E
English

# TO THE OWNER

Before operating this projector, read this manual thoroughly and operate the projector properly.

This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time.

Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the “Troubleshooting” section in the end of this booklet. If the problem still persists, contact the dealer where you purchased the projector or the service center.

**CAUTION**

**RISK OF ELECTRIC SHOCK DO NOT OPEN**

**CAUTION : TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.

THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT.

## CAUTION

Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment, ANSI/NFPA 75.

Ne puet être utillisé dans une salle d’ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment

**NOTE FOR CUSTOMERS IN THE US**

(Hg) LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE OR FEDERAL LAWS.

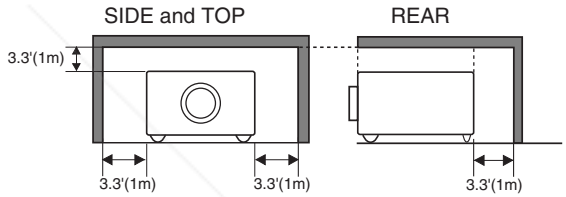

## Safety Precaution

**WARNING : TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

– This projector produces intense light from the projection lens. Do not stare directly into the lens as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam.

– Install the projector in a proper position. If not, it may result in a fire hazard.

– Provide appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum clearance must be maintained. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.

– Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.

– Remote Control Unit, supplied to this projector, emits the laser beam as the laser pointer function from Laser Light Window while pressing LASER button (for 1 minute/LASER POINTER INDICATOR lights red to indicate laser emission). Do not look into Laser Light Window or shine the laser beam on yourself or other people. Eye damage may result.

– If the projector is not to be used for an extended time, unplug the projector from the power outlet.

**READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE.**

**For use in Netherlands**

# SAFETY INSTRUCTIONS

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

---

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

---

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

# COMPLIANCES

## Federal Communication Commission Notice

Multimedia Projector, Model: LV-7565U, LV-7565FU, LV-7565E, LV-7565FE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Canon U.S.A., Inc.
One Canon Plaza, Lake Success, NY 11042-1198, U.S.A.
Tel No. (516)328-5000

## Canadian Radio Interference Regulations

This Class B digital apparatus complies with Canadian ICE-003.

## Réglementation canadienne sur les intérferences radio

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

## For use in Germany

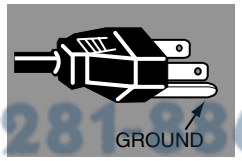

This product is intended for use in residential, commercial and light industry environment.

# AC POWER CORD REQUIREMENT

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

**AC Power Cord for the United States and Canada :**

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).
AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

# FEATURES AND DESIGN

This Multimedia Projector is designed with most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

## ◆ High Resolution Image

LV-7565/7565F allows great compatibility with up to XGA (1024 x 768) with its high resolution LCD panel. It also provides an accurate compression image of SXGA (1280 x 1024).

## ◆ Wireless remote control

Supplied with a wireless remote control enabling you to operate both the projector and connected computer. Laser pointer function is also provided to make your presentation more smoothly. The remote control can be wired if necessary.

## ◆ A wide variety of functions to support a smart presentation

Multi-scan system for quick detection of computer system.
Auto PC Adjustment for automatically adjusting the optimum setting for the incoming computer signal.
Digital Zoom for quick adjustment of the screen size (for computer mode).
Digital Keystone Correction for digitally adjusting the distorted (trapezoidat-shaped) screen to the proper image proportion.
Mute for temporarily muting the sound, No Show for blacking out the image, Freeze for capturing a moving picture.
P-timer to count up the punctual time for presentation.
Built in amplifier for making a presentation without external audio equipment.
Supports a wide range of installation methods including ceiling mount, stand alone and rear projection.
Silent Mode is provided for increasing lamp life and reducing power consumption.

## ◆ 6 Color Systems

Supports NTSC, NTSC4.43, PAL, SECAM, PAL-M and PAL-N.

## ◆ Component Video Input Terminal

Equipped with a component video input terminal for playing DVD and HDTV with superb video quality.

## ◆ Digital Visual Interface (DVI-D)

Equipped with DVI-D to display the computer image with high brightness.

## ◆ Progressive Scan

Progressive scan for projecting video image and HDTV signal with high quality.

## ◆ Turbo Bright System

Turbo Bright System enhances picture brightness.

## ◆ Replaceable Lens

The projector lens is replaceable with an optional lens (sold separately) so that you can change the lens as necessary.

## ◆ Motorized Lens Shift

Motorized Lens shift allows you to move the lens up and down to the position you wish to display the image.

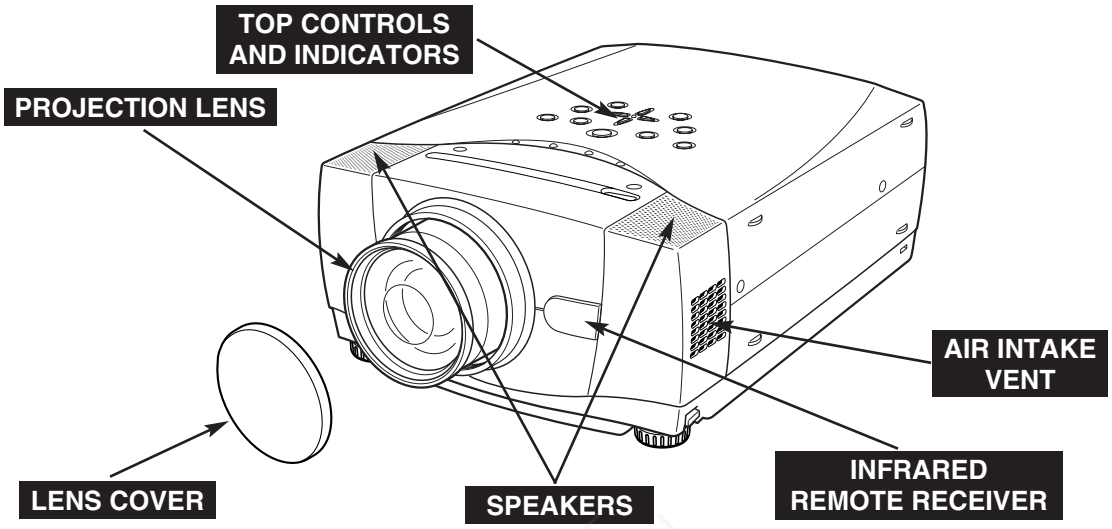

## ◆ Network Imager (Optional accessory)

Equipped with the Network Imager, the projector can display the image of the computer screen and the data image stored in the computer via a network. The projector can be also controlled and maintained through a web browser.

# NAME OF EACH PART OF PROJECTOR

## FRONT OF CABINET

## BACK OF CABINET

### EXHAUST VENT

**HOT AIR EXHAUSTED !**

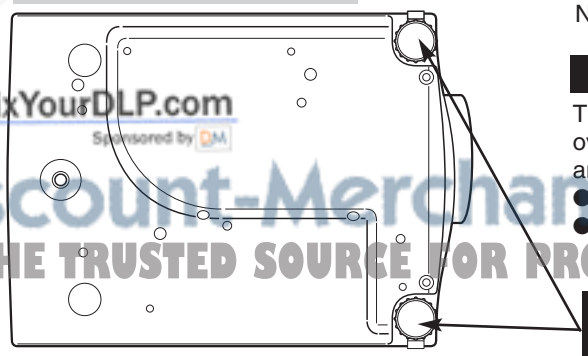

**Air blown from exhaust vent is hot. When using or installing projector, following precautions should be taken.**

- Do not put any flammable object near these vents.
- Keep rear grills at least 3.3'(1 m) away from any object, especially heat-sensitive object.
- Do not touch this area, especially screws and metallic parts. This area will become hot while a projector is used.

**This projector detects internal temperature and automatically controls operating power of Cooling Fans.**

When attached the Network Imager (optional part) to the projector, remove the these parts. Refer to the owner's manual in the optional Network Imager.

## BOTTOM OF CABINET

### AIR INTAKE VENTS

This projector is equipped with cooling fans for protection from overheating. Pay attention to following to ensure proper ventilation and avoid a possible risk of fire and malfunction.

- Do not cover vent slots.
- Keep side clear of any objects. Obstructions may block cooling air.

# SETTING-UP PROJECTOR

## CONNECTING AC POWER CORD

This projector uses nominal input voltages of 100-120 V or 200-240 V AC. This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce risk of electrical shock, do not plug into any other type of power system.
Consult your authorized dealer or service station if you are not sure of the type of power supply being in use.
Connect a projector with a peripheral equipment before turning a projector on. (Refer to pages 12 ~ 14 for connection.)

**CAUTION**

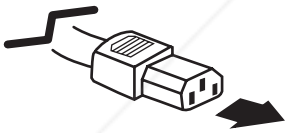

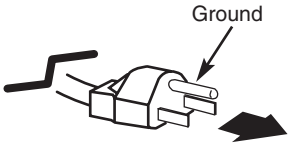

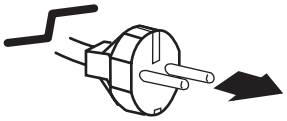

For safety, unplug AC Power Cord when an appliance is not used.
When this projector is connected to the outlet with AC Power Cord, an appliance is in Stand-by Mode and consumes a little electric power.

Connect AC Power Cord (supplied) to a projector. The AC outlet must be near this equipment and must be easily accessible.

### NOTE ON THE POWER CORD

The AC Power Cord must meet the requirement of the country where you use the projector.
Confirm the AC plug type with the chart below. The proper AC power cord must be used.
If the supplied AC Power Cord does not match the AC outlet, contact your sales dealer.

| Projector side | AC Outlet side | |
|---|---|---|
| | For the U.S.A. and Canada | For Continental Europe |
|  To the POWER CORD CONNECTOR on the projector. |  Ground To the AC Outlet. **(120 V AC)** |  To the AC Outlet. **(200 - 240 V AC)** |

## POSITIONING PROJECTOR

NOTE: The figures below are only for Model LV-7565.
Projection lens is not provided with Model LV-7565F.

- This projector is designed to project on a flat projection surface.
- Projector can be focused from 4.6' (1.4m) ~ 48.3' (14.7m).
- Refer to figure below to adjust screen size.

**ROOM LIGHT**
Brightness in room has a great influence on picture quality. It is recommended to limit ambient lighting in order to provide best image.

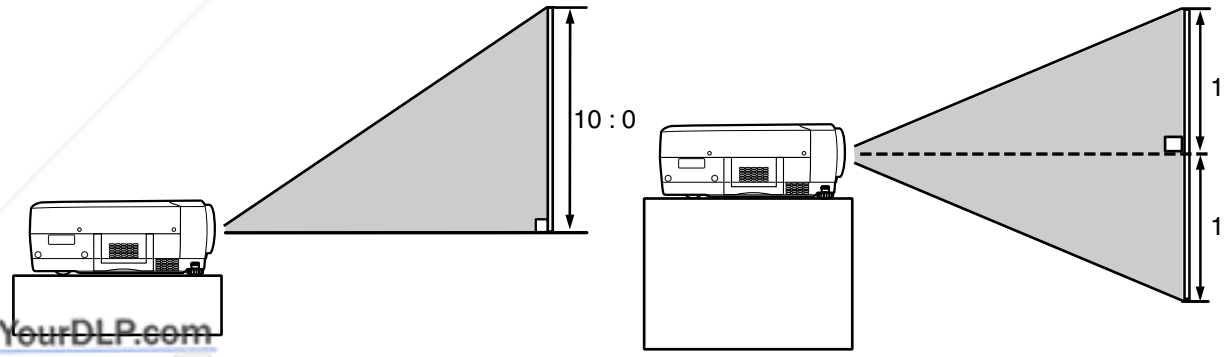

| Screen Size | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | Max. Zoom | 40" | 100" | 150" | 200" | 250" | 300" | 400" |
| | Min. Zoom | 31" | 77" | 115" | 154" | 192" | 231" | 308" |
| Distance | | 4.6' (1.4m) | 11.8' (3.6m) | 17.7' (5.4m) | 24.0' (7.3m) | 30.2' (9.2m) | 36.1' (11.0m) | 48.3' (14.7m) |

### LENS SHIFT ADJUSTMENT

Projection lens can be moved up and down with motor-driven lens shift function. This function makes it easy to provide projected image where you want. U/D ratio can be adjusted 10 : 0 ~ 1 : 1 (refer to figure below.). Refer to P 21 for operation.

