THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

◆ Compact Design

This projector is designed compact in size and weight. It is easy to carry and work anywhere you wish to use.

◆ Compatibility

The projector widely accepts various video and computer input signals including: Computers, 6 Color systems (PAL, SECAM, NTSC, NTSC4.43, PAL-M, and PAL-N), Component video, S-Video and RGB scart.

◆ Simple Computer System Setting

The projector has the Multi-scan system to conform to almost all computer output signals quickly. (p.26)

◆ Digital Zoom (for Computer)

The digital zoom function expands (to approx. 16 times of the screen size) the image size, allowing you to focus on crucial information during the presentation. (p.33)

◆ Blackboard Function

Blackboard* can be used as a projection screen.

*The board color is limited to Green. (p.30, 37)

◆ Quick Termination

The AC power cord can be unplugged immediately after turning off the projector without waiting for the termination of the cooling fan rotation.

◆ Multilanguage Menu Display

Operation menu is available in 16 languages: English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Chinese, Korean, and Japanese. (p.41)

◆ Logo Function

The Logo function allows you to customize the screen logo with the Logo functions. (p.42-44) You can capture an image for the screen logo, choose a logo between provided and captured.

◆ Switchable Interface Terminal

The projector provides a switchable interface terminal. You can use the terminal as computer input or monitor output conveniently. (p.45)

◆ Power Management

The Power management function reduces power consumption and maintains the lamp life. (p.46)

◆ Lamp Control

Brightness of the projection lamp can be selected. (p.47)

◆ Security Function

The Security function helps you to ensure the security with the PIN code lock (p.18, 48, 49) function. You can lock the operation on the remote control. Also you can prevent unauthorized persons from using the projector.

◆ Input Search Function

Input signal can be searched automatically. (p.45)

Trademarks
Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation.

Before operating this projector, read this manual thoroughly and operate the projector properly.
This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time.
Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.
If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section on pages 56-58 of this manual. If the problem still persists, contact the dealer where you purchased the projector or the service center.

CAUTION

RISK OF ELECTRIC SHOCK DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.

THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT.

NOTE: This symbol and recycle system are applied to EU countries only and not applied to the countries in the other area of the world.

Your EIKI product is designed and manufactured with high quality materials and components which can be recycled and reused.

This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

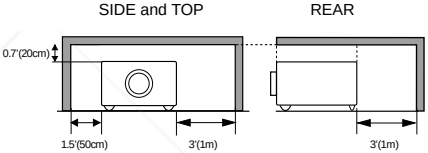

Please dispose of this equipment at your local community waste collection/recycling centre. In the European Union there are separate collection systems for used electrical and electronic products.

Please help us to conserve the environment we live in!

Safety Precaution

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

– This projector produces intense light from the projection lens. Do not stare directly into the lens,otherwise eye damage could result. Be especially careful that children do not stare directly into the beam.
– Install the projector in a proper position. If not, it may result in a fire hazard.
– Allowing the proper amount of space on the top, sides, and rear of the projector is critical for proper air circulation and cooling of the unit. The dimensions shown here indicate the minimum space required. If the projector is to be built into a compartment or similarly enclosed, these minimum distances must be maintained.
– Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.

– If the projector is not to be used for an extended time, unplug the projector from the power outlet.

CAUTION

DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER. IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED.

CAUTION

Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/ Data Processing Equipment, ANSI/NFPA 75.

Ne peut être utilisé dans une salle d'ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment.

READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE.

FixYourDLP
Discount-Merchant.com
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

Safety Instructions

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not install the projector near the ventilation duct of air-conditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Discount-Merchant.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

Air Circulation

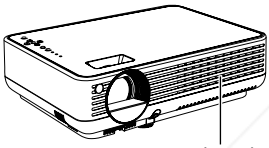

Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered.

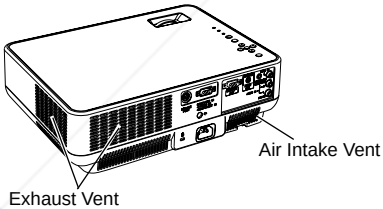

CAUTION

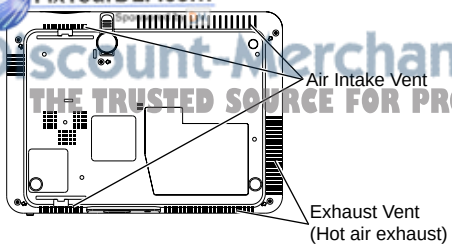

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.

– Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.
– Keep the exhaust vent at least 3' (1 m) away from any objects.
– Do not touch a peripheral part of the exhaust vent, especially screws and metallic part. This area will become hot while the projector is being used.
– Do not put anything on the cabinet. Objects put on the cabinet will not only get damaged but also cause fire hazard by heat.

Cooling fans are provided to cool down the projector. The fans' running speed is changed according to the temperature inside the projector.

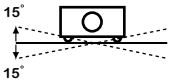

Installing the Projector in Proper Position

Install the projector properly. Improper Installation may reduce the lamp life and cause a fire hazard.

Do not tilt the projector more than 15 degrees from side to side.

Do not point the projector up to project an image.

Do not point the projector down to project an image.

Do not put the projector on either side to project an image.

Moving the Projector

When moving the projector, replace the lens cover and retract the adjustable foot to prevent damage to the lens and cabinet. When the projector is not in use for an extended period, put it into a suitable case to protect the projector.
When handling the projector, do not drop, bump, subject it to strong forces, or put other things on the cabinet.

USE CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR

– Do not drop or bump the projector, otherwise damages or malfunctions may result.
– When carrying the projector, use a suitable carrying case.
– Do not transport the projector by using a courier or transport service in an unsuitable transport case. This may cause damage to the projector. To transport the projector through a courier or transport service, consult your dealer for their information.
– Do not put the projector in a case before the projector is cooled enough.

Federal Communications Commission Notice

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Model Number : LC-XB21B
Trade Name : EIKI
Responsible party : EIKI International, Inc.

AC Power Cord Requirement

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).

AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

AC Power Cord for the United Kingdom:

This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus ⌲. If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions.

If the plug supplied is not suitable for your socket outlet, it should be cut off and destroyed.

The end of the flexible cord should be suitably prepared and the correct plug fitted.

WARNING : A PLUG WITH BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET.

