⚠ WARNING This symbol indicates information that, if ignored, could possibly result in personal injury or even death.

⚠ CAUTION This symbol indicates information that, if ignored, could result in personal injury or physical damage.

Typical Symbols

This symbol indicates an additional warning (including cautions). An illustration is provided to clarify the contents (for example: the illustration to the left indicates danger of electrical shock).

This symbol indicates a prohibited action. The contents will be clearly indicated in an illustration or description near the symbol (for example: the symbol to the left indicates that disassembly is prohibited).

This symbol indicates a compulsory action. The contents will be clearly indicated in an illustration or description near the symbol (for example: the symbol to the left shows that the power plug should be disconnected from the power outlet).

THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

⚠ WARNING

If a problem should occur

If smoke or strange odors arise, continued use could result in fire or electrical shock. In such case, immediately turn off the power switch and then disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer for repairs. Never attempt to make repairs yourself because this is dangerous.

Do not use this projector if there is no image or sound, or if the sound is distorted. Continued use could result in fire or electrical shock. In such case, immediately turn off the power switch; disconnect the power plug from the power outlet and contact your dealer.

If water would enter the inside of this projector, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Do not install on an unstable surface.

Do not install this projector on an unstable surface such as a wobbly stand or incline because this could result in the projector falling and causing injury.

Do not open the cabinet.

Never open the cabinet. There is high voltage inside which can cause electrical shock. Contact your dealer for internal inspection, adjustment and repair.

Do not modify.

Do not modify this projector because this could result in fire or electrical shock.

Do not use in the bathroom or near water site.

Do not expose this unit to rain or use near water… for example, in the bathroom, a wet basement, near a swimming pool, etc…

Do not insert objects into the Projector.

Do not insert metal objects through the ventilation openings, etc., of this projector or drop such objects inside because this could result in fire or electrical shock.

FixYourDLP.com
Discount-Merchant.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

If a foreign object should enter this projector, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Continued use could result in fire or electrical shock. Use special caution in household and where children are present.

⚠ WARNING

Do not look through the lens when the lamp is on.

Never look through the lens when the lamp is on. The powerful light could adversely affect vision. Use special caution in households where children are present.

Avoid shock or impact on the projector.

If the projector should fall, resulting in damage to the cabinet, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Continued use could result in fire or electrical shock.

Do not place this projector in a container containing liquid. Do not place flower vases, flowerpots, cups, cosmetics, liquids such as water, etc., on top of this projector.

Do not use any power cable except those supplied with the projector.

The use of any other power cable could result in fire or electrical shock.

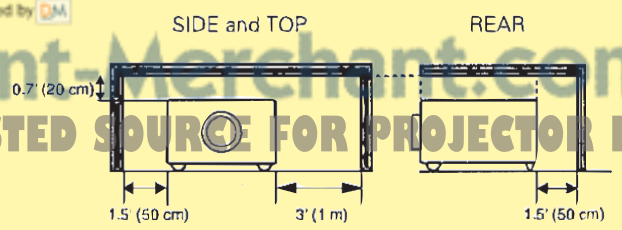

Do not shine the laser beam onto yourself or other.

The laser pointer function of projector remote control emits class Ⅱ laser beam.
Do not look directly into the laser beam outlet or direct the laser beam at other people. Vision can be impaired if the laser beam enters the eyes. Especially pay attention if children are present.

High temperatures are generated when the lamp is lit; so do not place objects in front of the lens.

Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is critical for proper air circulation and cooling of the unit. The dimension shown here indicate the minimum space required. If the projector is to be built into a compartment or similarly enclosed, these minimum distances must be maintained.

THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

⚠ CAUTION

Placing heavy objects on top of this projector could result in loss of balance or falling and cause personal injury or damage the projector.

Do not block the ventilation openings.

Do not block the ventilation openings of this projector.
Blocking ventilation could lead to internal overheating which could result in fire.