**Highest (10 : 0)** ⟷ **Lowest (1 : 1)**

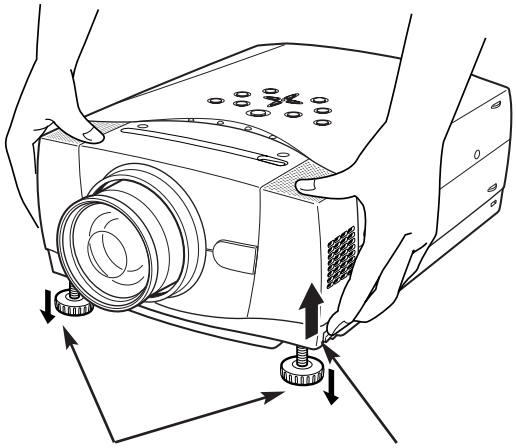

FixYourDLP.com
Sponsored by DM
Discount-Merchant.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

## ADJUSTABLE FEET

Picture tilt and projection angle can be adjusted by rotating ADJUSTABLE FEET. Projection angle can be adjusted to 10.5 degrees.

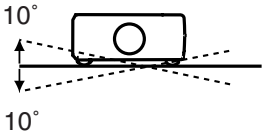

1. Lift front of a projector and pull FEET LOCK LATCHES on both sides of a projector.
2. Release FEET LOCK LATCHES to lock ADJUSTABLE FEET and rotate ADJUSTABLE FEET to fine tune position and tilt.
3. To shorten ADJUSTABLE FEET, lift front of a projector and pull and undo FEET LOCK LATCHES.

Position and keystone distortion of image can be adjusted using Menu Operation. (Refer to P 21 and 37.)

## INSTALLING PROJECTOR IN PROPER POSITION

Install the projector properly. Improper installation may reduce the lamp lifetime and cause a fire hazard.

Do not tilt the projector more than 10 degrees above and below.

**NO UPWARD**

Do not point the projector up to project an image.

**NO DOWNWARD**

Do not point the projector down to project an image.

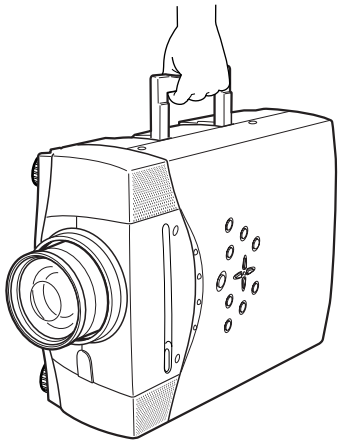

**NO SIDEWAYS**

Do not put the projector on either side to project an image.

## MOVING PROJECTOR

Use Carry Handle when moving a Projector.
When moving a projector, replace lens cover and retract feet to prevent damage to lens and cabinet.
When this projector is not in use for an extended period, put it into case (dust cover) supplied with this projector.

### CAUTION IN CARRYING OR TRANSPORTING A PROJECTOR

- Do not drop or bump a projector, otherwise damages or malfunctions may result.
- When carrying a projector, use a suitable carrying case.
- Do not transport a projector by using a courier or transport service in an unsuitable transport case. This may cause damage to a projector. To transport a projector through a courier or transport service, consult your dealer for best way.

# TERMINALS OF PROJECTOR

This projector has input and output terminals on its back for connecting computers and video equipment. Refer to figures on pages 12 to 14 and connect properly.

### COMPUTER AUDIO INPUT 1/AUDIO MONITOR OUTPUT JACK

This terminal is switchable and can be used as computer audio input 1 or audio monitor output (variable).
Set the terminal up as either Computer audio input 1 or Audio Monitor output properly before using this terminal.
Refer to P13, P23.)

### COMPUTER INPUT/MONITOR OUTPUT TERMINAL (ANALOG)

This terminal is switchable and can be used as computer input or monitor output. Set the terminal up as either Computer input or Monitor output properly before using this terminal.
Refer to P13, P23.)
Note; This terminal outputs from 5 BNC type computer input on INPUT 2 jacks only.

### COMPUTER INPUT TERMINAL (DIGITAL)

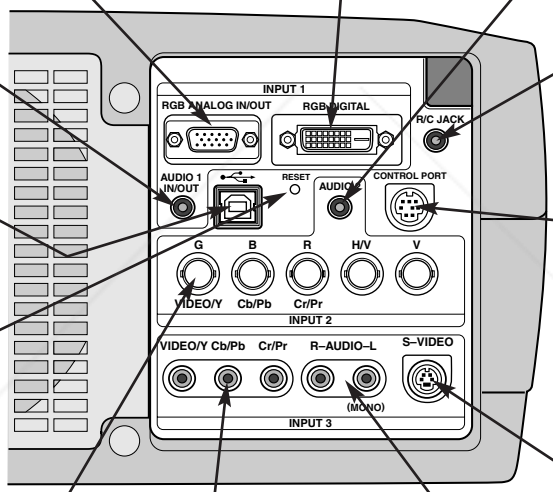

Connect computer output (Digital DVI-D type) to this terminal.
HD (HDCP Compatible) signal can also be connected.
Refer to P13.)

### COMPUTER AUDIO INPUT 2 JACK

Connect an audio output (stereo) from computer to this jack.
(Refer to P13.)

### R/C JACK

When using Wired/Wireless Remote Control Unit as Wired Remote Control, Connect Wired Remote Control Unit to this jack with Remote Control Cable (supplied).

### USB CONNECTOR (Series B)

When controlling computer with Remote Control Unit of this projector, connect USB terminal of your personal computer to this terminal. (Refer to P13.)

### RESET BUTTON

This projector uses a micro processor to control this unit, and rarely, this micro processor may malfunction and need to be reset. This can be done by pressing RESET button with a pen, which will shut down and restart unit. Do not use RESET function excessively.

✻ Do not press this button. This button is used for our optional accessories.

### CONTROL PORT CONNECTOR

When controlling computer with Remote Control Unit of this projector, connect mouse port of your personal computer to this connector. (Refer to P13.)

### 5 BNC INPUT JACKS

Connect component video output (Y, Cb, Cr or Y, Pb, Pr) from video equipment to VIDEO/Y, Cb/Pb and Cr/Pr jacks or connect computer output {5 BNC Type (Green, Blue, Red, Horiz. Sync and Vert. Sync.)} from computer to G, B, R, H/V and V jacks. (Refer to P13 and 14.)

### VIDEO INPUT JACKS

Connect composite video output from video equipment to VIDEO/Y jack or connect component video outputs to VIDEO/Y, Cb/Pb and Cr/Pr jacks. (Refer to P14.)

### AUDIO INPUT JACKS

Connect an audio output from video equipment to these jacks.
(Refer to P14.)