The Wires in this mains lead are coloured in accordance with the following code:

Green-and-yellow . . . . . Earth
Blue . . . . . Neutral
Brown . . . . . Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ⏚ or coloured green or green-and-yellow.

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.

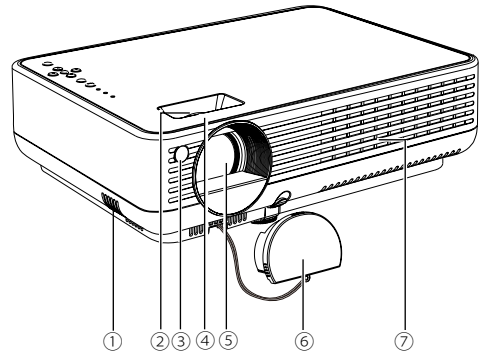

The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

WARNING: THIS APPARATUS MUST BE EARTHED.

Remote Control Battery Installation

1 Open the battery compartment lid.

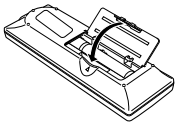

2 Install new batteries into the compartment.

Two AA size batteries
For correct polarity (+ and –), be sure battery terminals are in contact with pins in the compartment.

3 Replace the compartment lid.

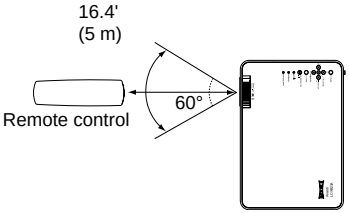

To ensure safe operation, please observe the following precautions:

- Use two (2) AA or LR6 type alkaline batteries.
- Always replace batteries in sets.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the remote control to moisture or heat.
- Do not drop the remote control.
- If the battery has leaked on the remote control, carefully wipe the case clean and install new batteries.
- Risk of explosion if a battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.

Operating Range

Point the remote control toward the projector (Infrared Remote Receiver) when pressing any button. Maximum operating range for the remote control is about 16.4' (5 m) and 60° in front of the projector.

Positioning the Projector

For projector positioning, see the figures below. The projector should be set horizontally to the flat screen.

✓ **Note:**

- The brightness in the room has a great influence on picture quality. It is recommended to limit ambient lighting in order to obtain the best image.
- The values shown below are approximate and may vary from the actual sizes.

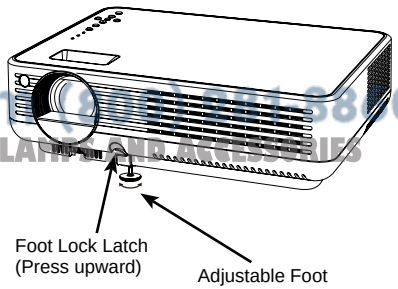

Screen Size (W x H) mm 4 : 3 aspect ratio	40"	100"	150"	200"	300"
	813 x 610	2032 x 1524	3048 x 2286	4064 x 3048	6096 x 4572
Zoom (min)	5.6' (1.7m)	14.3' (4.4m)	21.6' (6.6m)	28.8' (8.8m)	43.3' (13.2m)
Zoom (max)	4.7' (1.4m)	11.9' (3.6m)	17.9' (5.5m)	23.9' (7.3m)	35.9' (11.0m)

Adjustable Foot

Projection angle can be adjusted up to 10.0 degrees with the adjustable foot.

Press the Foot Lock Latch upward to release the adjustable foot. At the desirable angle, release the latch to lock the adjustable foot. Rotate the adjustable foot from side to side for fine adjust.

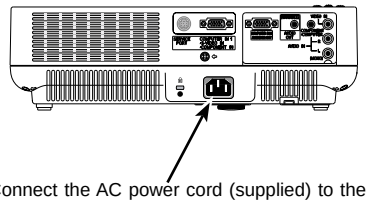

To correct Keystone distortion, press the KEYSTONE button on the remote control or select Keystone from the menu. (p.22, 41)

Connecting the AC Power Cord

This projector uses nominal input voltages of 100-120 V or 200-240 V AC and it automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system.
If you are not sure of the type of power being supplied, consult your authorized dealer or service station.
Connect the projector with all peripheral equipment before turning the projector on. (See pages 15-17 for connection.)

Connect the AC power cord (supplied) to the projector.

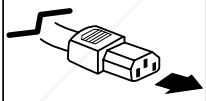

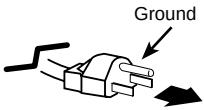

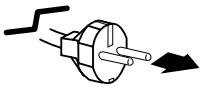

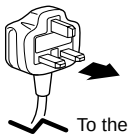

CAUTION

The AC outlet must be near this equipment and must be easily accessible.

✓**Note:** Unplug the AC power cord when the projector is not in use. When this projector is connected to an outlet with the AC power cord, it is in Stand-by mode and consumes a little electric power.

NOTE ON THE POWER CORD

AC power cord must meet requirements of the country where you use the projector.
Confirm the AC plug type with the chart below and proper AC power cord must be used.
If supplied AC power cord does not match your AC outlet, contact your sales dealer.

Projector side	AC outlet side		
	For the U.S.A. and Canada	For Continental Europe	For the U.K.
 To power cord connector on your projector.	 Ground To the AC outlet. **(120 V AC)**	 To the AC outlet. **(200 - 240 V AC)**	 To the AC outlet. **(200 - 240 V AC)**

⚠ Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.

Turning On the Projector

1. Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.
2. Connect the projector's AC power cord into an AC outlet. The POWER indicator becomes red. Remove the lens cover.
3. Press the POWER ON/STAND-BY button on the top control or on the remote control. The POWER indicator becomes green and the cooling fans start to operate. The preparation display appears on the screen and the count down starts.
4. After the countdown, the input source that was selected the last time and the Lamp mode status icon (see page 47) appears on the screen.

   If the projector is locked with a PIN code, PIN code Input Dialog Box appears. Enter the PIN code as instructed below.

To Enter a PIN code

Select a number by pressing the Point ▲▼ buttons, and then press the Point ► button to fix the number and move the pointer. The number changes to "✳". If you fixed an incorrect number, move the pointer to the number you want to correct by pressing the Point ◄ button, and then select the correct number by pressing the Point ▲▼ buttons.

Repeat this step to complete entering a four-digit number.
"1234" is set as the initial PIN code at the factory.