Do not place this projector on its side during use or push it into a small, poorly ventilated location.

Do not place this projector on a carpet or bedding or cover it with a tablecloth, etc. Also, when installing this projector, make sure the ventilation openings are at least 30cm(12in) clearance around the projector.

Care and maintenance.

For safety purposes, disconnect the power plug from the power outlet before starting the care and maintenance of this projector.

Battery usage.

Replace the batteries with the same type only.

Do not mix old and new batteries; this could result in fire or personal injury due to battery cracking or leakage.

Make sure the plus and minus terminals are correctly aligned when loading the batteries.

Incorrect loading could result in personal injury or contamination of the surroundings due to battery cracking or leakage.

Have the projector interior cleaned regularly.

Contact your dealer to arrange for the service.

Accumulations of dust inside the projector can result in fire or malfunction if not cleaned for an extended period.

Ask your dealer for details about internal cleaning.

FixYourDLP.com
Discount-Merchant.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

⚠ CAUTION

Avoid installation in humid or dusty locations. Do not install this projector in a humid or dusty location. This could result in fire or electrical shock.

Do not handle the power cord roughly. Keep the power cord away from heaters;

The heat could melt the power cord and cause fire or electrical shock.

Do not touch the power plug with wet hands;

This could result in electrical shock.

When disconnecting the power plug, do not pull on the power cord.
This could damage the power cord and cause fire or electrical shock. Always grip the plug when disconnecting.

When the projector is not to be used for an extended period.

If the projector is not to be used for an extended period because of travel, etc., disconnect the power plug from the power outlet and replace lens cover.

Compliance

Federal communications Commission Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.
Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Size and Projection Distance

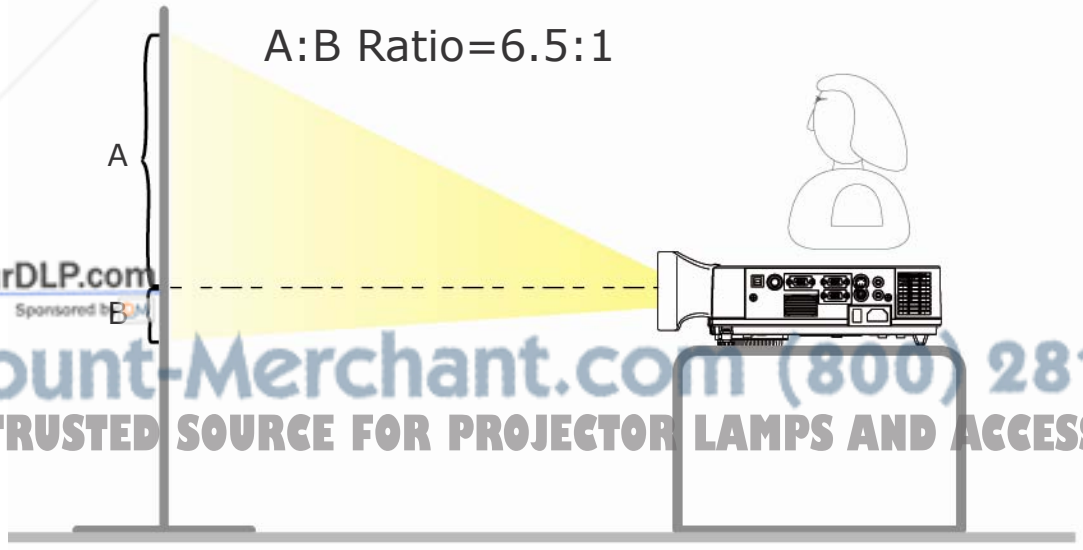

The distance between the projector and screen determines the actual image size. Refer to the table below to determine the image size at a given distance.

The values shown below are approximate and may vary from actual sizes.