### S-VIDEO INPUT JACK

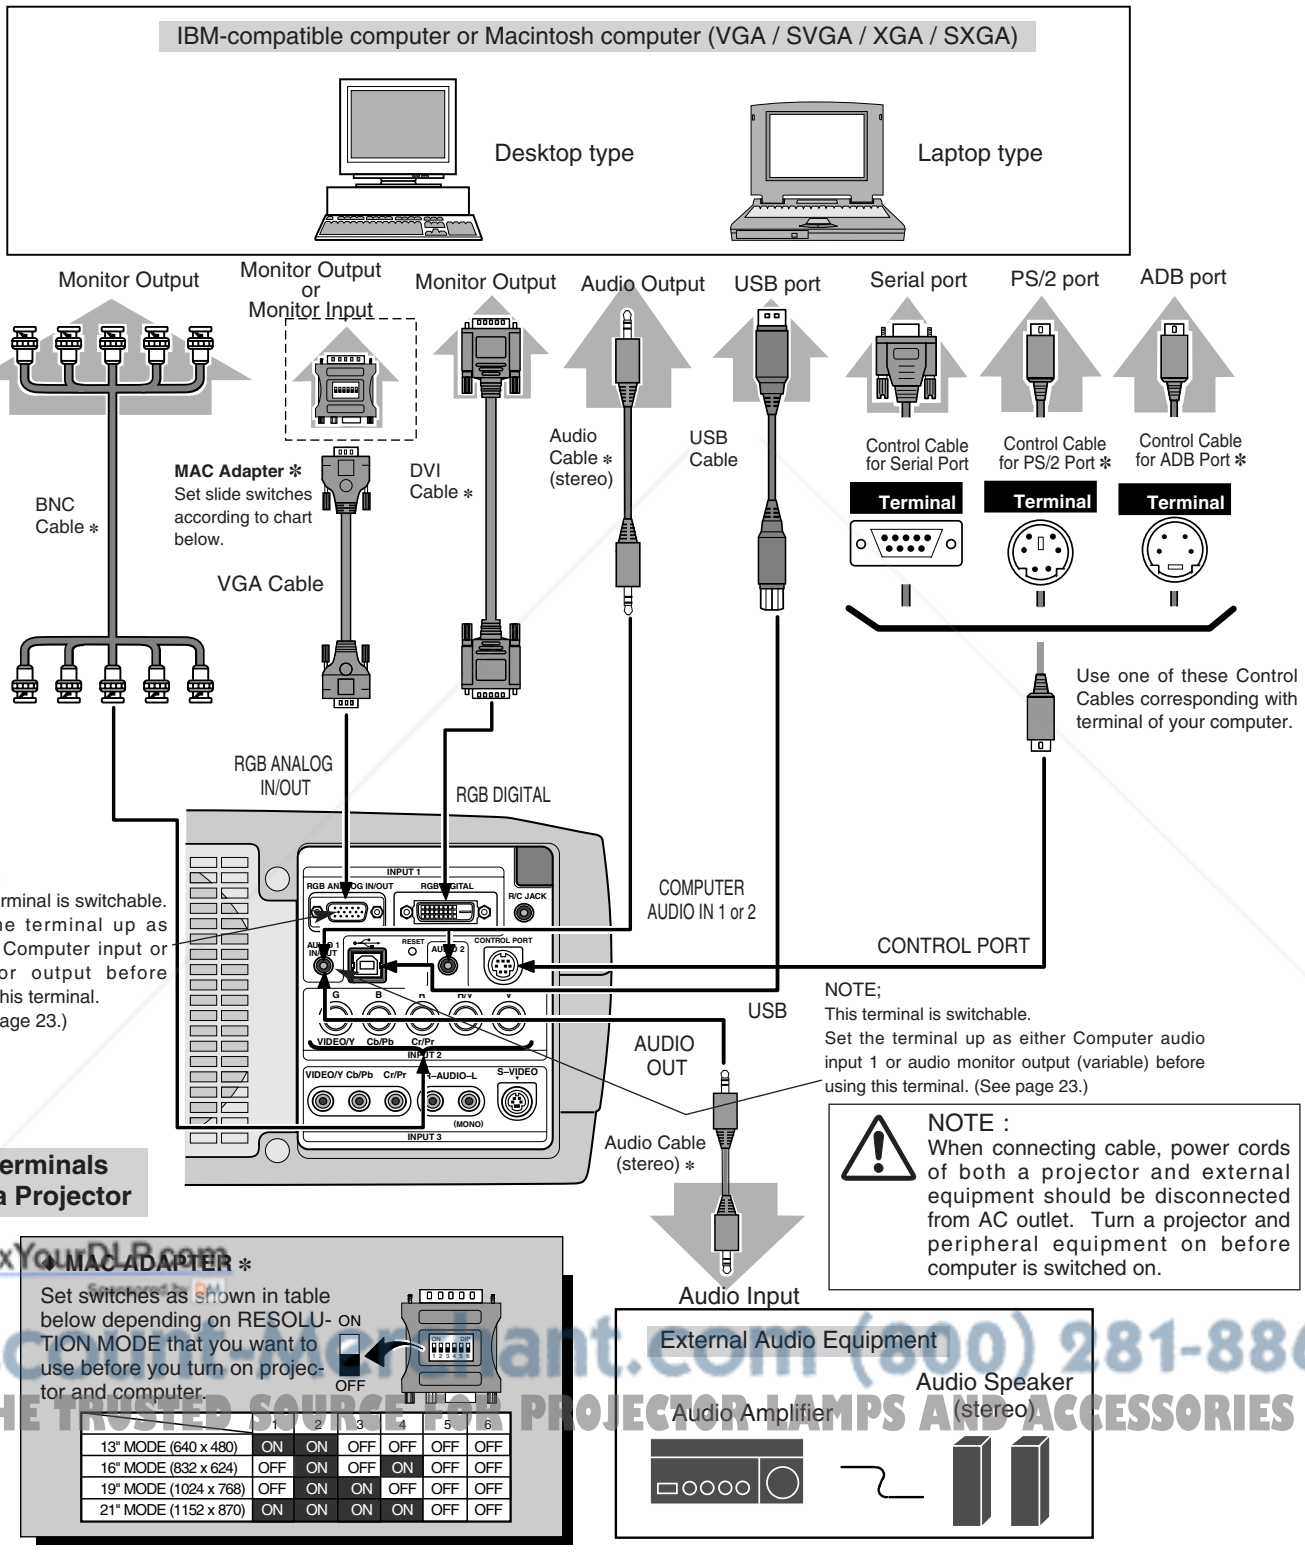

Connect S-VIDEO output from video equipment to this jack. (Refer to P14.)

# OPERATION OF REMOTE CONTROL

## Left Side

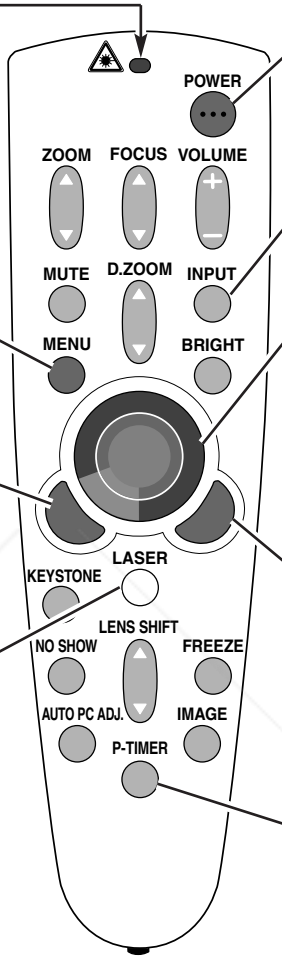

**ALL-OFF SWITCH**

When using Remote Control Unit, turn this switch to "ON." And turn it to "ALL OFF" when it is not used.

**LASER POINTER INDICATOR**

Lights red while laser beam is emitted from Laser Light Window.

**POWER ON-OFF BUTTON**

Used to turn projector on or off. (P20)

**INPUT BUTTON**

Used to select input source. (P23, 24, 30)

**MENU BUTTON**

Used to select MENU operation. (P18, 19)

**POINT BUTTON**

Used to move a pointer on ON-SCREEN MENU, adjust each item, or pan image in DIGITAL ZOOM +/– mode. (P29)
It is also used as a PC mouse in Wireless Mouse Operation. (P41)

✻ When pressing the center of this button, it works as SET button.

**SET BUTTON**

Used to execute the selected item, or to expand or compress the image in DIGITAL ZOOM +/– mode. (P29)
It is also used as a PC mouse in Wireless Mouse Operation. (P41)

**RIGHT CLICK BUTTON**

Used as a PC mouse in Wireless Mouse Operation. (P41)

**LASER BUTTON**

Used to operate Laser Pointer Function. Laser beam is emitted while pressing this button within 1 minute.
When using this Laser Pointer for more than 1 minute, release LASER button and press it again.

**P-TIMER BUTTON**

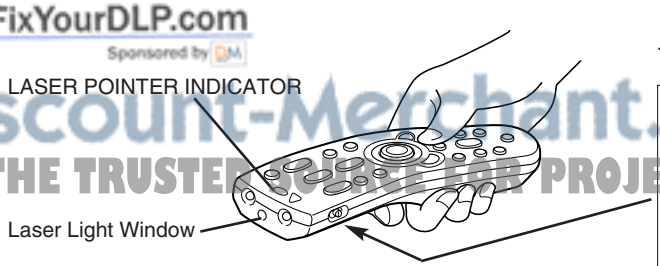

Used to operate P-TIMER function. (P22)

## LASER POINTER FUNCTION

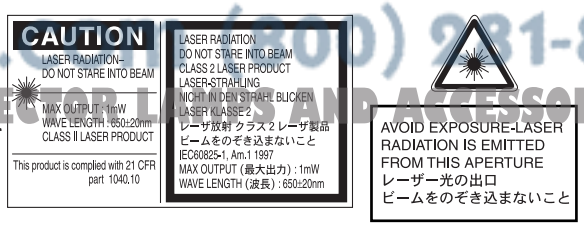

This Remote Control Unit emits a laser beam as the laser pointer function from Laser Light Window. When LASER button is pressed, the laser light goes on. And when LASER button is being pressed for more than 1 minute or LASER button is released, light goes off. LASER POINTER INDICATOR lights RED and Laser is emitted with RED light to indicate laser beam is being emitted.
The laser emitted is a class II laser; therefore, do not look into Laser Light Window or shine the laser beam on yourself or other people. The three marks bellow are the caution labels for the laser beam.

**CAUTION** : Use of controls, adjustments or performance of procedures other than those specified herein may result hazardous radiation exposure.

Used to select LENS SHIFT function. (P21)

### Operating Range

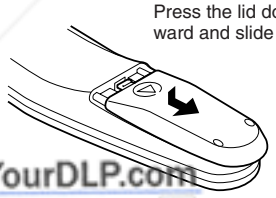

Point Remote Control Unit toward projector (Receiver Window) whenever pressing any button. Maximum operating range for Remote Control Unit is about 16.4' (5m) and 60° in front and rear of the projector.

## Remote Control Batteries Installation

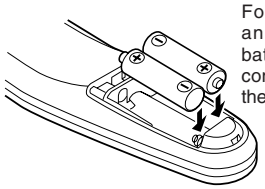

**1** Remove the battery compartment lid.

Press the lid downward and slide it.

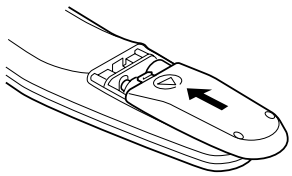

**2** Slide the batteries into the compartment.

**Two AA size batteries**
For correct polarity (+ and –), be sure the battery terminals are in contact with the pins in the compartment.

**3** Replace the compartment lid.

To insure safe operation, please observe the following precautions :

- Use (2) AA, UM3 or R06 type alkaline batteries.
- Replace two batteries at the same time.
- Do not use a new battery with an used battery.
- Avoid contact with water or liquid.
- Do not expose Remote Control Unit to moisture, or heat.
- Do not drop Remote Control Unit.
- If a battery has leaked on Remote Control Unit, carefully wipe the case clean and install new batteries.
- Danger of explosion if battery is incorrectly replaced.
- Dispose of used batteries according to batteries manufacturers instructions and local rules.

# TOP CONTROLS AND INDICATORS

This projector has CONTROL BUTTONS (TOP CONTROLS) and INDICATORS on its top.

**LAMP REPLACE INDICATOR**
Turns to yellow when life of projection lamp draws to an end. (P44)

**WARNING TEMP. INDICATOR**
Flashes red when internal projector temperature is too high. (P42)

**READY INDICATOR**
Lights green when a projector is ready to be turned on. And it flashes green in Power Management mode. (P39)

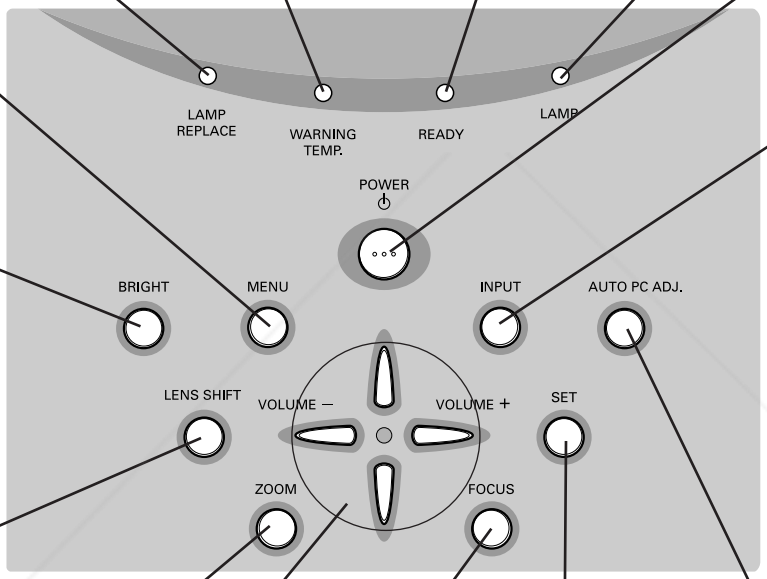

**LAMP INDICATOR**
Becomes dim when a projector is turned on. And bright when a projector is in stand-by mode.

**POWER ON–OFF BUTTON**
Used to turn a projector on or off. (P20)

**MENU BUTTON**
Used to open or close MENU operation. (P18, 19)

**INPUT BUTTON**
Used to select input source. (P23, 24, 30)

**BRIGHT BUTTON**
Used to enhance picture brightness. (P22)

**LENS SHIFT BUTTON**
Used to select LENS SHIFT function. (P21)

**AUTO PC ADJ. BUTTON**
Used to operate AUTO PC Adjustment function. (P25)

**ZOOM BUTTON**
Used to adjust zoom. (P21)

**SET BUTTON**
Used to execute the selected item. It is also used to expand/compress image in DIGITAL ZOOM mode. (P29)

**FOCUS BUTTON**
Used to adjust focus. (P21)

**POINT (VOLUME + / – ) BUTTONS**
Used to select an item or adjust value in ON-SCREEN MENU. They are also used to pan image in DIGITAL ZOOM +/– mode. (P29) POINT LEFT/RIGHT buttons are also used as VOLUME +/– buttons.

# OPERATING ON-SCREEN MENU

## HOW TO OPERATE ON-SCREEN MENU

You can control and adjust this projector through ON-SCREEN MENU. Refer to following pages to operate each adjustment on ON-SCREEN MENU.

**1 DISPLAY MENU**

Press MENU button to display ON-SCREEN MENU.

**2 MOVING POINTER**

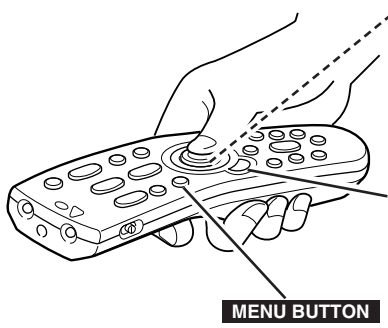

Move pointer (✻ see below) or adjust value of item by pressing POINT button(s) on Top Control or on Remote Control Unit.