After entering the four-digit number, move the pointer to "Set" by pressing the Point ► button. Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect PIN code, "PIN code" and the number (✳✳✳✳) turns red. Enter the PIN code all over again.

What is PIN code?

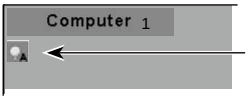

PIN (Personal Identification Number) code that allows e person who knows it to operate the projector. etting a PIN code prevents unauthorized use of the projector.

A PIN code consists of a four-digit number. Refer to the PIN code lock function in the Setting on pages 48 and 49 for locking operation of the projector with your PIN code.

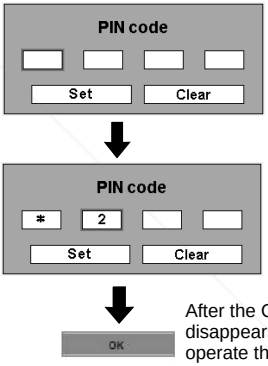

The preparation display disappears after 30 seconds.

Selected Input Source and Lamp Mode

(See page 47 for Lamp mode.)

PIN Code Input Dialog Box

After the OK icon disappears, you can operate the projector.

✓ **Note:**

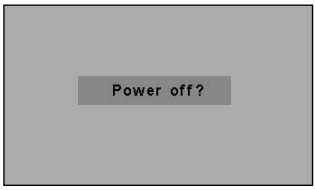

- When the Input Search function is set on On1 or On2, the input signal will be searched automatically (p.45)
- When the Logo select function is off, the logo is not shown on the screen. (p.42)
- When the "Countdown off" or "Off" is selected in the Display function, the countdown is not shown on the screen. (p.42)
- During the countdown period, all operations are invalid.
- If the PIN code number is not input for three minutes after the PIN code dialog box appeared, the projector is turned off automatically.

CAUTION ON HANDLING PIN CODE
If you forget your PIN code, the projector can no longer be started. Set a new PIN code with special care, write it down in column on page 66 of this manual, and keep it at hand. Should the PIN code be missing or forgotten, consult your dealer or service center.

NEW, REPLACEMENT LAMPS FOR PROJECTOR LAMPS AND ACCESSORIES

Turning Off the Projector

1 Press the POWER ON/STAND-BY button on the top control or on the remote control, and a message "Power off?" appears on the screen.

The message disappears after 4 seconds.

2 Press the POWER ON/STAND-BY button again to turn off the projector. The POWER indicator starts to blink red, and the cooling fans keep running. (You can select the level of fan quietness and rotation speed. See page 50.)
At this time you can disconnect the AC power cord even if the fans are still running.

3 When the projector has cooled down enough to be turned on again, the POWER indicator lights red.

⚠ TO MAINTAIN THE LIFE OF THE LAMP, ONCE YOU TURN THE PROJECTOR ON, WAIT AT LEAST FIVE MINUTES BEFORE TURNING IT OFF.

⚠ DO NOT OPERATE THE PROJECTOR CONTINUOUSLY WITHOUT REST. CONTINUOUS USE MAY RESULT IN SHORTENING THE LAMP LIFE. TURN OFF THE PROJECTOR AND LET STAND FOR ABOUT AN HOUR IN EVERY 24 HOURS.

✓ **Note:**

- When the On start function is on, this projector is turned on automatically by connecting the AC power cord to an AC outlet. (p.47)
- The running speed of cooling fans is changed according to the temperature inside the projector.
- Do not put the projector in a case before the projector is cooled enough.
- If the WARNING indicator blinks or emits a red light, see "Warning Indicator" on page 51.
- While the POWER indicator is blinking, lamp is being cooled down and the projector cannot be turned on. Wait until the POWER indicator stops blinking to be turned on again.
- The fan rotation will terminate directly if the AC power cord is unplugged immediately after the projector is turned off.
- The projector can be turned on after the POWER indicator turns red. The waiting time to restart will be shortened when the normal power-off processing for fan cooling is completed, compared with the time the AC power cord is immediately unplugged after the power-off.

THE ULTIMATE SOURCE FOR PROJECTOR LAMPS & ACCESSORIES

Computer System Selection

This projector automatically tunes to various types of computers based on VGA, SVGA, XGA, SXGA, WXGA, or UXGA with its Multi-scan system and Auto PC Adjustment. If Computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional setting. (Signal formats provided in this projector is shown on page 62.)

One of the following messages may appear when:

Auto The projector cannot recognize the connected signal conforming to the provided PC Systems. The message "Auto" is displayed on the PC System Menu icon and the Auto PC Adjustment function works to display proper images. If the image is not projected properly, a manual adjustment is required. (p.28, 29)

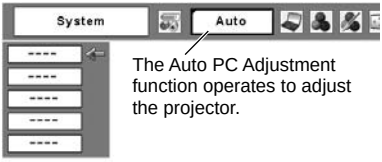

---- There is no signal input from computer. Check the connection between your computer and the projector. (See "Troubleshooting" on page 56.)

Mode 1 The preset system is manually adjusted in the PC Adjust Menu. The adjusted data can be stored in Mode 1 ~ 5. (p.28, 29)

SVGA 1 PC Systems provided in this projector is chosen. The projector chooses a proper system provided in the projector and displays it.

*Mode 1 and SVGA 1 are examples.

Image Level Adjustment

1 Press the MENU button to display the On-Screen Menu. Press the Point ◄► buttons to move the red framed pointer to the Image Adjust Menu icon.

2 Press the Point ▲▼ buttons to move the red framed pointer to the item that you want to adjust, and then press the SELECT button. The level of each item is displayed. Adjust each level by pressing the Point ◄►buttons.

Image Adjust Menu

Contrast

Press the Point ◄ button to decrease the contrast and the Point ► button to increase contrast. (From 0 to 63.)

Brightness

Press the Point ◄ button to adjust the image darker and the Point ► button to adjust the image brighter. (From 0 to 63.)

Color

Press the Point ◄ button to lighten the color and the Point ► button to deepen the color. (From 0 to 63.)

Tint

Press the Point ◄► buttons to obtain a proper color. (From 0 to 63.)

Color temp.

Press the Point ◄► buttons to select the desired Color temp. level. (XLow, Low, Mid, or High)

White balance (Red)

Press the Point ◄ button to lighten the red tone and the Point ► button to deepen the red tone.
(From 0 to 63.)

