# Your Dell Projector

Your projector comes with all the items shown below. Ensure that you have all the items, and contact  $Dell^{TM}$  if anything is missing.

Discount-Merchant.com (800) 281-8860 THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

#### **About Your Projector**

1	Control panel
2	Zoom tab
3	Focus ring
4	Lens
5	IR receivers
6	Lens cap
7	Mounting holes for ceiling mount: Screw hole M3 x 4.6mm depth. Recommended torque <8 kgf-cm
8	Mounting hole for tripod: Insert nut 1/4"*20 UNC
9	Lamp cover
10	Tilt adjustment wheel

#### AUTION: Safety Instructions

1 Do not use the projector near appliances that generate a lot of heat.

**2** Do not use the projector in areas where there is an excessive amount of dust. The dust may cause the system to fail and the projector will automatically shutdown.

FixYous Phone that the projector is mounted in a well-ventilated area.

- 4 Do not block the ventilation slots and openings on the projector.
- 5 Ensure the projector operates between ambient temperatures (5°C to 35°C).
  6 Do not try to touch the ventilation outlet as it can become very hot after the

Do not try to touch the ventilation outlet as it can become very not after the projector has been turned on or immediately after it is turned off.

**7** Do not look into the lens while the projector is on as it may cause injury to your eyes.

**8** Do not place any objects near or in front of the projector or cover its lens while the projector is on as the heat may cause the object to melt or burn.

- Do not attempt to ceiling mount the projector yourself. It should be installed by a qualified technician.
- Recommended Projector Ceiling Mount Kit (P/N: C3505). For more information, see the Dell Support website at support.dell.com.
- For more information, see the Safety Information that shipped with your projector.

# I Power cord 2 Composite video cable

#### **Connecting a DVD Player Using a Composite Video Cable**

**NOTE:** The Composite Video cable is not shipped with your projector. You can purchase the Composite Video Extension (50 ft/100 ft) cable on the Dell website at **dell.com**.

#### **Connecting a DVD Player Using a Component Video Cable**

1	Power cord
2	VGA to Component Video cable

**NOTE:** The VGA to Component Video cable is not shipped with your projector. You can purchase the VGA to Component Video Extension (50 ft/100 ft) cable on the Dell website at **dell.com**.

# **Using Your Projector**

# **Turning Your Projector On**

- **NOTE:** Turn on the projector before you turn on the source (computer, DVD player, etc.). The **Power** button light blinks blue until pressed.
- 1 Remove the lens cap.
- **2** Connect the power cord and appropriate signal cables. For information about connecting the projector, see "Connecting Your Projector" on page 9.
- **3** Press the **Power** button (see "Using the Control Panel" on page 20 to locate the **Power** button).
- 4 Turn on your source (computer, DVD player, etc.)
- **5** Connect your source to the projector using the appropriate cable. See "Connecting Your Projector" on page 9 for instructions to connect your source to the projector.
- **6** By default, the input source of projector is set to VGA-A. Change the input source of projector if necessary.
- 7 If you have multiple sources connected to the projector, press the **Source** button on the remote control or control panel to select the desired source. See "Using the Control Panel" on page 20 and "Using the Remote Control" on page 22 to locate the **Source** button.

# **Turning Your Projector Off**

**NOTICE:** Unplug the projector after properly shutting down as explained in the following procedure.

FixYour Plessone Power button.

NOTE: The "Press Power Button to Turn off Projector" message will appear on the screen. The message disappears after 5 seconds or you can THE TRU press the Menu button to clear it.ECTOR LAMPS AND ACCESSORIES

**2** Press the **Power** button again. The cooling fans continue to operate for 120 seconds.

**3** To power off the projector quickly, press the Power button and hold for 1 second while the projector's cooling fans are still running.

**NOTE:** Before you turn on the projector again, wait for 60 seconds to allow the internal temperature to stabilize.

4 Disconnect the power cord from the electrical outlet and the projector.

# **Adjusting the Projected Image**

#### **Raising the Projector Height**

- **1** Raise the projector to the desired display angle and use the front tilt adjustment wheel to fine-tune the display angle.
- 2 Use two tilt adjustment wheels to fine-tune the display angle.