✻ Pointer is icon on ON-SCREEN MENU to select item. See figures on section "FLOW OF ON-SCREEN MENU OPERATION" below.

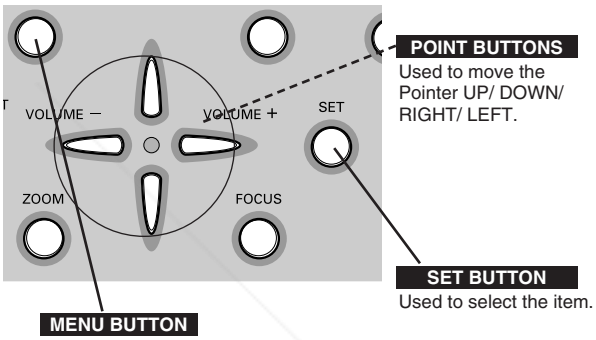

**3 SELECT ITEM**

Select item or set selected function by pressing SET button.

**WIRELESS REMOTE CONTROL**

**TOP CONTROL**

## FLOW OF ON-SCREEN MENU OPERATION

**Display ON-SCREEN MENU**

*1* Press MENU button to display ON-SCREEN MENU (MENU BAR). A red frame is POINTER.

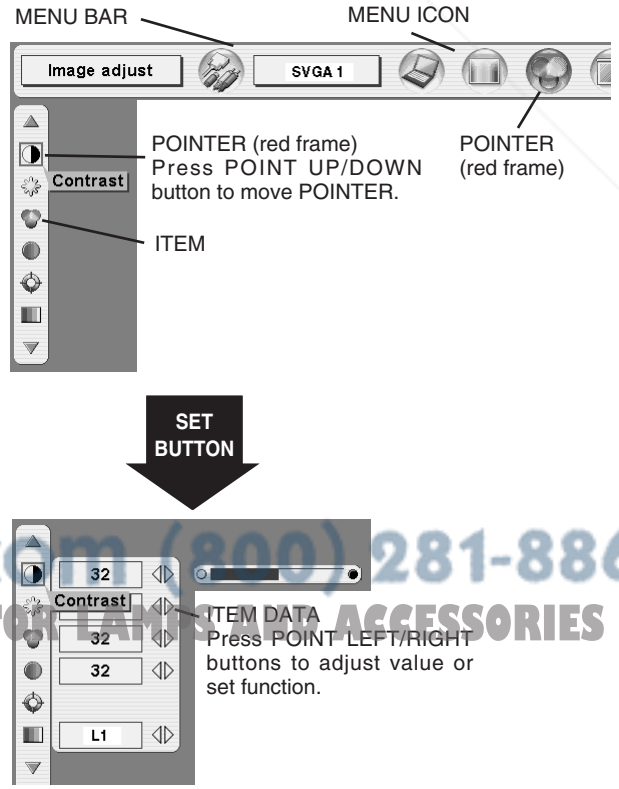

**Select Menu to be adjusted**

*2* Move POINTER (red frame) to MENU ICON that you want to select by pressing POINT RIGHT / LEFT buttons.

**Control or adjust item through ON-SCREEN MENU**

*3* Press POINT UP/DOWN button and move POINTER (red frame or red arrow) to ITEM that you want to adjust, and then press SET button to show ITEM DATA.

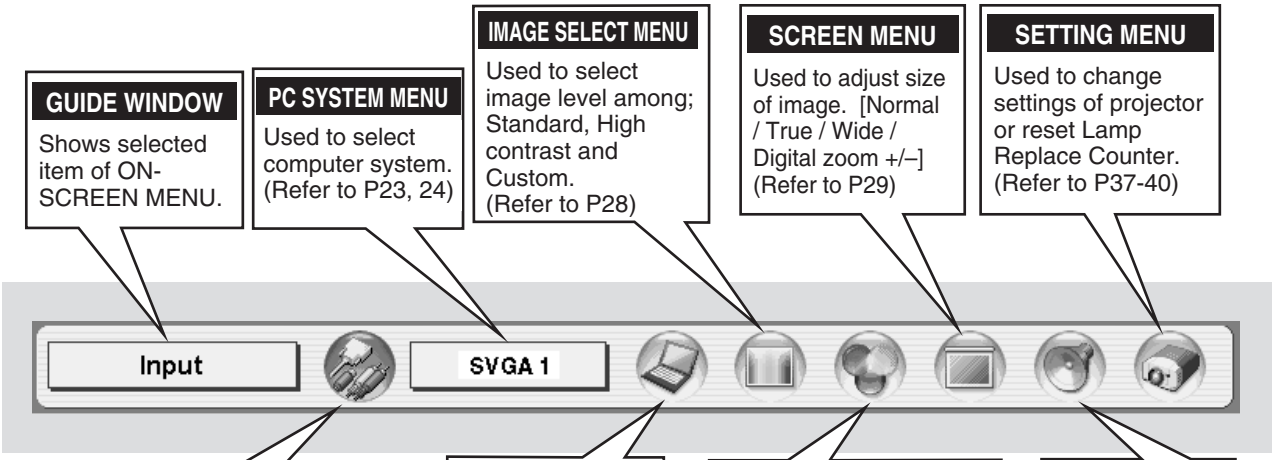

*4* Adjust ITEM DATA by pressing POINT RIGHT / LEFT buttons.
Refer to following pages for details of respective adjustments.

# TURNING ON / OFF PROJECTOR

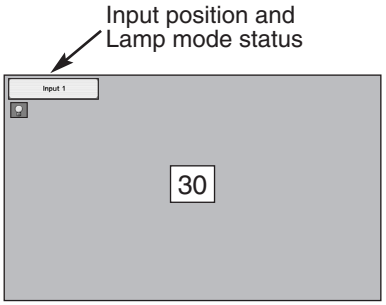

## TURNING ON PROJECTOR

*1* Complete peripheral connections (with Computer, VCR, etc.) before turning on projector. (Refer to "CONNECTING TO PROJECTOR" on pages 12~14 for connecting that equipment.)

*2* Connect a projector's AC Power Cord into an AC outlet. LAMP Indicator lights RED, and READY Indicator lights GREEN.

NOTE : When “On start” function is ON, this projector is turned on automatically by connecting AC Power Cord to an AC outlet. (Refer to page 39.)

*3* Press POWER ON-OFF button on Top Control or on Remote Control Unit to ON. LAMP Indicator dims, and Cooling Fans start to operate. Preparation Display appears on a screen and count-down starts. Signal from PC or Video source appears after 30 seconds.
Current Input position and Lamp mode status are also displayed on screen for 5 seconds. (Refer to "LAMP MODE" on page 37.)

Preparation Display disappears after 30 seconds.

## TURNING OFF PROJECTOR

*1* Press POWER ON-OFF button on Top Control or on Remote Control Unit, and a message "Power off?" appears on a screen.

*2* Press POWER ON-OFF button again to turn off projector. LAMP Indicator lights bright and READY Indicator turns off. After projector is turned off, Cooling Fans operate (for 90 seconds). During this "Cooling Down" period, projector cannot be turned on.

*3* When projector has cooled down, READY Indicator lights GREEN again and you can turn projector on. After cooling down completely, disconnect AC Power Cord.

Message disappears after 4 seconds.

TO MAINTAIN LIFE OF LAMP, ONCE YOU TURN PROJECTOR ON, WAIT AT LEAST 5 MINUTES BEFORE TURNING IT OFF.

When “Power Management” function mode is Ready or Shut down, projector detects signal interruption and turns off the Projection Lamp automatically. Refer to “Power management” on page 39.

When WARNING TEMP. Indicator is flashing, projector cannot be turned on, refer to the section "MAINTENANCE" on page 42.
When the both WARNING TEMP. and READY Indicator flashing, refer to the section "MAINTENANCE" on page 42.

Do not use the projector continuously for 24 hours or more. If using the projector continuously for long periods, turn it off and leave it for one hour at least once during a 24 hour period.
If you use the projector continuously for long period, it can excessively shorten the life of the lamp.

# ADJUSTING SCREEN

## ZOOM ADJUSTMENT

1. Press ZOOM button on Top Control or ZOOM ▲/▼ button on Remote Control Unit. Message “Zoom” is displayed.
2. Press ZOOM ▲ button or POINT UP button to make image larger, and press ZOOM ▼ button or POINT DOWN button to make image smaller.

Message disappears after 4 seconds.

## FOCUS ADJUSTMENT

1. Press FOCUS button on Top Control or FOCUS ▲/▼ button on Remote Control Unit. Message “Focus” is displayed.
2. Adjust focus of image by pressing FOCUS ▲/▼ button or POINT UP/DOWN button(s) .

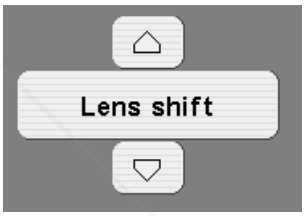

NOTE;
Focus adjustment may not function properly if the image is corrected by KEYSTONE adjustment.

Message disappears after 4 seconds.

## LENS SHIFT ADJUSTMENT

1. Press LENS SHIFT button on Top Control or LENS SHIFT ▲/▼ button on Remote Control Unit. Message “Lens shift” is displayed.
2. Press POINT UP button or LENS SHIFT ▲ button to move image up, press POINT DOWN or LENS SHIFT ▼ button to move image down.

Message disappears after 4 seconds.

## KEYSTONE ADJUSTMENT

If a projected picture has keystone distortion, correct the image with KEYSTONE adjustment.

1. Press KEYSTONE button on Remote Control Unit or select Keystone on SETTING menu. (Refer to page 37.) Keystone dialog box appears.
2. Correct keystone distortion by pressing POINT UP/DOWN/LEFT/RIGHT button(s). Press POINT UP button to reduce the upper part of the image, and press POINT DOWN button to reduce the lower part. Press POINT LEFT button to reduce the left part, and press POINT RIGHT button to reduce the right part.

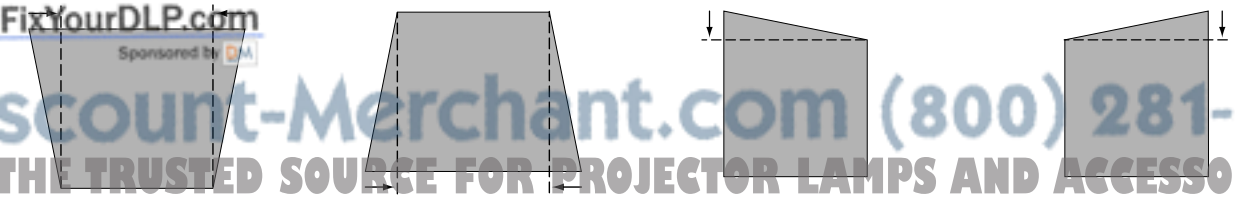

- Arrows are white in no correction.
- Arrow(s) of direction being corrected turn(s) red.
- Arrow(s) disappear(s) at the maximum correction.
- If you press the KEYSTONE button on Top Control or on Remote Control Unit once more while the keystone dialog box is being displayed, the keystone adjustment will be canceled.

Reduce the upper width with POINT UP button.

Reduce the lower width with POINT DOWN button.

Reduce the left part with POINT LEFT button.

Reduce the right part with POINT RIGHT button.

## PICTURE FREEZE FUNCTION

Press FREEZE button on Remote Control Unit to freeze picture on-screen. To cancel FREEZE function, press FREEZE button again or press any other button.