White balance (Green)

Press the Point ◄ button to lighten the green tone and the Point ► button to deepen the green tone.
(From 0 to 63.)

White balance (Blue)

Press the Point ◄ button to lighten the blue tone and the Point ► button to deepen the blue tone.
(From 0 to 63.)

✓ **Note:**
- The Tint cannot be selected when the video system is PAL, SECAM, PAL-M, or PAL-N.
- After adjusting any of the White balance Red, Green, or Blue, the Color temp. changes to "Adj.".

Sharpness

Press the Point ◄ button to soften the image and the Point ► button to sharpen the image. (From 0 to 15.)

Gamma

Press the Point ◄► buttons to adjust the gamma value to obtain better balance of contrast. (From 0 to 15.)

Noise reduction

Noise interference on the screen can be reduced. Select one of the following to get smoother images.

Off . . . . disabled.
L1. . . . . lower reduction
L2. . . . . higher reduction

Progressive

Interlaced video signal can be displayed in a progressive picture. Select one of the following.

Off . . . . disabled.
L1. . . . . Select "L1" for an active picture.
L2. . . . . Select "L2" for a still picture.
Film . . . Select "Film" for watching a film. With this function, the projector reproduces pictures faithful to the original film quality.

Reset

To reset the adjusted data, select Reset and press the SELECT button. The confirmation box appears and then select [Yes]. All adjustments returns to their previous figures.

Store

To store the adjusted data, select Store and press the SELECT button. Select a level from Image 1 to 4 with the Point ▲▼ buttons and press the SELECT button. A confirmation box appears and then select [Yes].
Stored data can be called up by selecting "Image" in the Image Level Selection on page 37.

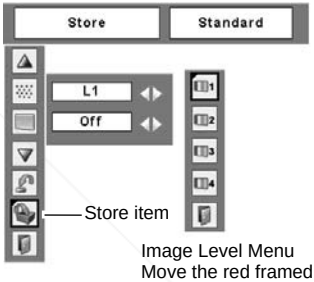

Image Level Menu
Move the red framed pointer to an image item to be set and then press the SELECT button.

The confirmation box appears and then select [Yes].

Display

Press the Point ◄► buttons to switch On/Off. This function decides to display On-Screen Displays.

On. . . . . Show all the On-Screen Displays. Use this function when you want to project images after the lamp becomes bright enough. Factory default setting is this mode.

Countdown off . . . Show the input image instead of the countdown when turning on the projector. Use this function when you want to project the image as early as possible even when the lamp is not bright enough.

Off. . . . . Do not show On-Screen Displays, except.

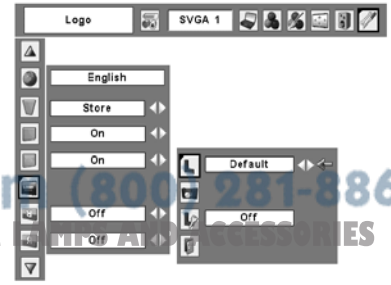

- On-Screen Menu
- "Power off?" message (p.19)
- P-Timer
- "No signal" message for Power management item (p.46)
- "Please wait..." message
- Arrows for panning mode (p.32)

Logo (Logo and Logo PIN code lock settings)

This function allows you to customize the screen logo with Logo select, Capture, and Logo PIN code lock functions.

✓ **Note:**
When On is selected in Logo PIN code lock function, Logo select and Capture functions cannot be selected.

Logo select

Logo select

This function decides the start-up display as follows:

User. . . . the image you captured
Default. . . the factory-set logo
Off . . . . . countdown only

Discount Projector Lamp.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

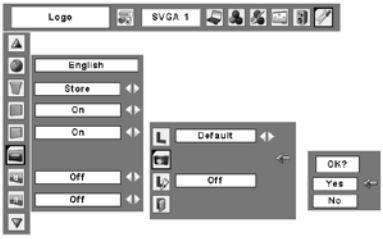

Capture

This function enables you to capture the image being projected and use it for a start-up display or interval of presentations.
After capturing the projected image, go to the Logo select function and set it to "User". Then the captured image is displayed when turning on the projector next time or pressing the NO SHOW button. (p.24)
To capture the image, select [Yes]. To cancel the Capture function, select [No].

✓**Note:**

- Before capturing an image, select Standard in the Image Select Menu to capture a proper image. (p.30, 37.)
- A signal from a computer can be captured up to XGA (1024x768). A signal from video equipment can be captured except for 720p, 1035i, and 1080i.
- When capturing the image that has been adjusted by the Keystone function, the adjustment data is automatically reset and the projector captures an image without keystone adjustment.
- When the Logo PIN code lock function is "On", Capture menu cannot be selected.
- When starting to capture a new image, the previously stored image is cleared even if you cancel the capturing.
- "User" can not be selected if no image is captured.

Capture

Select [Yes] to capture the projected image.

Select [Yes] to stop capturing.

Logo PIN code lock

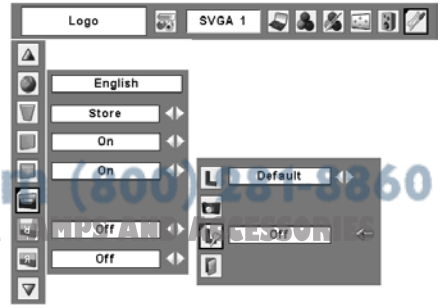

This function prevents an unauthorized person from changing the screen logo.

Off . . . . . the screen logo can be changed freely from the Logo select menu. (p.42)

On . . . . . the screen logo cannot be changed without the Logo PIN code.

If you want to change the Logo PIN code lock setting, enter a Logo PIN code along the following steps. The initial Logo PIN code is set "4321" at the factory.

Logo PIN code lock

Discountprojectorlamp.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR

To Enter the Logo PIN code

Select a number by pressing the Point ▲▼ buttons. And then press the Point ► button to fix the number and move the pointer. The number changes to "✳". If you fixed an incorrect number, move the pointer to the number you want to correct by pressing the Point ◄ button, and then select the correct number by pressing the Point ▲▼ buttons.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to "Set" by pressing the Point ► button. Press the SELECT button so that you can change the Logo PIN code lock setting.

If you entered an incorrect Logo PIN code, "Logo PIN code" and the number (✳✳✳✳) turns red. Enter a Logo PIN code all over again.