#### Lowering the Projector Height

**1** Lower the projector and use the front tilt adjustment wheel to fine-tune the display angle.

2 Tilt adjustment wheel

# **Adjusting the Projector Zoom and Focus**

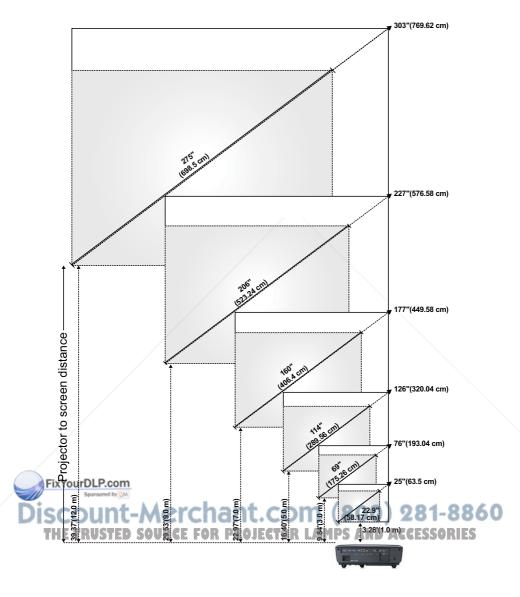

- CAUTION: To avoid damaging the projector, ensure that the zoom lens and elevator foot are fully retracted before moving the projector or placing the projector in its carrying case.
  - **1** Rotate the zoom tab to zoom in and out.
  - **2** Rotate the focus ring until the image is clear. The projector focuses at distances ranging between 3.28 ft to 39.37 ft (1 m to 12 m).

## **Operating Range With Remote Control**

**NOTE:** Actual operating range may slightly differ from the diagram. Weak batteries will also prevent the remote control from properly operating the

iscount-Merchant.com (800) 281-8860 THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

# Using the On-Screen Display

- The projector has a multi-language On-Screen Display (OSD) Menu that can be displayed with or without an input source.
- To select a submenu, press the 📈 button on your projector's control panel or remote control.
- To select an option, press the 🔊 or 💟 buttons on your projector's control panel or remote control. The color changes to dark blue. When an item is selected, the color changes to dark blue.
- Use the is or is buttons on the control panel or remote control to adjust the settings.
- To go back to Main Menu, go to Back tab and press the 📈 button on the control panel or the remote control.
- To exit the OSD, go to EXIT tab and press the Menu button directly on the control panel or the remote control.

#### Main Menu

#### AUTO-ADJUST

Auto Adjust automatically adjusts the projector's **Frequency** and **Tracking** in PC mode.

#### **INPUT SELECT**

The Input Select menu allows you to select your projector's input source.

Auto Source—Select Off (the default) to lock the current input signal. If you press the Source button when the Auto Source mode is set to Off, you can manually select the input signal. Select On to auto detect the available input signals. If you press the Source button when the projector is on, it automatically finds the next available input signal.

VGA-A—Press 📈 to detect VGA-A signal.

VGA-B—Press 🔽 to detect VGA-B signal.

S-VIDEO—Press vi to detect S-Video signal.

**COMPOSITE VIDEO**—Press *v* to detect Composite Video signal.

Advanced—Press 🔽 to activate Input Select Advanced menu.

#### INPUT SELECT ADVANCED

The Input Select Advanced menu allows you to enable or disable input sources.

**NOTE:** You cannot disable your current input source. At anytime, a minimum of two input sources have to be enabled.

#### **PICTURE (in PC Mode)**

Using the Picture menu, you can adjust the display settings of your projector. The Picture menu, provides the following options:

Back	✓	
Video Mode	Presentation Bright Movie sRGB	Custom
Brightness	*	50
Contrast		50
Advanced	T ✓	
Exit Menu	✓	

VIDEO MODE—Allows you to optimize the display image: Presentation, Bright, Movie, sRGB (provides more accurate color representation), and Custom (set your preferred settings).

**NOTE:** If you adjust the settings for **Brightness**, **Contrast**, **Saturation**, Sharpness, Tint, and Advanced the projector automatically switches to Custom.

**BRIGHTNESS**—Use  $\triangleleft$  and  $\triangleright$  to adjust the brightness of the image.

**CONTRAST**—Use  $\triangleleft$  and  $\geqslant$  to adjust the display contrast.

Advanced—Press vi to activate Picture Advance Menu. See "PICTURE ADVANCED" on page 30.