## TURBO BRIGHT FUNCTION

Turbo Bright System enhances picture brightness. When BRIGHT button is pressed to on, the message "Bright on" is displayed and BRIGHT button lights orange. To return to original picture brightness, press BRIGHT button again.

✻ When Turbo Bright System is set to on, the color of image may change slightly.

Message disappears after 4 seconds.

## NO SHOW FUNCTION

Press NO SHOW button on Remote Control Unit to black out image. To restore to normal, press NO SHOW button again or press any other button.

Message disappears after 4 seconds.

## P-TIMER FUNCTION

Press P-TIMER button on Remote Control unit. Timer display "00 : 00" appears on screen and timer starts to count time (00 : 00 ~ 59 : 59).
To stop P-TIMER display, press P-TIMER button. And then, press P-TIMER button again to cancel P-TIMER function.

# SOUND ADJUSTMENT

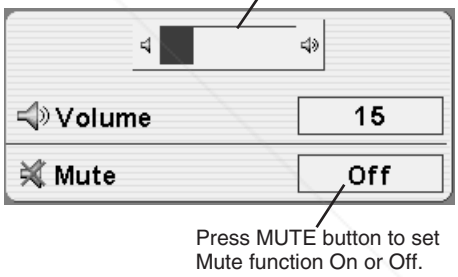

## DIRECT OPERATION

**Volume**

Press VOLUME (+/–) button(s) on Top Control or on Remote Control Unit to adjust volume. Volume dialog box appears on screen for a few seconds.
(+) button to increase volume, and (–) button for decreasing.

**Mute**

Press MUTE button on Remote Control Unit to cut off sound. To restore sound to its previous level, press MUTE button again or press Volume (+/–) button(s).

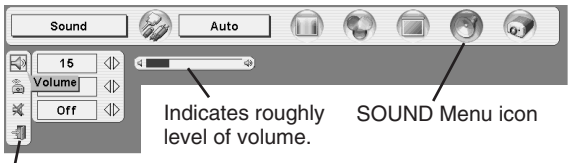

Display disappears after 4 seconds.

## MENU OPERATION

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to SOUND Menu icon.

*2* Press POINT UP/DOWN button to move a red frame pointer to item that you want to select, and then press SET button.

**SOUND MENU**

**Volume**

To increase volume, press POINT RIGHT button, and press POINT LEFT button for decreasing.

**Built-in SP.**

Press POINT LEFT/RIGHT button(s) to switch built-in speaker on and off.

**Mute**

Press POINT LEFT/RIGHT button(s) to cut off sound. Dialog box display is changed to "On" and sound is cut off. To restore sound to its previous level, press POINT LEFT/RIGHT button(s) again.

# SELECTING INPUT SOURCE

## DIRECT OPERATION

Select INPUT source by pressing INPUT button on Top Control or on Remote Control Unit.
If projector cannot reproduce proper image, select correct input source through MENU OPERATION (see below).

**INPUT button**

**NOTE**

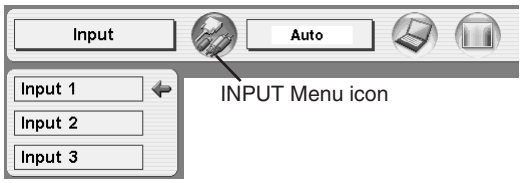

- Input 1 terminal is switchable and can be used as computer input or monitor output.

* Input 1 is not displayed when the Input 1 is used as Monitor out.

## MENU OPERATION

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to INPUT Menu icon.

*2* Press POINT UP/DOWN button and a red-arrow icon will appear. Move arrow to INPUT source that you want to select, and then press SET button.

# SELECTING COMPUTER SYSTEM

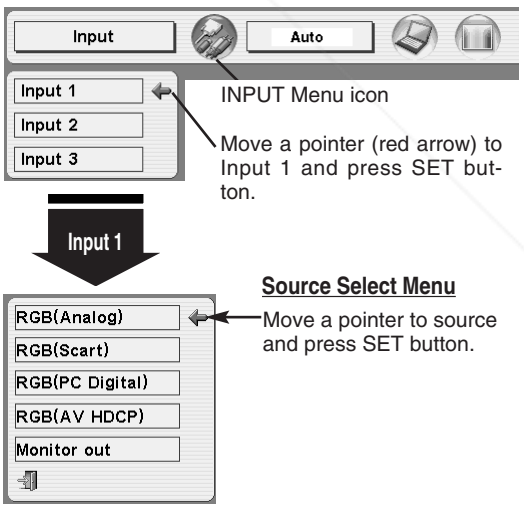

## WHEN SELECT INPUT 1 (COMPUTER INPUT TERMINALS )

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to INPUT Menu icon.

*2* Press POINT UP/DOWN button to move a red arrow pointer to Input 1 and then press SET button. Source Select Menu will appear.

*3* Move a pointer to source that you want to select and then press SET button.

**INPUT MENU**

**RGB(Analog)**

When your computer is connected to INPUT 1 (ANALOG) terminal, select RGB(Analog).

**RGB(Scart)**

When video equipment is connected to INPUT 1 (ANALOG) terminal, select RGB(Scart).

**RGB(PC Digital)**

When your computer is connected to INPUT 1 (DIGITAL) terminal, select RGB(PC Digital).

**RGB(AV HDCP)**

If a HDCP-compatible signal source is connected to the INPUT 1 (DIGITAL) terminal, select RGB(AV HDCP).

**Monitor out**

If the INPUT 1 ANALOG terminal is being used as a MONITOR OUT terminal, select Monitor out.

NOTE;
HDCP (High-bandwidth Digital Content Protection) is a system for protecting digital entertainment content which is delivered by DVI (Digital Visual Interface) from being copied. The specification of HDCP is decided and controlled by Digital Content Protection, LLC. Should the specification be changed, this projector may not display the digital content protected by HDCP.

## WHEN SELECT INPUT 2 (5 BNC INPUT JACKS )

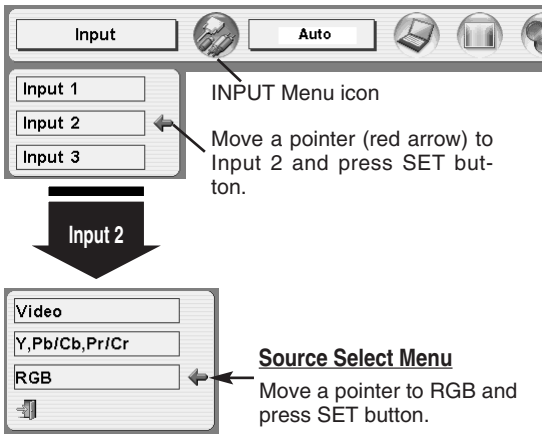

When connect a computer output [5 BNC Type (Green, Blue, Red, Horiz. Sync and Vert. Sync.)] from a computer to G, B, R, H/HV and V jacks.

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to INPUT Menu icon.

*2* Press POINT UP/DOWN button to move a red arrow pointer to Input 2 and then press SET button. Source Select Menu will appear.

*3* Press POINT UP/DOWN button and a red-arrow icon will appear. Move arrow to "RGB", and then press SET button.

**INPUT MENU**

## AUTOMATIC MULTI-SCAN SYSTEM

This projector automatically tunes to most different types of computers based on VGA, SVGA, XGA or SXGA (refer to "COMPATIBLE COMPUTER SPECIFICATION" on page 49). When a computer is selected, this projector automatically tunes to incoming signal and projects the proper image without any special setting. (Some computers need to be set manually.)

The projector displays one of the Auto, -----, Mode 1/2/3/4/5, or the system provided in the projector.

**Auto** When projector cannot recognize connected signal as PC system provided in this projector, Auto PC Adjustment function operates to adjust projector and message "Auto" is displayed on SYSTEM Menu icon.
When image is not provided properly, manual adjustment is required. (Refer to P26 and 27.)

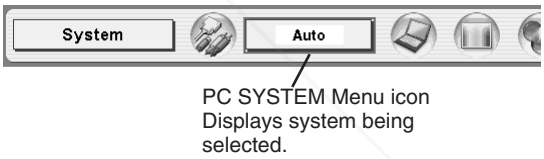

**——** There is no signal input from computer. Make sure connection of computer and a projector is set correctly. (Refer to TROUBLESHOOTING on page 46.)

**Mode 1** User preset adjustment in MANUAL PC ADJUSTMENT. Adjustment data can be stored in the Mode 1-5.

**SVGA 1** Computer systems provided in the projector. The projector chooses proper system and displays it.

* Mode 1 and SVGA 1 are examples.

**PC SYSTEM MENU**

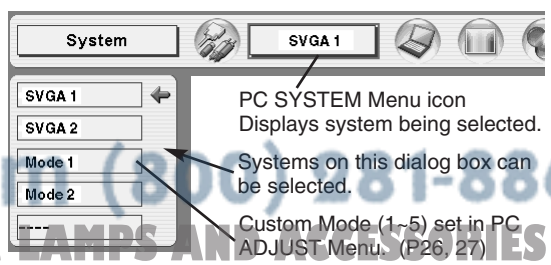

## SELECT COMPUTER SYSTEM MANUALLY

This projector automatically selects PC system among those provided in this projector and PC system can be also selected manually.

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to PC SYSTEM Menu icon.

*2* Press POINT UP/DOWN button to move a red arrow pointer to system that you want to set, and then press SET button.

# PC ADJUSTMENT

## AUTO PC ADJUSTMENT

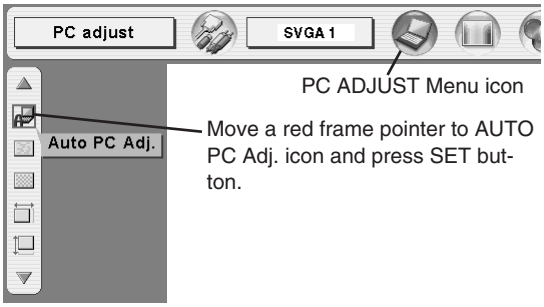

Auto PC Adjustment function is provided to automatically adjust Fine sync, Total dots and Picture Position to conform to your computer. Auto PC Adjustment function can be operated as follows.

**Auto PC Adj.**

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to PC ADJUST Menu icon.

*2* Press POINT UP/DOWN button to move a red frame pointer to AUTO PC Adj. icon and then press SET button.
This Auto PC Adjustment can be also executed by pressing AUTO PC ADJ. button on Top Control or on Remote Control Unit.

**PC ADJUST MENU**

Store adjustment parameters.
Adjustment parameters from Auto PC Adjustment can be memorized in this projector. Once parameters are memorized, setting can be done just by selecting Mode in PC SYSTEM Menu (P24). Refer to step 3 of MANUAL PC ADJUSTMENT section (P27).

**NOTE**

- Fine sync, Total dots and Picture Position of some computers can not be fully adjusted with this Auto PC Adjustment function. When image is not provided properly through this function, manual adjustments are required. (Refer to page 26, 27.)
- Auto PC Adjustment function cannot be operated in Digital Signal input on DVI terminal and “480p”, “575p”, “480i”, “575i” “720p (HDTV)”, “1035i (HDTV)” or “1080i (HDTV)” is selected on PC SYSTEM Menu.

## MANUAL PC ADJUSTMENT

This projector can automatically tune to display signals from most personal computers currently distributed. However, some computers employ special signal formats which are different from standard ones and may not be tuned by Multi-Scan system of this projector. If this happens, projector cannot reproduce a proper image and image may be recognized as a flickering picture, a non-synchronized picture, a non-centered picture or a skewed picture.
This projector has a Manual PC Adjustment to enable you to precisely adjust several parameters to match with those special signal formats. This projector has 5 independent memory areas to memorize those parameters manually adjusted. This enables you to recall setting for a specific computer whenever you use it.