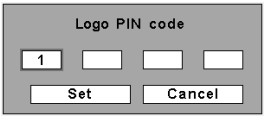

To Change the Logo PIN code

Logo PIN code can be changed to your desired four-digit number. Select "Logo PIN code change" with the Point ▼ button and press the SELECT button. Set a new Logo PIN code.

Be sure to note the new Logo PIN code and keep it at hand. If you lost the number, you could no longer change the Logo PIN code setting. For details on PIN code setting, refer to relevant instructions of the PIN code lock function on pages 48 and 49.

CAUTION:
WHEN YOU HAVE CHANGED THE LOGO PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE LOGO PIN CODE NO. MEMO ON PAGE 66, AND KEEP IT SECURELY. SHOULD THE LOGO PIN CODE BE LOST OR FORGOTTEN, THE LOGO PIN CODE SETTING CAN NO LONGER BE CHANGED.

Logo PIN code lock Dialog Box

After a correct Logo PIN code is entered, the following dialog box appears.

Select On/Off by pressing the Point◄► buttons or change the Logo PIN code.

Ceiling

When this function is "On", the picture is top/bottom and left/right reversed. This function is used to project the image from a ceiling mounting the projector.

Rear

When this function is "On", the picture is left/right reversed. This function is used to project the image to a rear projection screen.

Terminal

The COMPUTER IN 2/MONITOR OUT terminal on the back of the projector is switchable for computer input or monitor output. (See page 9) Select Computer 2 or Monitor out with the Point ◄► buttons.

Computer 2.....computer input
Monitor out.....monitor output

This Terminal function is not available when Computer 2 has been selected as the input source.Change the input source to the others (Computer 1 or Video) in order to use the Terminal function. (p.25, 34, 35)

Input search

This function detects the input signal automatically. When finding a signal, the search will stop. Use the Point ◄► buttons to select one of the following.

Off Input search does not work.

On1 Input search works under the situation below.
- When pressing the INPUT button on the top control.
- When pressing the COMPUTER button or VIDEO button on the remote control.

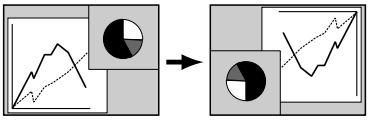

On2 Input search works under the situation below.
- When turning on the projector with pressing the POWER ON/STAND-BY button on the top control or on the remote control.
- When pressing the COMPUTER button or VIDEO button on the remote control.
- When missing the current input signal. *
- When pressing the INPUT button on the top control.

*If the No show or Freeze function is active, cancel it to activate the Input search. It is also unavailable when On-Screen menu is displayed.

✓ **Note:**
- While Input search is set On1 or On2, the status of Input and Lamp are displayed every time the signal is switched.
- If any of the INPUT button on the top control or COMPUTER/VIDEO button on the remote control is pressed while Input search is on, Input search will stop.

Ceiling

Rear

Power management

For reducing power consumption as well as maintaining the lamp life, the Power management function turns off the projection lamp when the projector is not used for a certain period.
When the input signal is interrupted and no button is pressed for more than 30 seconds, the timer display with "No signal" appears. The countdown starts to turn off the lamp.

Select one of the operations:

Ready.	When the lamp has been fully cooled down, the POWER indicator changes to green blinking. In this condition, the projection lamp is turned on if the input signal is reconnected or any button on the top control or remote control is pressed.
Shut down	When the lamp has been fully cooled down, the power is turned off.
Off	Power management function is off.

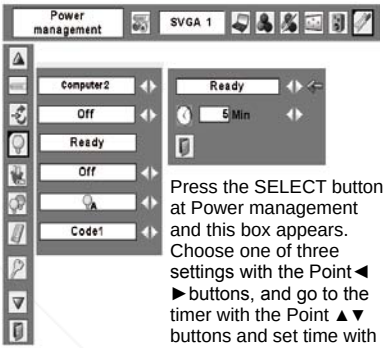

Then set the countdown timer with the Point ◄► buttons.

✓**Note:**
Factory default is “Ready: 5 min.”

Power management

Time left before Lamp is off.

Press the SELECT button at Power management and this box appears. Choose one of three settings with the Point◄►buttons, and go to the timer with the Point ▲▼ buttons and set time with the Point ◄►buttons.

On start

When this function is "On", the projector is automatically turned on just by connecting the AC power cord to a wall outlet.

✓ **Note:**
Be sure to turn the projector off properly (see "Turning Off the Projector" on page 19). If the projector is turned off in the incorrect sequence, the On start function does not operate properly.

Lamp control

This function allows you to change brightness of the screen.

- Normal . . . . . normal brightness
- Auto . . . . . brightness according with the input signal
- Eco . . . . . lower brightness reduces the lamp power consumption and extends the lamp life.

✓ **Note:**
Lamp mode cannot be changed for a while after turning on the projector. Lamp needs some time to stabilize after the power is turned on. Stored lamp mode will be active after the lamp is stabilized.

Remote control

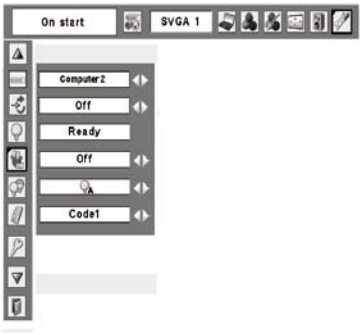

This projector provides two different remote control codes: the factory-set initial code (Code 1) and the secondary code (Code 2). This switching function prevents remote control interference when operating several projectors or video equipment at the same time.
When operating the projector in "Code 2", both the projector and the remote control must be switched to "Code 2".

To change the code for the projector:
Select either "Code 1" or "Code 2" in this Setting Menu.

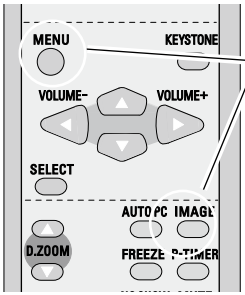

To change the code for the remote control:
Press and hold both the MENU and IMAGE buttons together for 5 seconds or more. After changing the code, make sure the remote control operates properly.

✓ **Note:**
If the batteries are removed from the remote control for a long period of time, the remote control code will be reset.

On start

Remote control

Press and hold MENU and IMAGE buttons for more than 5 seconds.