#### PICTURE (in Video Mode)

Using the Picture menu, you can adjust the display settings of your projectors. The Picture menu, provides the following options:

VIDEO MODE—Allows you to optimize the display image: Presentation, Bright,

Movie, sRGB (provides more accurate color representation), and Custom (set your preferred settings).

**NOTE:** If you adjust the settings for **Brightness, Contrast**, **Saturation**, Sharpness, Tint, and Advanced, the projector automatically switches to Custom.

**BRIGHTNESS**—Use  $\triangleleft$  and  $\triangleright$  to adjust the brightness of the image.

**CONTRAST**—Use  $\triangleleft$  and  $\geqslant$  to adjust the display contrast.

SATURATION—Allows you to adjust the video source from black and white to fully saturated color. Press  $\leq$  to decrease the amount of color in the image and > to increase the amount of color in the image.

**SHARPNESS**—Press  $\triangleleft$  to decrease the sharpness and  $\triangleright$  to increase the sharpness.

**TINT**—Press  $\triangleleft$  to increase the amount of green in the image and  $\triangleright$  to increase the amount of red in the image (available for NTSC only).

Advanced—Press v to activate Picture Advance Menu. See "PICTURE ADVANCED" below

**NOTE: Saturation**, Sharpness, and Tint are only available when input source is from Composite or S-Video.

#### PICTURE ADVANCED

Using the Picture Advanced menu, you can adjust the display settings of your projector. The Picture Advanced menu provides the following options:

WHITE INTENSITY—Use  $\triangleleft$  and  $\geqslant$  to adjust the display white intensity. 281-8860

COLOR TEMPS Allows you to adjust the color temperature. The screen appears SORIES cooler at higher color temperatures and warmer at lower color temperatures. When you adjust the values in the Color Adjust menu, the Custom mode is activated. The values are saved in the Custom mode.

**CUSTOM COLOR ADJUST**—Allows you to manually adjust the colors red, green, and blue.

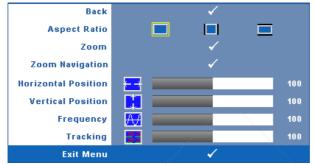

**COLOR SPACE**—Allows you to select the color space, options are: RGB, YCbCr, and YPbPr.

#### DISPLAY (in PC Mode)

Back ✓

THE

Using the **Display** menu, you can adjust the display settings of your projector. The Picture menu, provides the following options:

**ASPECT RATIO**—Allows you to select the aspect ratio to adjust how the image appears.

- Original Select Original to maintain the aspect ratio of image projected according to input source.
- 4:3 The input source scales to fit the screen and projects a 4:3 image.
- Wide The input source scales to fit the width of the screen to project a wide screen image.

**ZOOM**—Press **I** to activate **Zoom** menu.

Select the area to zoom and press  $\boxed{\mathbb{M}}$  to view zoomed image.

Adjust the image scale by pressing or and press to view. (800) 281-8860 D SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES ZOOM NAVIGATION—Press to activate Zoom Navigation menu. Use C D O V to navigate projection screen. **HORIZONTAL POSITION**—Press  $\leq$  to move the image to the left and  $\geq$  to move the image to the right.

**VERTICAL POSITION**—Press  $\leq$  to move the image down and  $\geq$  to move the image up.

**FREQUENCY**—Allows you to change the display data clock frequency to match the frequency of your computer graphics card. If you see a vertical flickering wave, use **Frequency** control to minimize the bars. This is a coarse adjustment.

**TRACKING**—Synchronize the phase of the display signal with the graphic card. If you experience an unstable or flickering image, use **Tracking** to correct it. This is a fine adjustment.

#### **DISPLAY** (in Video Mode)

Using the **Display** menu, you can adjust the display settings of your projector. The Picture menu, provides the following options:

**ASPECT RATIO**—Allows you to select the aspect ratio to adjust how the image appears.

- Original Select Original to maintain the aspect ratio of image projected according to input source.
- 🛄 4:3 The input source scales to fit the screen and projects a 4:3 image.
- Wide The input source scales to fit the width of the screen to project a wide screen image.