Note : This PC ADJUST Menu cannot be operated when in digital signal input on DVI terminal is selected on PC SYSTEM MENU (P24).

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to PC ADJUST Menu icon.

*2* Press POINT UP/DOWN button to move a red frame pointer to item that you want to adjust and then press SET button. Adjustment dialog box will appear. Press POINT LEFT/RIGHT button to adjust value.

**Fine sync**

Adjusts an image as necessary to eliminate flicker from display. Press POINT LEFT/RIGHT button to adjust value. (From 0 to 31.)

**Total dots**

Adjust the number of total dots in one horizontal period. Press POINT LEFT/RIGHT button(s) and adjust number to match your PC image.

**Horizontal**

Adjusts horizontal picture position. Press POINT LEFT/RIGHT button(s) to adjust position.

**Vertical**

Adjusts vertical picture position. Press POINT LEFT/RIGHT button(s) to adjust position.

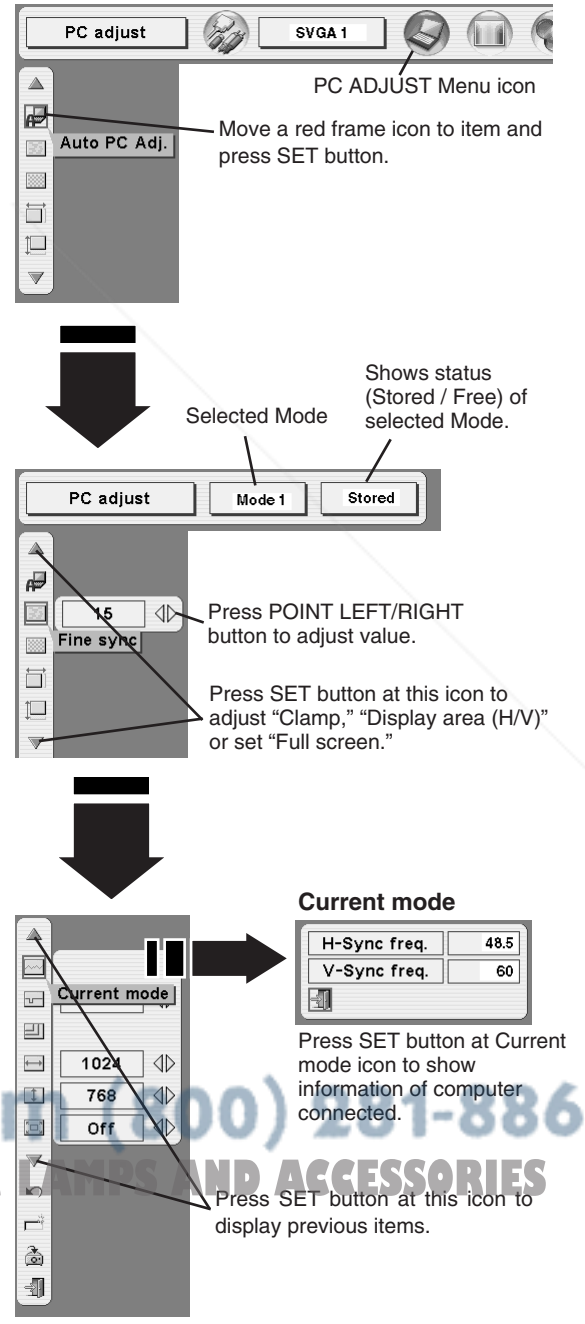

**Current mode**

Press SELECT button to show information of computer selected.

**Clamp**

Adjusts clamp position. When image has a dark bar(s), try this adjustment.

**PC ADJUST MENU**

# PICTURE SCREEN ADJUSTMENT

This projector has a picture screen resize function, which enables you to display desirable image size.

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SCREEN Menu icon.

*2* Press POINT UP/DOWN button and move a red frame pointer to function that you want to select and then press SET button.

**SCREEN MENU**

**Normal**

Provides image to fit screen size.

**True**

Provides image in its original size. When original image size is larger than screen size (1024 x 768), this projector enters “Digital zoom +” mode automatically.

**Wide**

Provides image to fit wide video aspect ratio (16 : 9) by expanding image width uniformly. This function can be used for providing a squeezed video signal at 16 : 9.

**Digital zoom +**

When Digital zoom + is selected, ON-SCREEN MENU disappears and message “D. Zoom +” is displayed. Press SET button to expand image size. And press POINT UP/DOWN/LEFT/RIGHT button(s) to pan image. Panning function can work only when image is larger than screen size.
A projected image can be also expanded by pressing D.ZOOM ▲ button on Remote Control Unit.

**Digital Zoom –**

When Digital zoom – is selected, ON-SCREEN MENU disappears and message “D. Zoom –” is displayed. Press SET button to compress image size.
A projected image can be also compressed by pressing D.ZOOM ▼ button on Remote Control Unit.

To cancel Digital Zoom +/– mode, press any button except D.ZOOM ▲/▼, SET, POINT and LASER buttons.

**NOTE**

- True and Digital zoom +/– cannot be operated when “480i”, “575i”, “480p”, “575p”, “1035i (HDTV)” or “1080i (HDTV)” is selected on PC SYSTEM Menu (P24).
- Wide cannot be selected when “720p (HDTV)”, “1035i (HDTV)” or “1080i (HDTV)” is selected on PC SYSTEM Menu (P24).
- This projector cannot display any resolution higher than 1280 X 1024. If your computer’s screen resolution is higher than 1280 X 1024, reset resolution to lower before connecting projector.
- Image data in other than XGA (1024 x 768) is modified to fit screen size in initial mode.
- Panning function may not operate properly if computer system prepared on PC ADJUST Menu is used.

# SETTING MENU

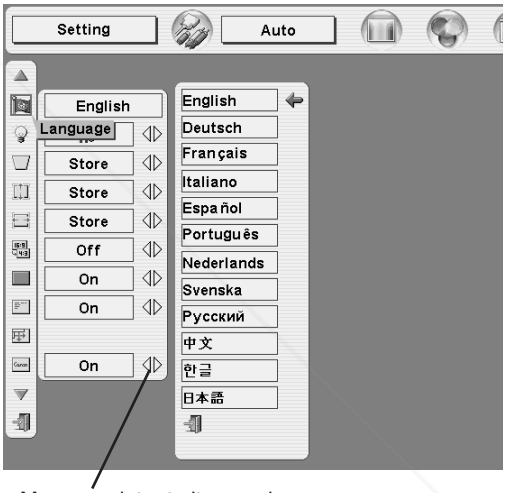

*1* Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red-frame pointer to SETTING icon.

*2* Press POINT DOWN button to move a red-frame pointer to item that you want to set and then press SET button. Setting dialog box appears.

**SETTING MENU**

When pressing SET button at Language, Language Menu appears.

Move a pointer to item and then press POINT LEFT/RIGHT button(s).

## Language

Language used in ON-SCREEN MENU is selectable from among English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean and Japanese.

## Lamp mode

When selecting the Lamp mode, the projector reduce the brightness and set into the low power consumption mode.

| | |
|---|---|
| Normal mode | |
| Auto mode | The brightness is adjusted automatically to a level that is suitable for the screen. |
| Silent mode | The brightness is reduced to 80% of Normal mode. |

## Keystone

When the image is distorted, select Keystone. ON-SCREEN MENU disappears and Keystone dialog box is displayed.

Store ··· Store the keystone adjustment data when disconnect AC Power Cord from an AC outlet.

Reset ··· Reset the keystone adjustment data when disconnect AC Power Cord from an AC outlet.

When a SET button is pressed, the mode changes to keystone adjustment mode. Correct keystone distortion by pressing POINT UP/DOWN/LEFT/RIGHT button(s). Refer to KEYSTONE ADJUSTMENT on page 21.

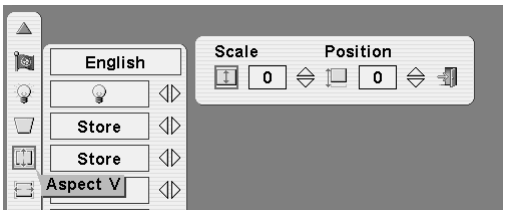

## Aspect V  Aspect H

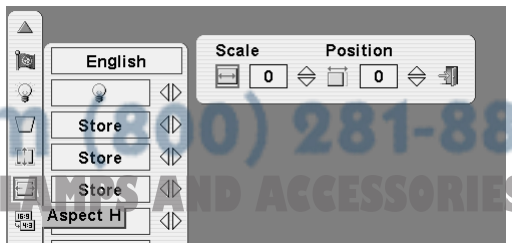

These adjust the vertical and horizontal scale and position of the screen. Use the POINT RIGHT/LEFT button(s) to select Store or Reset.

Store ··· Store the adjustment data when disconnect AC Power Cord from an AC outlet.

Reset ··· Reset the adjustment data when disconnect AC Power Cord from an AC outlet.

When a SET button is pressed, the mode changes to Scale or Position adjustment mode. Use the POINT LEFT/RIGHT button(s) to select whether you wish to adjust Scale or Position, and then use the POINT UP/DOWN button(s) to adjust the values.

**NOTE :**
When the Aspect H/V is adjusted and the keystone adjustment is made, the adjustment data for the Aspect H/V is cleared.

To maintain the adjustment data, perform keystone adjustment first, and then adjust the Aspect H/V.

## Power management

This projector is equipped with a power management function. When the input signal is interrupted and any button is not pressed for 30 seconds or more, the power management function operates in order to reduce power consumption and conserve lamp operating time. The factory default settings for power management are "Ready" and "5 Min".

OPERATION

1) If the input signal is interrupted and any button is not pressed for 30 seconds or more, the message "No signal" and the timer display appears on the screen. Then the count-down starts for the time being set.

If "Ready" is selected

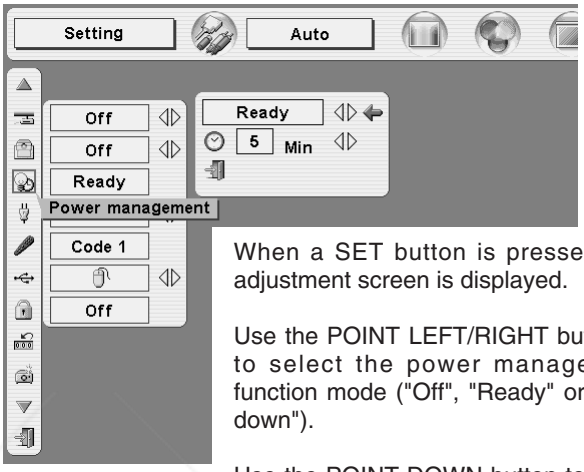

2) When the set time is elapsed, the lamp will be switched off and lamp cooling starts. The READY indicator will be switched off while the lamp cooling is in progress, and the projector cannot be operated during this time.
3) When the lamp cooling is completed, the READY indicator starts flashing to notify the operator that power management mode is active. In this condition, the lamp will turn on and images will be projected if a signal starts being input or the projector is operated.

If "Shut down" is selected

2) When the set time is elapsed, the lamp will be switched off and lamp cooling starts. The READY indicator will be switched off while the lamp cooling is in progress, and the projector cannot be operated during this time.
3) When the lamp cooling is completed, the power switches off.

If "Off" is selected

The power management function is canceled.

When a SET button is pressed, the adjustment screen is displayed.

Use the POINT LEFT/RIGHT button(s) to select the power management function mode ("Off", "Ready" or "Shut down").

Use the POINT DOWN button to move the pointer to the time setting, and then use the POINT LEFT/RIGHT button(s) to set the time (1 minute to 30 minutes).

Time left until Lamp off.

## On start

When this function is “On,” projector is automatically turned on just by connecting AC Power cord to a wall outlet.