Security (Key lock and PIN code lock settings)

This function allows you to use Key lock and PIN code lock function to set the security for the projector operation.

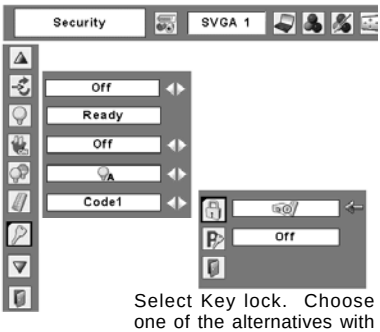

Key lock

This function locks operation of the top control or the remote control.
It is useful to prevent operation by an unauthorized person.

- . . . . . not locked.
- . . . . . lock the operation of the top control. To unlock, use the remote control.
- . . . . . lock the operation of the remote control. To unlock, use the top control.

If the top control accidentally becomes locked and you do not have the remote control or there is something wrong with your remote control, contact the dealer where you purchased the projector or the service center.

Key lock

Select Key lock. Choose one of the alternatives with the Point ▲▼ buttons and select [Yes] to activate it.

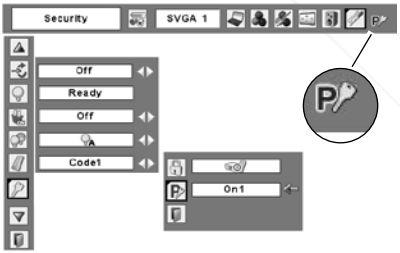

PIN code lock

This function prevents the projector from being operated by an unauthorized person and provides the following settings for security options.

- Off . . . . . the projector is not locked with a PIN code.
- On1 . . . . require to enter a PIN code every time turning on the projector.
- On2 . . . . require to enter a PIN code to operate the projector once the power cord is disconnected; as long as the AC power cord is connected, the projector can be operated without a PIN code.

Whenever to change the PIN code lock setting or the PIN code (the four-digit number), you are required to enter the PIN code. The "1234" is set as the initial PIN code at the factory.

PIN code lock

When the projector is locked with the PIN code, the PIN code lock mark appears on the menu bar.

FixYourDLP.com

Enter a PIN code

Change the PIN code lock setting

Select a desired setting with the Point ◄► buttons.

Change the PIN code

Fan

This function provides the following alternatives in the cooling fans' operation after turning off the projector. (p.19)

L1 . . . . . normal operation
L2 . . . . . slower and lower-sound than the normal operation (L1), but it takes longer to cool the projector down.

✓ **Note:**
Setting "Fan control " to On 1 or On 2 affects L2 operation in "Fan".

Fan control

This projector provides Fan control function in the Setting menu.
Choose the running speed of cooling fans from the following options according to the ground elevation under which you use the projector.

Off . . . . . Normal speed. Set this function to "Off" when using the projector in non-high altitude environment.
On 1 . . . . Faster than Off mode. Select this mode when using the projector in high altitudes (about 1,200 meters or more above the sea level) where the fans have less cooling effect.
On 2 . . . . Faster than On 1 mode. Select this mode when using the projector in higher altitudes than above where the fans have lesser cooling effect.

✓ **Note:**
Fan noise becomes louder in On 1 and On 2.

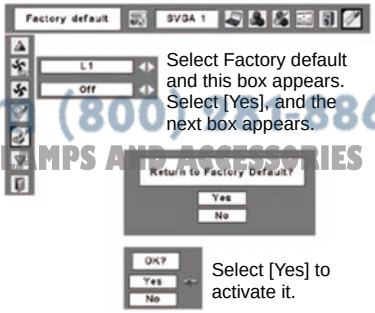

Lamp counter

This function is used to reset the lamp replacement counter. When replacing the projection lamp, reset the lamp replacement counter by using this function. See page 55 for operation.

Factory default

This function returns all setting values except for the user logo, PIN code lock, Logo PIN code lock, and the lamp counter to the factory default settings.

Factory default

Select Factory default and this box appears. Select [Yes], and the next box appears.

Select [Yes] to activate it.

Quit

Exit the Setting Menu.

Discount-Merchant.com (800) 713-3860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

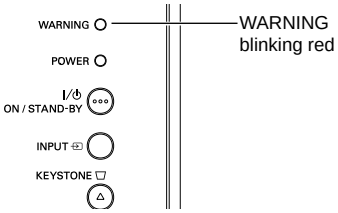

Warning Indicator

The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance.

The projector is shut down and the WARNING indicator is blinking red.

When the temperature inside the projector reaches a certain level, the projector is automatically shut down to protect the inside of the projector. The POWER indicator is blinking while the projector is being cooled down. When the projector has cooled down sufficiently (to its normal operating temperature), it can be turned on again by pressing the POWER ON/STAND-BY button on the remote control.

Top Control

✓ **Note:**
The WARNING indicator continues to blink even after the temperature inside the projector returns to normal. When the projector is turned on again, the WARNING indicator stops blinking.

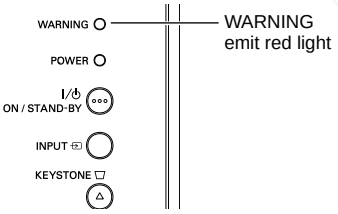

Then check the matters below:

– Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if ventilation slots are not blocked.
– Has the projector been installed near the Air-Conditioning/Heating Duct or Vent? Move the installation of the projector away from the duct or vent.
– Are the air filters clean? Clean the air filters periodically. (p.52)

The projector is shut down and the WARNING indicator emits a red light.

When the projector detects an abnormal condition, it is automatically shut down to protect the inside of the projector and the WARNING indicator becomes red. In this case, disconnect the AC power cord and reconnect it, and then turn the projector on once again to verify operation. If the projector cannot be turned on and the WARNING indicator emits a red light, disconnect the AC power cord and contact the service station.

Top Control

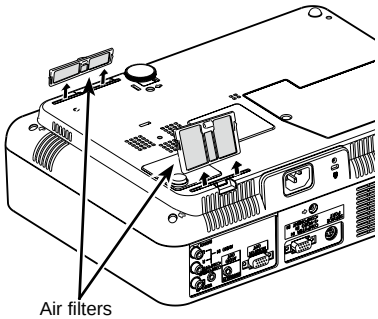

Discount-Merchant.com (800) 281-8860
THE BETTER SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

CAUTION
DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER THE ABNORMAL CONDITION. IT MAY RESULT IN FIRE OR ELECTRIC SHOCK.