**ZOOM**—Press **V** to activate **Zoom** menu.

Select the area to zoom and press  $\boxed{}$  to view zoomed image. Adjust the image scale by pressing  $\boxed{}$  or  $\boxed{}$  and press  $\boxed{}$  to view.

 $_{\rm 5}$  press  $\mathbf{M}$  to view.

Adjust the image scale by pressing  $\langle \rangle$  or  $\rangle$  and

ZOOM NAVIGATION—Press of to activate Zoom Navigation menu.

Use  $\leq$   $\geq$   $\wedge$   $\vee$  to navigate projection screen.

#### LAMP

Using the Lamp menu, you can adjust the display settings of your projector. The Lamp menu provides the following options:

LAMP MODE—Allows you to select between Normal and ECO mode.

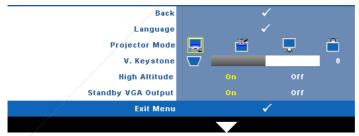

Normal mode operates at full power level. ECO Mode operates at a lower power level which may provide longer lamp life, quieter operation, and dimmer luminance output on the screen.

LAMP HOUR—Displays the operating hours since the last lamp timer reset.

LAMP HOUR RESET—Select Yes to reset the lamp timer.

#### **SET UP**

The Set Up menu allows you to adjust settings for Language, Projector Mode, Keystone, High Altitude, and Standby VGA Output.

**LANGUAGE**—Allows you to set the language for the OSD. Press via to activate the Language menu.

**PROJECTOR MODE**—Allows you to select the projector mode, depending upon how the projector is mounted.

- Front Projection-Desktop This is the default option.
- Front Projection-Ceiling Mount The projector turns the image upside down for ceiling-mounted projection.
- Rear Projection-Desktop The projector reverses the image so that you can project from behind a translucent screen.
- Rear Projection-Ceiling Mount The projector reverses and turns the image upside down. You can project from behind a translucent screen with a ceiling-mounted projection.

FixYd. KEYSTONEn-Manually adjust the vertical image distortion caused by tilting the projector.

HIGH ALTITUDE—Select On to turn on high altitude mode. Operates the fans at full 60 speed continuously to allow for proper high altitude cooling of the projector.
 STANDBY VGA OUTPUT—Select On or Off the VGA output function at projector standby status. Default is Off.

#### INFORMATION

The Information menu displays the current projector settings.

Back	✓

PPID	CN-050KV6-S0081-46B-0208		
Exit Menu			

#### OTHERS

The Others menu allows you to change settings for Menu, Audio, Power, and Security. You can also perform Test Pattern and Factory Reset.

**MENU SETTINGS**—Select and press *i* to activate menu settings. The menu settings consists of the following options:

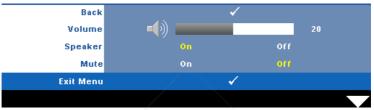

**MENU POSITION**—Allows you to change the position of the OSD menu on the screen.

**MENU TRANSPARENCY**—Select to change the transparency level of the OSD background.

**MENU TIMEOUT**—Allows you to adjust the time for an OSD timeout. By default, the OSD disappears after 20 seconds of non-activity.

**MENU LOCK**—Select **On** to enable Menu Lock and hide the OSD menu. Select **OFF** to disable the Menu Lock. If you want to disable the Menu Lock function and have the OSD disappear, press the **Menu** button on the control panel or remote control for 15 seconds, then disable the function.

**AUDIO SETTINGS**—Select and press in to change audio settings. The audio settings menu consists of the following options:

**VOLUME**—Press  $\leq$  to decrease the volume and  $\geq$  to increase the volume.

SPEAKER-Select On to enable speaker. Select Off to disable speaker.

**MUTE**—Allows you to mute the sounds for audio input and audio output.

**POWER SETTINGS**—Select and press in to activate power settings. The power settings menu consists of the following options:

Back			<ul> <li>Image: A second s</li></ul>		
Power Saving	Off	30min	60min	90min	120min
Quick Shutdown		Yes		No	
Exit Menu			× -		

**POWER SAVING**—Select Off to disable Power Saving mode. By default, the projector is set to enter power saving mode after 120 minutes of no activity. A warning message appears on screen showing a 60-second countdown **FixYourDLP Series** switching to power saving mode. Press any key buttons during countdown period to stop power saving mode.