Screen Size (inches)	50"	60"
(WxH) mm	1016x762	1219x914
Zoom(min)	3.8'(1.2m)	4.6'(1.4m)
Zoom(max)	3.3'(1.0m)	3.8'(1.2m)

Screen Size(inches) (WxH) mm	80"	100"
	1626x1219	2032x1524
Zoom(min)	6.2'(1.9m)	7.8'(2.4m)
Zoom(max)	5.2'(1.6m)	6.5'(2.0m)

Screen Size(inches) (WxH) mm	150"
	3048x2286
Zoom(min)	11.9'(3.6m)
Zoom(max)	9.9'(3.0m)

Adjusting the Image Position

Use the adjustable foot at the front of the projector to set the image height. Rotate the adjustable foot at the rear of the projector to fine-tune the image position.

When the foot is adjusted, it may cause the shape of the projected image to become distorted. Use the keystone correction function to correct this distortion.

To retract the front adjustable foot, press the foot adjust button. The front adjustable foot will slowly retract inside the projector.

Turning on the Projector - Procedure

6. The power indicator will flash green.

7. Press the Input button on the control panel or on the remote control to select the appropriate source.

8. Rotate the zoom ring to adjust the screen size.

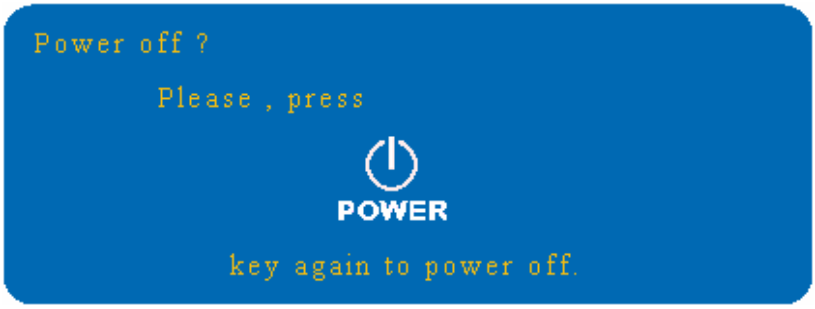

9. Rotate the focus ring to adjust the focus.

FixYourDLP.com
DiscountMerchant.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

Turning off the Projector - Procedure

1. Press the power button on the projector or remote control. The power off confirmation message appears .

2. Press the power button again and the projector will enter cool-down mode. The lamp shuts off, the lamp indicator flashes red, and the fans continue to run for approximately two minutes. During the cool down sequence the projector will not respond to any control panel or remote control buttons.