Cleaning the Air Filters

Air filters prevent dust from accumulating on the optical elements inside the projector. Should the air filters become clogged with dust particles, it will reduce cooling fans' effectiveness and may result in internal heat build up and adversely affect the life of the projector. Clean the air filters following the steps below.

1. Turn off the projector, and disconnect the AC power cord from the AC outlet.
2. Turn over the projector and remove the air filters by pulling the latches upward.
3. Clean the air filters with a brush or rinse them softly.
4. When cleaning the air filters by rinsing, dry them well. Replace the air filters properly. Make sure that the air filters are fully inserted.

CAUTION

Do not operate the projector with the air filters removed. Dust may accumulate on the optical elements degrading picture quality.

Do not put small parts into the air intake vents. It may result in malfunction of the projector.

✓ **Note:**

Be sure to reinsert the air filters in the proper direction.

RECOMMENDATION

We recommend avoiding dusty/smoky environments when operating the projector. Usage in these environments may cause a poor image quality.

When using the projector under dusty or smoky conditions, dust may accumulate on a lens, LCD panels, or optical elements inside the projector. This condition may degrade the quality of a projected image. When the symptoms above are noticed, contact your authorized dealer or service station for proper cleaning.

Attaching the Lens Cover

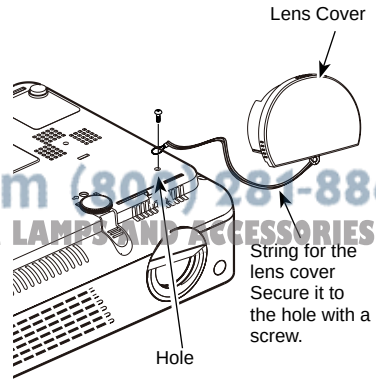

When moving this projector or while not using it over an extended period of time, replace the lens cover.

FixYourDLP.com

Attach the lens cover according to the following procedures.

Discount-Merchant.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

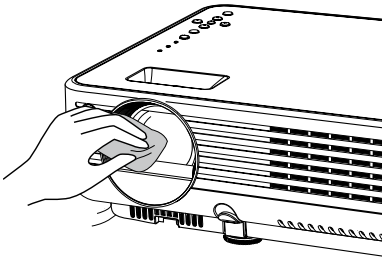

1. Pass the string through a hole of the lens cover.
2. Turn over the projector and remove the screw with a screwdriver.
3. Attach the string with lens cover to a hole at the bottom of the projector and secure it with a screw.

Cleaning the Projection Lens

Disconnect the AC power cord before cleaning.

Gently wipe the projection lens with a cleaning cloth that contains a small amount of non-abrasive camera lens cleaner, or use lens cleaning paper or a commercially available air blower to clean the lens. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.

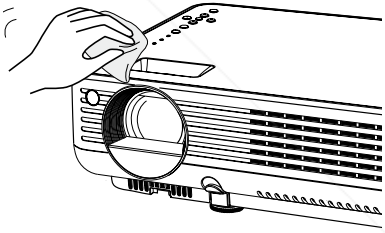

Cleaning the Projector Cabinet

Disconnect the AC power cord before cleaning.

Gently wipe the projector body with a soft, dry cleaning cloth. When it is heavily soiled, use a small amount of mild detergent and finish with a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.

When the projector is not in use, put the projector in an appropriate carrying case to protect it from dust and scratches.

Lamp Replacement

When the life of the projection lamp of this projector draws to an end, the LAMP REPLACE indicator emits a yellow light. If this indicator lights yellow, replace the lamp with a new one promptly.

Top Control

WARNING:
TURN OFF THE UV LAMP BEFORE OPENING THE LAMP COVER

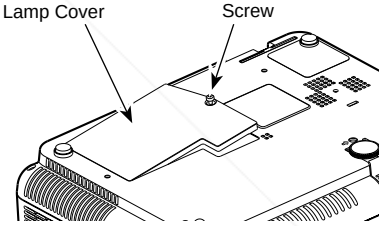

CAUTION

Allow a projector to cool, for at least 45 minutes before you open the Lamp cover. The inside of the projector can become very hot.

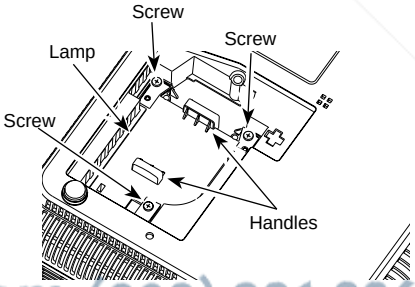

CAUTION

For continued safety, replace with a lamp of the same type. Do not drop a lamp or touch a glass bulb! The glass can shatter and may cause injury.

Follow these steps to replace the lamp.

1. Turn off the projector and disconnect the AC power cord. Allow the projector to cool for at least 45 minutes.
2. Loosen the screw with a screwdriver, and remove the lamp cover.
3. Loosen the 3 screws of the lamp with a screwdriver and lift the lamp out of the projector by using the built in handles.
4. Replace the lamp with a new one and secure it with the 3 screws. Make sure that the lamp is set properly. Replace the lamp cover and tighten the screw.
5. Connect the AC power cord to the projector and turn on the projector.
6. **Reset the lamp replacement counter.**
   See "Lamp Replacement Counter" on the next page .

Discount-Merchant.com (800) 281-8860
SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

ORDER REPLACEMENT LAMP

Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

- Model No. of your projector: LC-XB21B
- Replacement Lamp Type No.: POA-LMP122
  (Service Parts No. 610 340 0341)

Lamp Replacement Counter

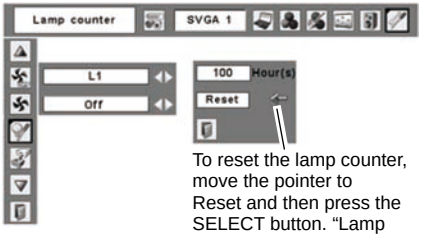

Be sure to reset the Lamp replacement counter after the lamp is replaced. When the Lamp replacement counter is reset, the LAMP REPLACE indicator stops lighting.

1 Turn the projector on, press the MENU button to display the On-Screen Menu. Press the Point ◄ ► buttons to move the red framed pointer to the Setting Menu icon.