You can also set a different delay period to enter power saving mode. The **THE TRUS** delay period is the time you want the projector to wait without an input S signal. Power saving can be set to 30, 60, 90, or 120 minutes.

If an input signal is not detected during the delay period, the projector turns off the lamp and goes into power saving mode. If an input signal is detected within the delay period, the projector automatically turns on. If an input signal is not detected within two hours during power saving mode, the projector switches from Power Saving mode to Power Off mode. To turn on the projector press the Power button.

**QUICK SHUTDOWN**—Select **Yes** to turn off the projector with a single press of the **Power** button. This function allows the projector to quick power off with an accelerated fan speed. Slightly higher acoustic noise is expected during quick power off.

**NOTE:** Before you turn on the projector again, wait for 60 seconds to allow the internal temperature to stabilize. The projector will take a longer time to turn on if you try to power on immediately. Its cooling fan will run at full speed for about 30 seconds to stabilize the internal temperature.

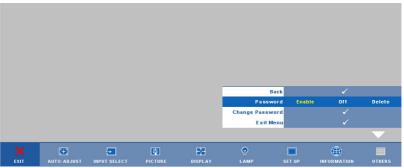

**SECURITY SETTINGS**—Select and press is to activate security settings. The security settings menu allows you to enable and set password protection.

Back		× .	
Password	Enable	no	Delete
Change Password		✓	
Exit Menu		<ul> <li>Image: A second s</li></ul>	

**PASSWORD**—When Password Protect is enabled, a Password Protect screen requesting you to enter a password will be displayed when the power plug is inserted into the electrical outlet and the power for the projector is first turned on. By default, this function is disabled. You can enable this feature, by selecting **Enabled**. If the password has been set before, key in the password first and select the function. This password security feature will be activated the next time you turn on the projector. If you enable this feature, you will be asked to enter the projector's password after you turn on the projector:

1 First time password input request:

Discount-Merchant.com (800) 281-8860 THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES **a** Go to **Others** menu, press i and then select **Password** to **Enable** the password setting.

**b** Enabling the Password function will pop up a character screen, key in a 4-digit number from the screen and press 1.

### **Troubleshooting Your Projector**

If you experience problems with your projector, see the following troubleshooting tips. If the problem persists, contact Dell<sup>™</sup> (see Contacting Dell<sup>™</sup> on page 53).

#### Problem

FixYourDLP.com

No image appears on the screen

#### **Possible Solution**

- Ensure that the lens cap is removed and the projector is turned on.
- Ensure that the INPUT SELECT is set correctly in the OSD menu.
- Ensure the external graphics port is enabled. If you are using a Dell<sup>™</sup> portable computer, press m (Fn+F8). For other computers, see your respective documentation. The output signal from the computer is not according to industry standards. Should this happen, upgrade the video driver of the computer. For Dell computer, see support.dell.com.
- Ensure that all the cables are securely connected. See "Connecting Your Projector" on page 9.
- Ensure that the pins of the connectors are not bent or broken.
- Ensure that the lamp is securely installed (see "Changing the Lamp" on page 47).
- Use Test Pattern in the Others menu. Ensure that the colors of the test pattern are

 Cannot switch to particular Input Source.
 For Go to Advanced Enable/Disable Sources, SSORIES

 ensure that particular Input Source is set to Enable.

correct.

	Problem (continued)	Possible Solution (continued)				
	Partial, scrolling, or incorrectly displayed image	<b>1</b> Press the Auto Adjust button on the remote control or the control panel.				
		2 If you are using a Dell <sup>™</sup> portable computer, set the resolution of the computer to XGA (1024 x 768):				
		a Right-click the unused portion of your Microsoft <sup>®</sup> Windows <sup>®</sup> desktop, click <b>Properties</b> and then select <b>Settings</b> tab.				
		<ul> <li>b Verify that the setting is 1024 x 768 pixels for the external monitor port.</li> <li>c Press  </li> <li>c Press (Fn +F8).</li> </ul>				
		If you experience difficulty in changing resolutions or your monitor freezes, restart all the equipment and the projector.				
		If you are not using a Dell <sup>™</sup> portable computer, see your computer's documentation. The output signal from the computer may not be according to industry standards. Should this happen, upgrade the video driver of the computer. For a Dell computer, see <b>support.dell.com</b> .