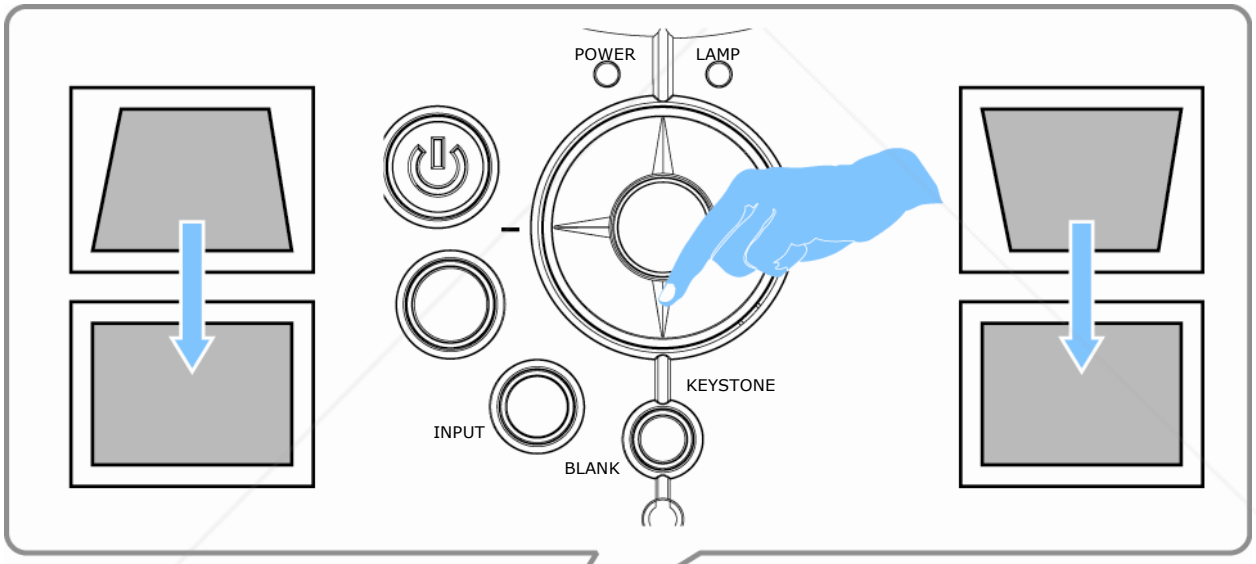

⚠ **CAUTION**	Do not set the power switch to off or unplug the projector during the cool-down sequence. Not allowing the lamp to cool properly will greatly reduce the life of the lamp.

3. After the cool-down sequence is completed the fans will shut off and the lamp indicator will stop flashing. The projector is now in standby mode and can be turned back on with the remote control or control panel. If the projector will not be used for an extended period, set the power switch to off and disconnect the power cord.

THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

1.Cleaning the projector

Clean the projector cabinet by wiping it gently with a soft cloth.If necessary, the cabinet can be cleaned using a neutral detergent and a soft cloth ensure th case

⚠ WARNING Always unplug the projector before performing any maintenance.