2 Press the Point ▲▼ buttons to move the red framed pointer to the Lamp counter function and then press the SELECT button. A dialog box appears showing the total accumulated lamp hours and reset option. If you select "Reset", a "Lamp replacement counter Reset?" message appears. Select [Yes] to continue.

3 Another confirmation dialog box appears, select [Yes] to reset the Lamp replacement counter.

✓ **Note:**
Do not reset the Lamp replacement counter without implementing lamp replacement. Be sure to reset the Lamp replacement counter only after replacing the lamp.

To reset the lamp counter, move the pointer to Reset and then press the SELECT button. "Lamp replacement counter Reset?" dialog box is displayed.

Select [Yes], then another confirmation box appears.

Select [Yes] again to reset the lamp counter.

LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly.
Improper handling may result in accidents, injury, or create a fire hazard.

- Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.
- If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the LAMP REPLACE indicator lighted may increase the risk of lamp explosion.
- A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

FixYourDLP.com
Discount Projector Lamp (888) 881-8360
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.

If a lamp explodes, disconnect the projector's AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.

Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.

– Make sure you have properly connected the projector to peripheral equipment as described on pages15-17.
– Make sure all equipment is connected to AC outlet and the power is turned on.
– When you operate the projector with a computer and it does not project an image, restart the computer.

Problem	– Solutions
No power	– Plug the power cord of the projector into the AC outlet. – See if the POWER indicator lights red. – Wait until the POWER indicator stops blinking to turn on the projector again. The projector can be turned on after the POWER indicator turns red. (See page 19.) – Check the WARNING indicator. If the WARNING indicator lights red, the projector cannot be turned on. (See page 51.) – Check the projection lamp. (See page 54.) – Unlock the Key lock function. (See page 48.)
The initial display is not shown.	– Make sure "Off" or "Countdown off" are not chosen at display function.(see page 42)
The initial display is not same as the default set.	– Make sure "User" or "Off" are not chosen at Logo (select) function. (see page 42)
Input signal switches automatically. (or does not switch automatically)	– Make sure Input search function is adjusted properly. (See page 45)
Image is out of focus	– Adjust the focus of the projector. (See page 22.) – Provide proper distance between the projector and the projection screen. (See page 13.) – Check the projection lens to see if it needs cleaning. (See page 53.) – Moving the projector from a cool to warm place may result in moisture condensation on the projection lens. If this occurs, leave the projector off and wait until condensation evaporates.
No image	– Check the connection between your computer or video equipment and the projector. (See pages 15-17.) – See if the input signal is correctly output from your computer. For some laptop computers, you may need to change the setting for the monitor output when connecting to a projector. See your computer's instruction manual for the setting. – It takes about 30 seconds to display an image after turning on the projector. See if the selected system is corresponding to your computer or video equipment. (See pages 26 and 36.) – Select a correct input source once again through menu operation. (See pages 25, 34 and 35.) – Make sure the temperature is not out of the specified operating temperature (41°F ~ 95°F (5°C ~ 35°C)).

THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

Image is Left/Right reversed **Image is Top/Bottom reversed**	– Check the Ceiling/Rear function. (See page 45.) – Check the Ceiling function. (See page 45.)
No sound	– Check audio cable connections from the audio input source. – Adjust the audio source. – Press the VOLUME + button. (See page 23.) – Press the MUTE button. (See page 23.) – Is the image projected? You will hear the sound only when the image is projected.
The color is strange.	– Check the Input signal, color system,video system or computer system mode. – Make sure the "Blackboard" is not selected on Image select menu. (see pages 30, 37.)
Some displays are not seen during operations	– Check the Display item. (See page 42.)
Auto PC adjustment function does not work.	– Check the Input signal. Auto PC function can not work when 480p,575p.720p,480i,575i,1035i or 1080i is selected. (see Page 27)
The setting does not remain after turning off power.	– Make sure you selected "Store" after adjusting setting. Some settings can not be stored if not registered with "Store". (see pages 29, 32, 39)
Power management does not work.	– Power management function can not work while "Freeze" or "No Show" function is running. (see pages 23, 24)
Capture function does not work.	– Check the connection and the input signal to see if there is signal.
The image is distorted or runs off.	– Check "PC adjustment" menu or "Screen" menu and adjust them. (see pages 28-29, 32)
PIN code dialog box appears at the start-up	– PIN code lock is being set. Input a PIN code (1234 or numbers you have set). (See pages 18, 48 and 49.)
Computer 2 cannot be selected	– Select Computer 2 at the Terminal function. (See page 45.)
The Terminal function cannot be selected	– The Terminal function cannot be selected after Computer 2 is selected. Select other input source such as Computer 1 or Video with the COMPUTER button or the VIDEO button on the remote control so that the Terminal function can be selected.
The Remote Control does not work.	– Check the batteries. – Make sure there is no obstruction between the projector and remote control. – Make sure you are not too far from the projector when using the remote control. Maximum operating range is 16.4' (5 m). – Make sure the code of the remote control is conformed to that of the projector. (See page 47.)

Indicators and Projector Condition

Check the indicators for projector condition.

Indicators			Projector Condition
POWER **red/green**	WARNING **red**	LAMP REPLACE **yellow**	
●	●	●	The projector is off. (The AC power cord is unplugged.)
◍	●	∗	The projector is preparing for stand-by or the projection lamp is being cooled down. The projector cannot be turned on until cooling is completed.
◍	●	∗	The projector is ready to be turned on with the POWER ON/STAND-BY button on the top control or on the remote control.
○	●	∗	The projector is operating normally.
○	●	∗	The projector is in the Power management mode.
◍	◍	∗	The temperature inside the projector is abnormally high. The projector cannot be turned on. When the projector is cooled down enough and the temperature returns to normal, the POWER indicator lights red and the projector can be turned on. (The WARNING indicator keeps blinking.) Check and clean the air filters.
◍	◍	∗	The projector has been cooled down enough and the temperature returns to normal. When turning on the projector, the WARNING indicator stops blinking. Check and clean the air filters.
●	◍	∗	The projector detects an abnormal condition and cannot be turned on. Unplug the AC power cord and plug it again to turn on the projector. If the projector is turned off again, disconnect the AC power cord and contact the dealer or the service center. Do not leave the projector on. It may cause an electric shock or fire hazard.