### **Changing the Lamp**

### CAUTION: Before you begin any of the procedures in this section, follow the Safety Instructions as described on page 7.

Replace the lamp when the message "Lamp is approaching the end of its useful life in the operation. Replacement suggested! www.dell.com/lamps" appears on the screen. If this problem persists after replacing the lamp, contact Dell<sup>™</sup>. For more information, see Contacting Dell<sup>™</sup> on page 53.

#### CAUTION:

- Use an original lamp to ensure safe and optimal working condition of your projector.
- The lamp becomes very hot when in use. Do not attempt to replace the lamp until the projector has been allowed to cool down for at least 30 minutes.
- Do not touch the bulb or the lamp glass at any time. Projector lamps are very fragile and may shatter if touched. The shattered glass pieces are sharp and can cause injury.
- If the lamp shatters, remove all broken pieces from the projector and dispose or recycle according to state, local, or federal law. For more information see www.dell.com/hg.
- 1 Turn off the projector and disconnect the power cord.
- 2 Let the projector cool for at least 30 minutes.
- **3** Loosen the two screws that secure the lamp cover, and remove the cover.
- **4** Loosen the two screws that secure the lamp.
- 5 Pull the lamp up by its metal handle.

6 Replace with the new lamp. 7 Tighten the two screws that

lamp.

NOTE: Dell<sup>™</sup> may require lamps replaced under warranty to be returned to Dell<sup>™</sup>. Otherwise, contact your local waste disposal agency for the address of the nearest deposit site.

8 Replace the lamp cover and tighten the two screws.

AMPS

**9** Reset the lamp usage time by selecting "Yes" for Lamp Reset in the OSD Lamp tab (see Lamp menu on page 34). When a new lamp module has been changed, the projector will automatically detect and reset the lamp hours.

CAUTION: Lamp Disposal (for the US only) (B) LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE OR FEDERAL LAWS. FOR MORE INFORMATION, GO TO WWW.DELL.COM/HG OR CONTACT THE ELECTRONIC INDUSTRIES ALLIANCE AT WWW.EIAE.ORG. FOR LAMP SPECIFIC DISPOSAL INFORMATION CHECK WWW.LAMPRECYCLE.ORG.

**NOTE:** The lamp life rating for any projector is a measure of brightness degradation only, and is not a specification for the time it takes a lamp to fail and cease light output. Lamp life is defined as the time it takes for more than 50 percent of a lamp sample population to have brightness decrease by approximately 50 percent of the rated lumens for the specified lamp. The lamp life rating is not guaranteed in any way. The actual operating life span of a projector lamp will vary according to operating conditions and usage patterns. Usage of a projector in stressful conditions which may include dusty environments, under high temperatures, many hours per day and abrupt powering-off will most likely result in a lamp's shortened operating life span or possible lamp failure.

## **Contacting Dell**

For customers in the United States, call 800-WWW-DELL (800-999-3355).

**NOTE:** If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell<sup>™</sup> provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

- Visit support.dell.com. 1
- Verify your country or region in the Choose A Country/Region drop-2 down menu at the bottom of the page.
- Click Contact Us on the left side of the page. 3
- Select the appropriate service or support link based on your need. 4
- Choose the method of contacting Dell that is convenient for you. 5

## **Appendix: Glossary**

**ANSI LUMENS** — A standard for measuring the brightness. It is calculated by dividing a square meter image into nine equal rectangles, measuring the lux (or brightness) reading at the center of each rectangle, and averaging these nine points.

**ASPECT RATIO** — The most popular aspect ratio is 4:3 (4 by 3). Early television and computer video formats are in a 4:3 aspect ratio, which means that the width of the image is 4/3 times the height.

**Brightness** — The amount of light emitted from a display or projection display or projection device. The brightness of projector is measured by ANSI lumens.

**Color Temperature** — The color appearance of white light. Low color temperature implies warmer (more yellow/red) light while high color temperature implies a colder (more blue) light. The standard unit for color temperature is Kelvin (K).

**Component Video** — A method of delivering quality video in a format that consists of the luminance signal and two separate chrominance signals and are defined as Y'Pb'Pr' for analog component and Y'Cb'Cr' for digital component. Component video is available on DVD players.