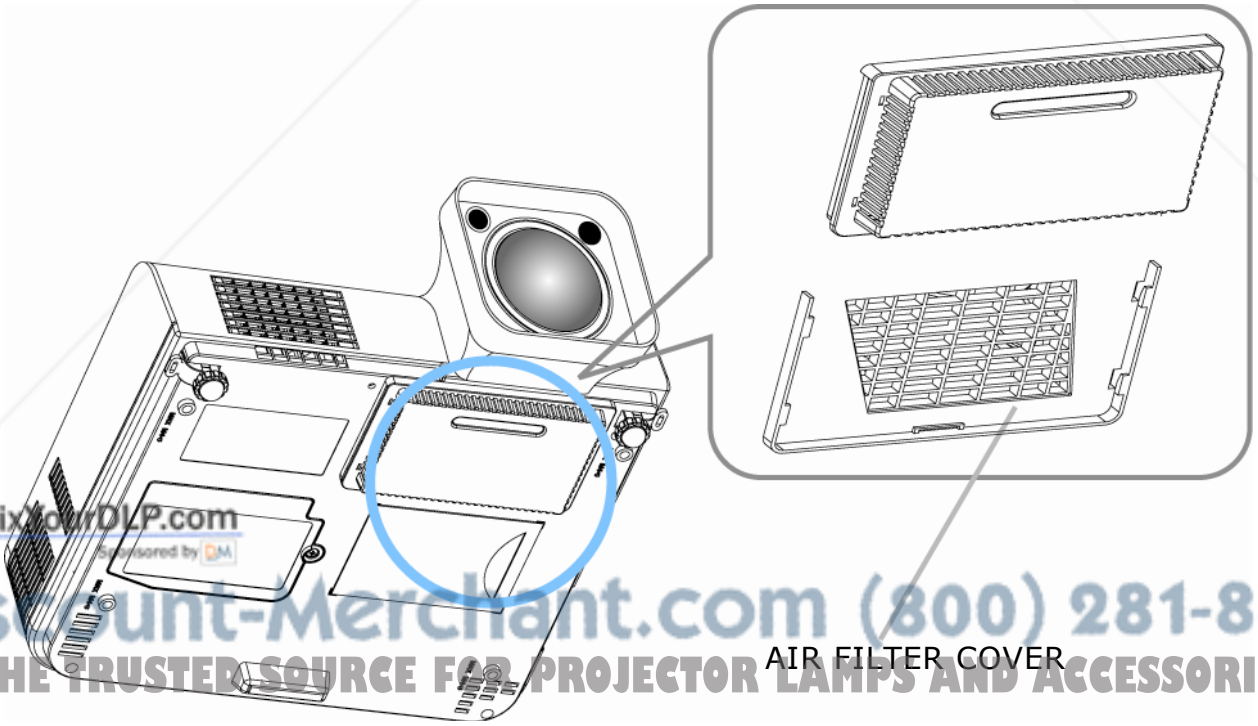

2.Cleaning the lens

Use a commercially available air blower, or use lens cleaning paper and lens cleaner approved for use on optical coatings.
Do not clean the lens with harsh materials or subject the lens to shock, as it can easily become damaged. Close the lens cover when the projector not in use.

3.Change Air Filter

When the air filter becomes clogged with dust, etc., the projector may overheat and turn itself off to prevent internal damage.

Clean the air filter every 100-hours.
*If the filter is difficult to clean or if it is deteriorating, it should be replaced
1.Remove the filter cover from the bottom of projector.
2.Pull out the air filter.
3.Install the new air filter.

AIR FILTER COVER

4.Q: Why can't install the program?

A: You might need to log in as "administrator" to be able to install program to your computer. Consult with your I/T engineers to help you in this case. In addition, program will be deleted if you install twice due to the setting of program. In this case, please install again.

5.Q: Why is it showing "No lightpen found"?

A: The possible reasons for this might be:

(1).USB cable not well connected

Please check and make sure the cable is well connected between PC and Projector.

* Some Anti-virus program will disable the USB port. Please close the anti-virus program and start the "LightPen" program again.

(2).USB driver is not well installed

(3).The length of USB cable is too long. The USB cable should be shorter than 1.5M. If you would like to require longer cable then please purchase proper USB extension cable from your dealer.

(4).USB port on computer malfunction

Please check if the USB port is functioning. If not, please consult with I/T engineer.

Some note book computer will disable USB ports when the battery is low. Please try to use AC power. Some note book computers do not provide standard 500mA to the USB ports or the USB converter is not working properly, in this case please use our standard USB cable.

6.Q: Why the green cross target does not appear after running lightpen calibration?

A: This is signaling too weak caused by using USB cable either poor quality or too long. Try a better quality USB cable or use proper USB extension cable.

7.Q: Why can't I make the green cross target turn into black in calibration procedure?

A: Possible reasons are the wand or light pen is out of battery or the system not working properly caused by strong ambient light interference.

8.Q: Why the green cross target turns into black itself?

A: This is caused by strong ambient light interference. Try to control the ambient light.

FixYourDLP.com
Sponsored by DM
DiscountMerchant.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

9.Q: What is considered as "strong ambient light interference"?

A: Strong ambient light is usually caused by the following:

(1).Sun light direct projection on the screen. You can use curtain to avoid this.

(2).Tungsten lamp working close to the sensor. Try to move the tungsten lamp away from the sensor or switch it off.

10.Q: Why is the cursor not at the position pointed?

A: The possible reasons for this are:

(1).The system not been well calibrated. Try to point to the "center" of green cross target when you running calibration.

(2).The position of the projector, screen or projection size has been changed

(3).The image resolution been changed
Run the calibration procedure again will solve the problem.

11.Q: Why is the lightpen not working?

A: The reasons for this are:

(1).When using lightpen device, writing in shadow area won't work as the signal can't be received by the sensor.

(2).Lightpen battery is low or battery cap is loose.

(3).Strong ambient light interference.

(4).USB cable not well connected.

12.Q: Why is the cursor jumping?

A: This is caused by strong ambient light interference. Try to avoid strong ambient light interference especially strong sun light directly projection on the screen.

