a PIN code (the "1234" or number you have set). See pages 21, 52–53.
Computer 2 cannot be selected.	– Select Computer 2 at the Terminal function. (See page 49.)
The Terminal function cannot be selected.	 The Terminal function cannot be selected after Computer 2 is selected. Select other input source such as Computer 1 or Video with the INPUT button on the top control, the COMPUTER button or the VIDEO button on the remote control so that the Terminal function can be selected.
The Remote Control does not work.	 Check the batteries. Make sure no obstruction is between the projector and remote control. Make sure you are not too far from the projector when using the remote control. Maximum operating range is 16.4' (5 m). Make sure the code of the remote control is conformed to the projector's code. See page 51. Unlock the Key lock function for the remote control function. See page 52. Check RESET/ON/ALL-OFF switch on the remote control is set to "ON". See page 12.

WARNING : High voltages are used to operate this projector. Do not attempt to open the cabinet.

If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Specify the model number and explain about the problem. We will advise you how to obtain service.