Note ; Be sure to turn projector off properly (refer to section “TURNING OFF PROJECTOR” on P20). If projector is turned off in wrong steps, On Start function does not operate properly.

## Remote control

This projector has two different remote control codes; the factory-set normal code (Code 1) and the secondary code (Code 2). This switching function prevents remote control operation mixture (jam) when operating several projectors or video equipment together.
When operating projector in “Code 2,” both projector and Remote Control Unit must be switched to “Code 2.”

**To change the code of Projector;**

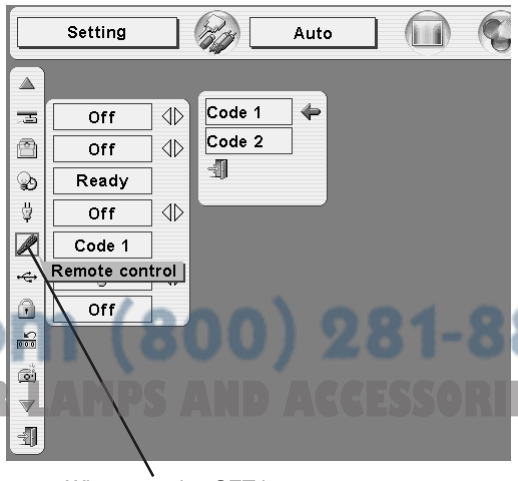

To change the Remote control code of the projector used in ON-SCREEN MENU is selectable from Code 1 to Code 2.

**To change the code of the Remote Control Unit;**

Press both MENU and IMAGE buttons on Remote Control Unit together for over 10 seconds.

After changing the code, make sure Remote Control operates properly.
To return to the normal code (Code 1), operate both projector and Remote Control in the ways above again.

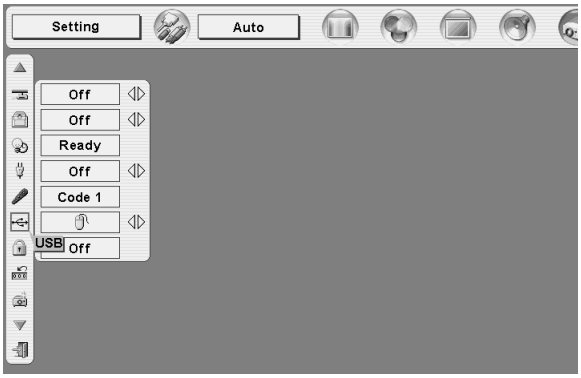

NOTE : When batteries of Remote Control Unit are replaced or ALL-OFF switch is turned to “ALL-OFF,” the remote transmit code automatically returns to the normal code (Code 1).

When pressing SET button at Remote control, Remote control code Menu appears.

## USB

This Projector is equipped with USB port for interactive operation between a projector and computer. Set mode following steps below.

**Wireless Mouse mode**

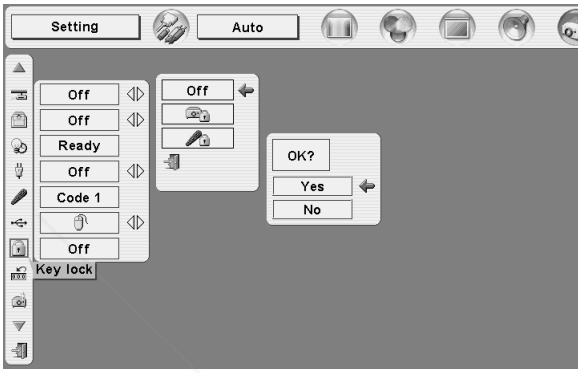

Select " " when controlling a computer with Remote Control of this projector.

**Projector mode**

Select " " when controlling a projector with computer.

**NOTE:** This is provided not for basic operation but for future use.

## Key lock

This function locks the operation of the projector's control panel and the remote control.

This locks operation of the projector's control panel.

This locks operation of the remote control.

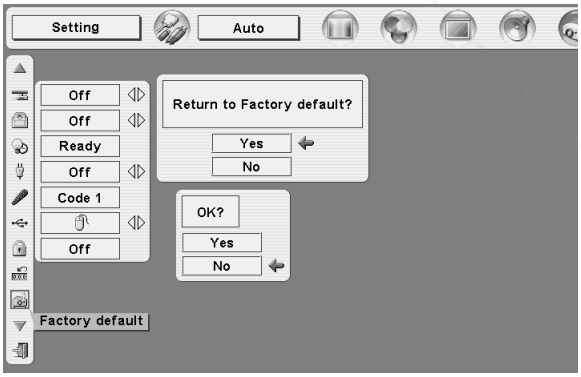

Off This cancels the Key lock function.

If the projector's control panel accidentally becomes locked and you do not have the remote control nearby, disconnect the AC cord to turn off the power, and then while pressing a SET button, reinsert the AC cord, This will cancel the projector's control panel lock.

## Lamp counter reset

This function is used to reset Lamp Replace Counter. When replacing Projection Lamp, reset Lamp Replace Counter by using this function. Refer to page 45 for operation.

## Factory default

This function returns all setting values except for the lamp counter to the factory default settings.

Press POINT UP/DOWN button to move a red frame pointer to “Factory default” and then press SET button. The message "Return to Factory default?" is displayed. Move the pointer to [Yes] and then press SET button.
Another confirmation dialog box appears and select [Yes] and then press SET button. Return the projector to Factory default.

# OPERATING WIRELESS MOUSE

Wireless Remote Control Unit is not only able to operate this projector but also function as a wireless mouse for most Personal Computers. POINT buttons and two CLICK buttons are used for wireless mouse operation.
This Wireless Mouse function is available only when PC mouse pointer is displayed on a projected screen. When ON-SCREEN MENU or any message / dialog box is displayed on the screen instead of PC mouse pointer, this Wireless Mouse function cannot be used.

## INSTALLATION

To use Wireless Remote Control Unit as Wireless Mouse for a Personal Computer, installation of the mouse driver (not supplied) is required. Make sure that the mouse driver is properly installed in your computer. And make sure that the mouse port (or USB port) of a Personal Computer is activated.

1. Connect the mouse port (or USB port) of your computer to Control Port (or USB connector) of this projector with Control Cable (or USB cable). (Refer to page 12, 13 for connection.)
2. Turn the projector on first, and then turn on your computer. When the computer is switched on first, Wireless Mouse may not work properly.

Note : When your computer has no mouse port, connect Serial Port of your computer to Control Port of the projector with Control Cable for Serial Port (not supplied).

## OPERATING WIRELESS MOUSE

When controlling a PC mouse pointer, operate Wireless Mouse with POINT button, SET button, and RIGHT CLICK button on Wireless Remote Control Unit.

**POINT button**

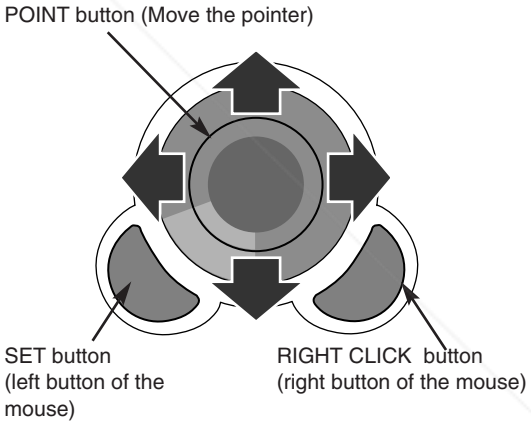

Used to move PC mouse pointer. The pointer is moved corresponding with the direction you are pressing.

**SET (LEFT CLICK) button**

This button has the same function as the left button in a PC mouse.

**RIGHT CLICK button**

This button has the same function as the right button in a PC mouse. This button is not available for controlling this projector.

# MAINTENANCE

## WARNING TEMP. INDICATOR

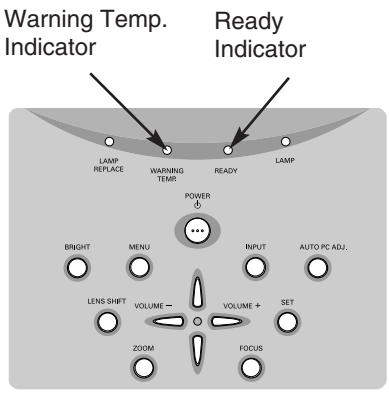

The Warning Temp. Indicator flashes red to let you know the internal temperature of the projector exceeds the normal level. If the temperature goes up further, the projector will be turned off automatically and the Ready indicator will go out. (The Warning Temp. Indicator continues flashing.) After the cooling-off period, the Ready Indicator lights on again and the projector can be turned on by pressing the On/Off button on the remote control unit or on the top control. When you turn on the projector, the Warning Temp. Indicator will go out.
If the Warning Temp. Indicator is still flashing, check the followings;

*1* Ventilation Slots of a projector may be blocked. In such an event, reposition a projector so that Ventilation Slots are not obstructed.

*2* Air Filter may be clogged with dust particles. Clean Air Filter by following section AIR FILTER CARE AND CLEANING on next page.

*3* If WARNING TEMP. Indicator remains on after performing above checks, Cooling Fans or Internal Circuits may be malfunctioning. Contact service personnel from an authorized dealer or a service station.

**TOP CONTROL**

## When both of the Warning Temp. and Ready indicators are flashing:

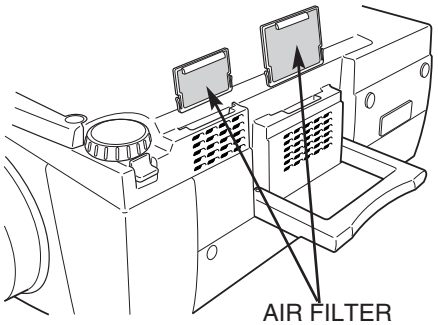

When the projector detects an internal problem, it will shut down automatically and both of the Warning temp. and Ready Indicators starts flashing. In this condition, the projector cannot be turned on even if you press the On/Off button on the remote control unit or on the top control. If this case happenes, disconnect and reconnect the AC power cord, and then turn on the projector again to check its operation. If the projector shuts down again or fails to be turned on, the internal check and repair will be required. Plug off the AC power cord and contact service station.

FixYourDLP.com

Discount-Merchant.com (800) 281-8860
THE TRUSTED SOURCE FOR PROJECTOR LAMPS AND ACCESSORIES

## AIR FILTER CARE AND CLEANING

Air Filter prevents dust from accumulating on surface of Projection Lens and Projection Mirror. Should Air Filter become clogged with dust particles, it will reduce Cooling Fans' effectiveness and may result in internal heat build up and adversely affect life of a projector. Clean Air Filter following steps below:

1. Turn off a projector, and disconnect AC power cord from AC outlet.
2. Turn a projector upside down and remove Air Filter (2 used) by pulling latches upward.
3. Clean Air Filter with a brush or wash out dust and particles.
4. Replace Air Filter properly. Make sure that Air Filter is fully inserted.

AIR FILTER
Pull up and remove.

**CAUTION**
Do not operate a projector with Air Filter removed. Dust may accumulate on LCD Panel and Projection Mirror degrading picture quality.
Do not put small parts into Air Intake Vents. It may result in malfunction of a projector.

**RECOMMENDATION**

**We recommend avoiding dusty/smoky environments when operating a projector. Usage in these environments may cause poor image quality.**

When using under dusty or smoky conditions, dust may accumulate on a lens, liquid crystal panels, or optical elements inside a projector. This condition may degrade quality of a projected image.
When above symptoms are noticed, contact your authorized dealer or service station for proper cleaning.

## CLEANING PROJECTION LENS

Follow these steps to clean Projection Lens:

1. Apply a non-abrasive camera lens cleaner to a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents or other harsh chemicals might scratch a surface.
2. Lightly wipe a cleaning cloth over Projection Lens.
3. When a projector is not in use, replace Lens Cover.