**Composite Video** — A video signal that combines the luma (brightness), chroma (color), burst (color reference), and sync (horizontal and vertical synchronizing signals) into a signal waveform carried on a single wire pair. There are three kind of formats, namely, NTSC, PAL and SECAM.

**Compressed Resolution** — If the input images are of higher resolution than the native resolution of the projector, the resulting image will be scaled to fit the native resolution of the projector. The nature of compression in a digital device means that some image content is lost.

**Contrast Ratio** — Range of light and dark values in a picture, or the ratio between their maximum and minimum values. There are two methods used by the projection industry to measure the ratio:

**1** *Full On/Off* — measures the ratio of the light output of an all white image (full on) and the light output of an all black (full off) image.

2 ANSI — measures a pattern of 16 alternating black and white rectangles. The average light output from the white rectangles is divided by the average light output of the black rectangles to determine the ANSI contrast ratio. ACCESSORIES

*Full On/Off* contrast is always a larger number than ANSI contrast for the same projector.

**dB** — decibel — A unit used to express relative difference in power or intensity, usually between two acoustic or electric signals, equal to ten times the common logarithm of the ratio of the two levels.

**Diagonal Screen** — A method of measuring the size of a screen or a projected image. It measures from one corner to the opposite corner. A 9FT high, 12FT wide, screen has a diagonal of 15FT. This document assumes that the diagonal dimensions are for the traditional 4:3 ratio of a computer image as per the example above.

**DLP<sup>®</sup>** — Digital Light Processing<sup>™</sup> — Reflective display technology developed by Texas Instruments, using small manipulated mirrors. Light passes through a color filter is sent to the DLP mirrors which arrange the RGB colors into a picture projected onto screen, also known as DMD.

**DMD** — Digital Micro-Mirror Device — Each DMD consists of thousands of tilting, microscopic aluminum alloy mirrors mounted on a hidden yoke.

Focal Length — The distance from the surface of a lens to its focal point.

**Frequency** — It is the rate of repetition in cycles per seconds of electrical signals. Measured in Hz (Hertz).

Hz (Hertz) — Unit of frequency.

**Keystone Correction** — Device that will correct an image of the distortion (usually a wide-top narrow-bottom effect) of a projected image caused by improper projector to screen angle.

**Maximum Distance** — The distance from a screen the projector can be to cast an image that is usable (bright enough) in a fully darkened room.

**Maximum Image Size** — The largest image a projector can throw in a darkened room. This is usually limited by focal range of the optics.

**Minimum Distance** — The closest position that a projector can focus an image onto a screen.

**NTSC** — National Television Standards Committee. North American standard for video and broadcasting, with a video format of 525 lines at 30 frames per second.

**PAL** — Phase Alternating Line. A European broadcast standard for video and **Fixture**, with a video format of 625 lines at 25 frames per second.

**Reverse Image** — Feature that allows you to flip the image horizontally. When used in a normal forward projection environment text, graphics, etc. are backwards. Reverse image is used for rear projection. **PS AND ACCESSORIES** 

**RGB** — Red, Green, Blue — typically used to describe a monitor that requires separate signals for each of the three colors.

S-Video — A video transmission standard that uses a 4-pin mini-DIN connector

to send video information on two signal wires called luminance (brightness, Y) and chrominance (color, C). S-Video is also referred to as Y/C.

**SECAM** — A French and international broadcast standard for video and broadcasting, closely related to PAL but with a different method of sending color information.

**SSID** — Service Set Identifiers — A name used to identify the particular wireless LAN to which a user wants to connect.

SVGA — Super Video Graphics Array — 800 x 600 pixels count.

SXGA — Super Extended Graphics Array, — 1280 x 1024 pixels count.

UXGA — Ultra Extended Graphics Array — 1600 x 1200 pixels count.

VGA — Video Graphics Array — 640 x 480 pixels count.

XGA — Extended Video Graphics Array — 1024 x 768 pixels count.

**Zoom Lens** — Lens with a variable focal length that allows operator to move the view in or out making the image smaller or larger.

**Zoom Lens Ratio** — Is the ratio between the smallest and largest image a lens can projector from a fixed distance. For example, a 1.4:1 zoom lens ratio means that a 10 foot image without zoom would be a 14 foot image with full zoom.