13.Q: Why is the lightpen not working after the computer wake up from standby?

A: In some cases if the computer goes into standby mode, the computer will shot the USB port. In this case, close the light pen program and then run it again.

Remarks

1.The lightpen is working on light signal. Strong ambient light interference will cause it to work abnormally. Make sure there is not strong ambient light (ex. Sunlight or Tungsten lamp directly projection to the screen or the sensor.

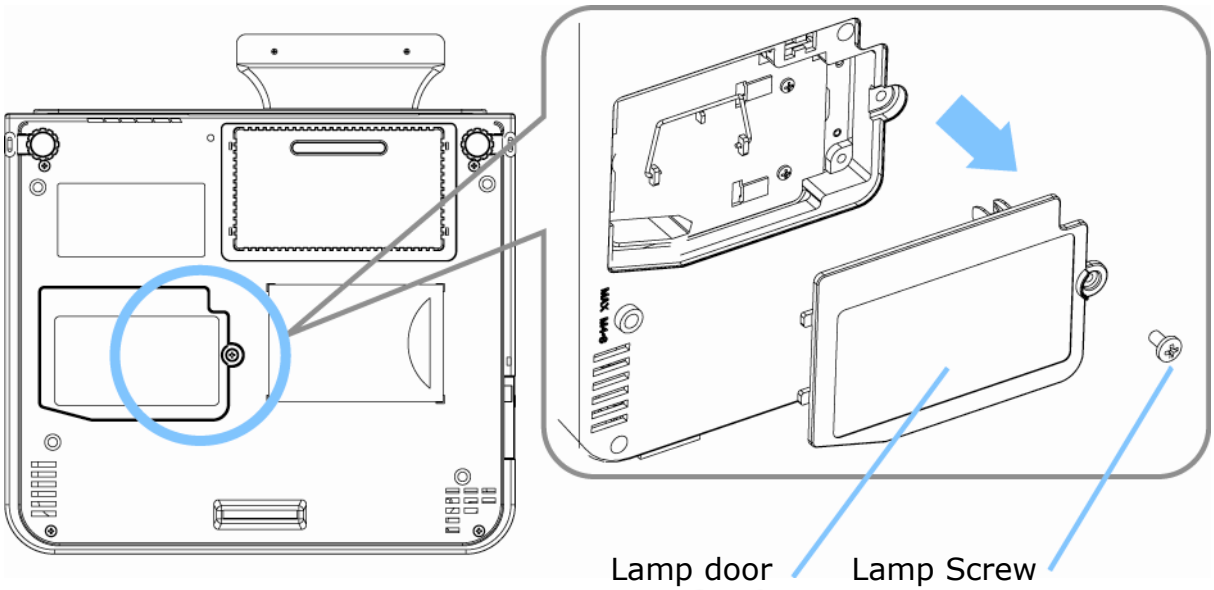

2.When using lightpen device, writing in shadow area won't work as the signal can't be received by the sensor.

3.The operation system must be Windows 2000 service pack 2 and above. USB port must support USB2.0.

4.It is required to use USB cable shorter than 1.5m
For more longer requirement such as ceiling application, please contact with your dealer to purchase proper USB extension cable.

Lamp Replacement

1. Remove the lamp screw from the lamp door.
2. Remove the Lamp Door.
3. Remove the two Phillips head screws that hold the lamp in place.
4. Grasp the handle on the top of the lamp and pull the lamp straight up out of the projector.
5. Slide the replacement lamp into place and press firmly to seat the lamp.
6. Reinstall the screws removed in step 3.
7. Reinstall the lamp door correctly and tighten the screw on the lamp door.
8. Please see page 61 for resetting the lamp timer.

⚠ CAUTION The lamp and inside of the projector become very hot while the projection lamp is lit. Allow the projector to cool for at least 15 minutes prior to opening the lamp door.