# LAMP REPLACEMENT

## LAMP REPLACE

When the life of the Projection Lamp of this projector draws to an end, the LAMP REPLACE indicator lights yellow. If this indicator lights yellow, replace the projection lamp with a new one promptly.

This indicator lights yellow when the life of the projection lamp draws to an end. Replace the Projection Lamp with a new one promptly.

**TOP CONTROL**

Allow a projector to cool, for at least 45 minutes before you open Lamp Cover. The inside of a projector can become very hot.

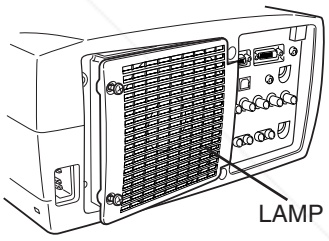

**⚠ CAUTION**

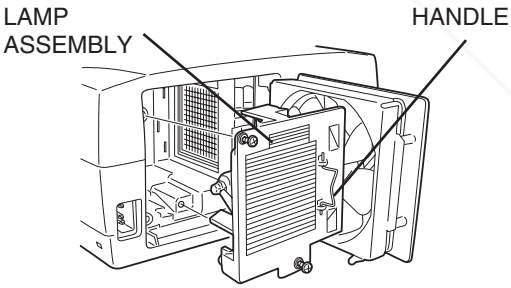

For continued safety, replace with a lamp assembly of the same type.
Do not drop a lamp assembly or touch a glass bulb! The glass can shatter and may cause injury.

Follow these steps to replace lamp assembly.

1. Turn off a projector and disconnect AC plug. Allow a projector to cool for at least 45 minutes.
2. Loosen 2 screws with a screwdriver and open Lamp Cover.
3. Loosen 2 screws with a screwdriver and pull out Lamp Assembly by grasping Handle.
4. Replace Lamp Assembly with a new one and tighten 2 screws back. Make sure that Lamp Assembly is set properly. Replace Lamp Cover and tighten 2 screws.
5. Connect AC Power Cord to a projector and turn it on.
6. Reset Lamp Replace Counter (refer to next page “Lamp Replace Counter” section).

**NOTE :** Do not reset Lamp Replace Counter when Projection Lamp is not replaced.

FixYourDLP.com

### ORDER REPLACEMENT LAMP

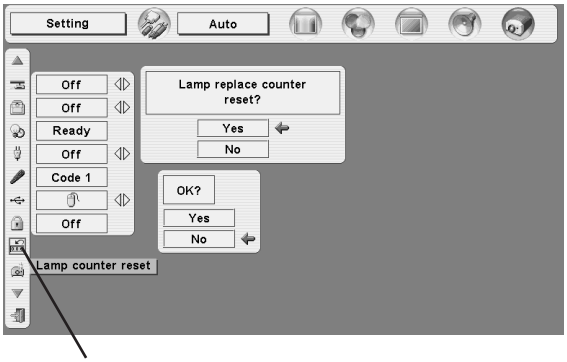

Replacement Lamp can be ordered through your dealer. When ordering a Projection Lamp, give the following information to the dealer.

- **Model No. of your projector : LV-7565U/LV-7565FU/LV-7565E/LV-7565FE**
- **Replacement Lamp Type No. : LV-LP22**
  (610 314 9127)

## LAMP REPLACE COUNTER

Be sure to reset the Lamp Replace Counter after the Lamp Assembly is replaced. When the Lamp Replace Counter is reset, the LAMP REPLACE Indicator stops lighting.

1. Turn projector on, press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SETTING Menu icon (refer to page 40).
2. Press POINT UP/DOWN button to move a red frame pointer to “Lamp counter reset” and then press SET button. The message "Lamp replace counter reset?" is displayed. Move the pointer to [Yes] and then press SET button.
3. Another confirmation dialog box appears and select [Yes] to reset Lamp Replace Counter.

Move the pointer to Lamp counter reset and then press SET button. The message “Lamp replace counter reset?” is displayed.

**NOTE : Do not reset the Lamp Replace Counter until after the Projection Lamp is replaced.**

## LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard.

- Lamp lifetime may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same lifetime for each lamp. Some lamps may fail or terminate their lifetime in a shorter period of time than other similar lamps.
- If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE INDICATOR lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. ( Follow carefully the instructions in the LAMP REPLACEMENT section of this manual. ) Continuous use of the lamp with the LAMP REPLACE INDICATOR lighted may increase the risk of lamp explosion.
- A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

### IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.

If a lamp explodes, disconnect the projector’s AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.

# TROUBLESHOOTING

Before calling your dealer or service center for assistance, check matters below once again.

1. Make sure you have connected a projector to your computer or video equipment as described in section "CONNECTING PROJECTOR" on pages 12 ~ 14.
2. Check cable connection. Verify that all computer, video and power cord are properly connected.
3. Verify that all power is switched on.
4. If a projector still does not produce an image, re-start your computer.
5. If an image still does not appear, unplug a projector from your computer and check your computer monitor's display. Problem may be with your graphics controller rather than with a projector. (When you reconnect a projector, be sure to turn computer and monitor off before you power up a projector. Power equipment back on in order of : Projector and computer.)
6. If problem still exists, check following chart.

| Problem: | Try these Solutions |
|---|---|
| **No power.** | ● Plug a projector into your AC outlet.<br>● Make sure READY Indicator lights.<br>● Wait 90 seconds after a projector is turned OFF when turning a projector back on.<br>NOTE : After pressing Power ON-OFF button to OFF, make sure a projector works as follows:<br>1. LAMP indicator lights bright and READY indicator turns off.<br>2. After 90 seconds, READY indicator lights green again and a projector may be turned on by pressing Power ON-OFF button.<br>● Check WARNING TEMP. and READY indicator. If both WARNING TEMP. and READY indicator flashes, a projector cannot be turned on. (See "TURNING ON/OFF PROJECTOR" section on page 20.)<br>● Check Projection Lamp. (Refer to page 44.) |
| **Image is out of focus.** | ● Adjust focus of a projector.<br>● Make sure a projection screen is at least 4.6' (1.4m) from a projector.<br>● Check Projection Lens to see if it needs cleaning.<br>NOTE : Moving a projector from a cool temperature location to a warm temperature location may result in moisture condensation on Projection Lens. In such an event, leave a projector OFF and wait until condensation disappears. |
| **Picture is Left/Right reversed.** | ● Check Ceiling/Rear feature. (See "SETTING" section on page 38.) |
| **Picture is Top/Bottom reversed.** | ● Check Ceiling feature. (See "SETTING" section on page 38.) |
| **Some displays are not seen during Operation.** | ● Check Display feature.(See "SETTING" section on page 38.) |
| **No image.** | ● Check connection between your computer or video equipment and a projector.<br>● When turning a projector on, it takes about 30 seconds to display an image.<br>● Check system that you select is corresponding with your computer or video equipment.<br>● Make sure temperature is not out of Operating Temperature (5°C ~ 35°C). |
| **No sound.** | ● Check audio cable connection from audio input source.<br>● Adjust audio source.<br>● Press VOLUME (+) button.<br>● Press MUTE button. |

# TECHNICAL SPECIFICATIONS

| | |
|---|---|
| **Projector Type** | Multi-media Projector |
| **Dimensions (W x H x D)** | 12.6" x 6.6" x 18.5" (319 mm x 168 mm x 470 mm) (not including Adjustable Feet) |
| **Net Weight** | 20.5 lbs (9.3 kg) Model LV-7565, 17.6 lbs (8.0 kg) Model LV-7565F |
| **LCD Panel System** | 1.3" TFT Active Matrix type, 3 panels |
| **Panel Resolution** | 1024 x 768 dots |
| **Number of Pixels** | 2,359,296 (1024 x 768 x 3 panels) |
| **Color System** | PAL, SECAM, NTSC, NTSC4.43, PAL-M and PAL-N |
| **High Definition TV Signal** | 480i, 480p, 575i, 575p, 720p, 1035i and 1080i |
| **Scanning Frequency** | H-sync. 15 ~ 100 KHz, V-sync. 50 ~ 100 Hz |
| **Projection Lens** | F1.7 ~ 2.0 lens with f=48.2 mm ~ 62.6 mm Motor zoom and focus (Model LV-7565) |
| **Throw distance** | 4.6' (1.4 m) ~ 48.3' (14.7 m) Model LV-7565 |
| **Motorized Lens Shift** | Up and Down |
| **Projection Image Size (Diagonal)** | Adjustable from 31" to 400" |
| **Horizontal Resolution** | 800 TV lines (HDTV) |
| **Projection Lamp** | 300 watt type |
| **Input 1/Monitor output Jacks** | DVI Terminal (Digital) HDCP Compatible, HDB 15-pin Terminal (Analog) and Stereo Mini Type Jack (Audio) |
| **Input 2 Jacks** | BNC Type x 5 (G or VIDEO/Y, B or Cb/Pb, R or Cr/Pr, H and V), Stereo Mini Type Jack (Audio) |
| **Input 3 Jacks** | RCA Type x 3 (VIDEO/Y, Cb/Pb and Cr/Pr), RCA Type x 2 (Audio R and L) and DIN 4-pin (S-Video) |
| **Other Jacks** | DIN 8-pin (Control port), USB port (Series B receptacle), Wired Remote Jack and Network Imager Connector |
| **Built-in Speakers** | INT. SP. Stereo (R and L), 2 watt RMS (T.H.D. 10%) |
| **Feet Adjustment** | 0˚ to 10.5˚ |
| **Voltage and Power Consumption** | AC 100 ~ 120 V (5.0 A Max. Ampere), 50 / 60 Hz (The U.S.A and Canada)<br>AC 200 ~ 240 V (2.5 A Max. Ampere), 50 / 60 Hz (Continental Europe) |
| **Operating Temperature** | 41 ˚F ~ 95 ˚F (5 ˚C ~ 35 ˚C) |
| **Storage Temperature** | 14 ˚F ~ 140 ˚F (-10 ˚C ~ 60 ˚C) |
| **Remote Control Transmitter** | Power Source : AA, UM3 or R06 Type x 2<br>Operating Range : 16.4' (5m) / ±30˚<br>Dimensions : 2.2" x 1.3" x 7.6" (55mm x 34mm x 192mm)<br>Net Weight : 0.36 lbs (165 g) (including batteries)<br>Laser Pointer : Class II Laser (Max. Output : 1mW / Wave length : 650±20nm) |

## OPTIONAL PARTS

The parts listed below are optionally supplied. When ordering those parts, give the name and Type No. to the sales dealer.

- **DVI Cable** **Type No. : LV-CA29**
- **HDB 15 pin-SCART 21 pin Cable** **Type No. : LV-CA31**
- **Ultra Wide Angle Lens** **Type No. : LV-IL01**
- **Wide Angle Zoom Lens** **Type No. : LV-IL02**
- **Long Focus Zoom Lens** **Type No. : LV-IL03**
- **Ultra Long Focus Zoom Lens** **Type No. : LV-IL04**
- **Network Imager** **Type No. : LV-NI01**

## LENS REPLACEMENT

The lens of this projector can be replaced with other optional lens which are sold separately. This feature enables you to use the projector for wide variety of uses.
For installation and replacement of the lens, always contact the sales dealer. The projector lens must be installed or replaced by well-trained sales or service engineers. Do not attempt to do by yourself as it may cause injury.

**To the sales and service engineer;**

Referring to the attached lens replacement and installation manual, replace or install the lens properly.

After installing the lens, attach the lens cap to the lens when setting up the projector.
Do not hold the lens when carrying or lifting the projector. It may cause serious damage to the projector.
